Suya H 23, 24, 60, 145, 146
teeth
  anterior, extrusion 292–4
  classification of relationships between two teeth or units of teeth 260
  crowding see crowding
  misaligned, correction, case presentation 240
  mutilated, case presentations 221–5, 229–45
  posterior, intrusion 291
  replacement in opposite arch, multidisciplinary treatment allowing 229–31
  rotations, case presentation 240–245
  teeth movement, orthodontic (OTM) 1, 6
  accelerating see accelerated tooth movement
  facilitation by PAOO/AOO 28
  gingival recession and 32
  historical perspectives 7, 10, 12, 13, 14, 15, 23, 24, 26, 32
  early 21st Century 27–8
  treatment times 26
  increasing rate of 258–67
  in Piezocision, increasing scope 125
  rapid 85–7, 290
  structures determining limits of 94
window of opportunity see window of opportunity
temporary anchorage devices (TADs) 92, 258
three-dimensional imaging and reconstruction (cone beam CT) 169, 191
  basal bone expansion 195
  bone resorption 195
  root positioning 191, 197
time, treatment see treatment
tissue engineering 4, 34, 145–218, 289–90
  21st Century pioneers 27–8
  adults 219–55
  treatment time and 89
  tissue physiology (histophysiology) 4–5, 61–2
  titanium screws for temporary anchorage 92
  tooth see teeth
  transverse maxillary deficiency or discrepancy, case presentations 81–4, 165–76
treatment efficiency see efficiency
treatment time/duration 62, 89
  factors influencing 259
  historical perspectives 25, 26, 30, 93
  reducing/saving on 25, 89, 93, 94, 220, 258–67, 290
  Piezocision 125, 134
  tunnel creation/approach 122, 123, 142, 149, 158, 165
vibration (for increasing rate of tooth movement) 259
wedge resection; Bichlmayr’s 9–10
  “whole-bone” perspective 4
Wilcko (Drs/brothers) et al/and coworkers 27–8, 42, 60–61, 95, 99, 119, 145–7, 176, 225, 259, 288
Wilckodontics 7, 34, 60, 259, 288
window of opportunity 91, 154
  case presentation 165, 173
  maximising 93
  Piezocision 124–5
  wires see archwires
X-ray radiographs see radiographs
Yaffe A et al 22–4
