Acknowledgements \(\textit{xxi}\)  
List of Symbols and Abbreviations \(\textit{xxiii}\)  
About the Companion website \(\textit{xxix}\)

1 Introduction \(1\)  
1.1 Electric Power Grids \(1\)  
1.2 Asset Management of Electric Power Grids \(2\)  
1.3 Maintenance Styles \(4\)  
1.3.1 Corrective Maintenance \(5\)  
1.3.1.1 CM Inspections \(6\)  
1.3.1.2 CM Servicing \(6\)  
1.3.1.3 CM Replacement \(6\)  
1.3.1.4 Evaluation of CM \(6\)  
1.3.2 Period-Based Maintenance \(7\)  
1.3.2.1 PBM Inspections \(8\)  
1.3.2.2 PBM Servicing \(8\)  
1.3.2.3 PBM Replacement \(9\)  
1.3.2.4 Evaluation of PBM \(9\)  
1.3.3 Condition-Based Maintenance \(9\)  
1.3.3.1 CBM Inspections \(11\)  
1.3.3.2 CBM Servicing \(11\)  
1.3.3.3 CBM Replacement \(11\)  
1.3.3.4 Introduction to the Health Index \(11\)  
1.3.3.5 Evaluation of CBM \(13\)  
1.3.4 Risk-Based Maintenance \(13\)  
1.3.4.1 Corporate Business Values and the Risk Matrix \(14\)  
1.3.4.2 RBM Inspections \(17\)  
1.3.4.3 RBM Servicing \(17\)  
1.3.4.4 RBM Replacement \(17\)  
1.3.4.5 Evaluation of RBM \(18\)  
1.3.5 Comparison of Maintenance Styles \(18\)  
1.4 Incident Management \(20\)  
1.5 Summary \(21\)
2 Basics of Statistics and Probability 25
2.1 Outcomes, Sample Space and Events 26
2.2 Probability of Events 29
2.3 Probability versus Statistical Distributions 30
2.4 Fundamental Statistical Functions 33
2.4.1 Failure Distribution F 33
2.4.2 Reliability R 34
2.4.3 Probability or Distribution Density f 35
2.4.4 Probability or Distribution Mass f 35
2.4.5 Hazard Rate h and the Bath Tub Model 36
2.4.6 Cumulative Hazard Function H 38
2.5 Mixed Distributions 38
2.5.1 Competing Processes 39
2.5.2 Inhomogeneous Populations 41
2.5.2.1 Bayes’ Theorem 42
2.5.2.2 Failure Distribution of an Inhomogeneous Population 45
2.5.3 Early Failures Interpreted as Child Mortality 47
2.6 Multivariate Distributions and Power Law 49
2.6.1 Ageing Dose and Power Law 49
2.6.2 Accelerated Ageing 52
2.6.3 Multi-Stress Ageing 54
2.6.4 Cumulative Distribution, Ageing Dose and CBM 56
2.7 Summary 59

3 Measures in Statistics 63
3.1 Expected Values and Moments 63
3.1.1 Operations and Means 65
3.1.2 Bayesian Mean 66
3.1.3 The Moments of a Distribution 67
3.1.4 EXTRA: Moment Generating Function 67
3.1.5 EXTRA: Characteristic Function 68
3.1.6 Central Moments of a Distribution 69
3.1.7 The First Four Central and Normalized Moments 70
3.1.8 Mean, Standard Deviation, and Variance of a Sample 71
3.2 Median and Other Quantiles 73
3.3 Mode 75
3.4 Merits of Mean, Median and Modal Value 75
3.5 Measures for Comparing Distributions 77
3.5.1 Covariance 77
3.5.2 Correlation 80
3.5.3 Cross-Correlation and Autocorrelation 81
3.6 Similarity of Distributions 82
3.6.1 Similarity of Counting in Discrete Sets 82
3.6.2 Similarity of Two Discrete Distributions 85
3.6.3 Similarity of Two Continuous Distributions 87
3.6.4 Significance of Similarity 90
3.6.5 Singularity Issues and Alternative Similarity Indices 95
### 4 Specific Distributions  101

#### 4.1 Fractions and Ranking  101

##### 4.1.1 Uniform Distribution  102

- **4.1.1.1** Continuous Uniform Distribution Characteristics  103
- **4.1.1.2** Discrete Uniform Distribution Characteristics  104
- **4.1.1.3** EXTRA: Moment Generating Function and Characteristic Function  106

##### 4.1.2 Beta Distribution or Rank Distribution  106

- **4.1.2.1** Beta Distribution Characteristics  107
- **4.1.2.2** EXTRA: Moment Generating Function and Characteristic Function  111

#### 4.2 Extreme Value Statistics  112

##### 4.2.1 Weibull Distribution  113

- **4.2.1.1** Weibull-2 Distribution  113
- **4.2.1.2** Weibull-2 Distribution Moments and Mean  115
- **4.2.1.3** Weibull-2 Distribution Characteristics  117
- **4.2.1.4** EXTRA: Moment Generating Function  117

##### 4.2.2 Weibull-3 Distribution  117

##### 4.2.3 Weibull-1 Distribution  118

##### 4.2.4 Exponential Distribution  119

- **4.2.4.1** Exponential Distribution and Average Hazard Rate  119
- **4.2.4.2** Exponential Distribution Characteristics  123

#### 4.3 Mean and Variance Statistics  124

##### 4.3.1 Normal Distribution  124

- **4.3.1.1** Characteristics of the Normal Distribution  125
- **4.3.1.2** EXTRA: Moments, Moment Generating Function and Characteristic Function  127
- **4.3.1.3** EXTRA: Central Limit Theorem  128
- **4.3.2 Lognormal Distribution  131

- **4.3.2.1** Characteristics of the Lognormal Distribution  133
- **4.3.2.2** EXTRA: Moment Generating Function and Characteristic Function  134
- **4.3.2.3** Lognormal versus Weibull  134

#### 4.4 Frequency and Hit Statistics  134

##### 4.4.1 Binomial Distribution  135

- **4.4.1.1** Mean and Variance  138
- **4.4.1.2** Characteristics of the Binomial Distribution  138
- **4.4.1.3** EXTRA: Moment Generating Function  139

##### 4.4.2 Poisson Distribution  140

- **4.4.2.1** Characteristics of the Poisson Distribution  140
- **4.4.2.2** Derivation of the Poisson Distribution  141
- **4.4.2.3** Homogeneous Poisson Process  141

##### 4.4.2.4 Non-Homogeneous Poisson Process  142

##### 4.4.2.5 Poisson versus Binomial Distribution  143

##### 4.4.3 Hypergeometric Distribution  144

- **4.4.3.1** Mean and Variance of the Hypergeometric Distribution  145
- **4.4.3.2** Characteristics of the Hypergeometric Distribution  146
Contents

4.4.4 Normal Distribution Approximation of the Binomial Distribution 147
4.4.5 Multinomial Distribution 149
4.4.5.1 Mean, Variances and Moment Generating Function 150
4.4.6 Multivariate Hypergeometric Distribution 151
4.5 Summary 152

5 Graphical Data Analysis 157
5.1 Data Quality 158
5.2 Parameter-Free Graphical Analysis 158
5.2.1 Basic Graph of a Population Sample 159
5.2.2 Censored Data 160
5.2.3 Kaplan–Meier Plot 165
5.2.4 Confidence Intervals Around a Known Distribution 168
5.2.5 Confidence Intervals with Data 172
5.2.6 Alternative Confidence Intervals 174
5.3 Model-Based or Parametric Graphs 176
5.4 Weibull Plot 178
5.4.1 Weibull Plot with Expected Plotting Position 179
5.4.2 Weibull Plot with Median Plotting Position 182
5.4.3 Weibull Plot with Expected Probability Plotting Position 182
5.4.4 Weibull Plot with Censored Data 183
5.4.5 Confidence Intervals in Weibull Plots 185
5.5 Exponential Plot 188
5.5.1 Exponential Plot with Expected Plotting Position 188
5.5.2 Exponential Plot with Median Plotting Position 189
5.5.3 Exponential Plot with Censored Data 190
5.5.4 Exponential Plot with Confidence Intervals 190
5.6 Normal Distribution 193
5.6.1 Normal Plot with Expected Plotting Position 194
5.6.2 Normal Probability Plot with Confidence Intervals 196
5.6.3 Normal Plot and Lognormal Data 196
5.7 Power Law Reliability Growth 197
5.7.1 Duane and Crow AMSAA Plots and Models 197
5.7.2 NHPP Model in Duane and Crow AMSAA Plots 200
5.8 Summary 202

6 Parameter Estimation 207
6.1 General Aspects with Parameter Estimation 207
6.1.1 Fundamental Properties of Estimators 209
6.1.1.1 Bias 209
6.1.1.2 Efficiency 209
6.1.1.3 Consistency 210
6.1.2 Why Work with Small Data Sets? 211
6.1.3 Asymptotic Behaviour of Estimators 212
6.2 Maximum Likelihood Estimators 212
6.2.1 ML with Uncensored Data 213
6.2.2 ML for Sets Including Censored Data 214
6.2.3 ML for the Weibull Distribution 214
6.2.3.1 ML Estimators for Weibull-2 Uncensored Data 215
6.2.3.2 ML Estimators for Weibull-2 Censored Data 215
6.2.3.3 Expected ML Estimators for the Weibull-2 Distribution 216
6.2.3.4 Formulas for Bias and Scatter 218
6.2.3.5 Effect of the ML Estimation Bias in Case of Weibull-2 220
6.2.4 ML for the Exponential Distribution 221
6.2.5 ML for the Normal Distribution 222
6.3 Linear Regression 223
6.3.1 The LR Method 223
6.3.1.1 LR by Unweighted Least Squares 224
6.3.1.2 LR by Weighted Least Squares 228
6.3.1.3 LR with Censored Data 231
6.3.1.4 LR with Fixed Origin 232
6.3.1.5 Which is the (Co)variable? 233
6.3.2 LR for the Weibull Distribution 234
6.3.2.1 LR by Unweighted LS for the Weibull Distribution 235
6.3.2.2 LR by Weighted LS for the Weibull Distribution 236
6.3.2.3 Processing Censored Data with the Adjusted Rank Method 238
6.3.2.4 EXTRA: Processing Censored Data with the Adjusted Plotting Position Method 240
6.3.2.5 Expected LS and WLS Estimators for the Weibull-2 Distribution 242
6.3.2.6 Formulas for Bias and Scatter for LS and WLS 243
6.3.2.7 Comparison of Bias and Scatter in LS, WLS and ML 246
6.3.3 LR for the Exponential Distribution 249
6.3.3.1 LR by Unweighted LS for the Exponential Distribution 251
6.3.3.2 LR by Weighted LS for the Exponential Distribution 252
6.3.3.3 Processing Censored Data with the Adjusted Rank Method 253
6.3.3.4 EXTRA: Processing Censored Data with the Adjusted Plotting Position Method 255
6.3.3.5 Expected LS and WLS Estimator for the Exponential Distribution 256
6.3.4 LR for the Normal Distribution 257
6.3.4.1 LR by Unweighted LS for the Normal Distribution 258
6.3.4.2 Processing Censored Data with the Adjusted Rank Method 260
6.3.4.3 EXTRA: Processing Censored Data with the Adjusted Plotting Position Method 261
6.3.4.4 Expected LS Estimators for the Normal Distribution 262
6.3.5 LR Applied to Power Law Reliability Growth 263
6.4 Summary 263

7 System and Component Reliability 267
7.1 The Basics of System Reliability 267
7.2 Block Diagrams 268
7.3 Series Systems 269
7.4 Parallel Systems and Redundancy 272
7.5 Combined Series and Parallel Systems, Common Cause 273
7.6 EXTRA: Reliability and Expected Life of k-out-of-n Systems 276
# Contents

## 7.7 Analysis of Complex Systems

7.7.1 Conditional Method 278  
7.7.2 Up-table Method 280  
7.7.3 EXTRA: Minimal Paths and Minimum Blockades 283

## 7.8 Summary 285

## 8 System States, Reliability and Availability 291

8.1 States of Components and Systems 291  
8.2 States and Transition Rates of One-Component Systems 292  
8.2.1 One-Component System with Mere Failure Behaviour 293  
8.2.2 One-Component System with Failure and Repair Behaviour 294  
8.3 System State Probabilities via Markov Chains 297  
8.3.1 Component and System States 298  
8.3.2 System States and Transition Rates for Failure and Repair 300  
8.3.3 Differential Equations Based on the State Diagram 301  
8.3.4 Differential Equations Based on the Transition Matrix 302  
8.4 Markov–Laplace Method for Reliability and Availability 303

8.5 Lifetime with Absorbing States and Spare Parts 306

8.6 Mean Lifetimes MTTFF and MTBF 310

8.7 Availability and Steady-State Situations 312

8.8 Summary 314

## 9 Application to Asset and Incident Management 317

9.1 Maintenance Styles 317  
9.1.1 Period-Based Maintenance Optimization for Lowest Costs 317

9.1.1.1 Case Description 317

9.1.1.2 References to Introductory Material 318  
9.1.1.3 PBM Cost Optimization Analysis 318

9.1.1.4 Remarks 320

9.1.2 Corrective versus Period-Based Replacement and Redundancy 321

9.1.2.1 Case Description 322  
9.1.2.2 References to Introductory Material 322

9.1.2.3 Analysis of Corrective versus Period-Based Replacement and Redundancy 323

9.1.2.4 Remarks 326

9.1.3 Condition-Based Maintenance 326  
9.1.3.1 References to Introductory Material 327

9.1.3.2 Analysis of Condition versus Period-Based Replacement 327

9.1.3.3 Remarks 329

9.1.4 Risk-Based Maintenance 330

9.1.4.1 References to Introductory Material 330

9.1.4.2 Analysis of Risk versus Condition-Based Maintenance 331

9.1.4.3 Remarks 333

9.2 Health Index 334

9.2.1 General Considerations of Health Index 334

9.2.1.1 References to Introductory Material on Health Index Concept Considerations 335
9.2.1.2 Analysis of the Health Index Concept 335
9.2.1.3 Remarks 336
9.2.2 Combined Health Index 337
9.2.2.1 References to Introductory Material 337
9.2.2.2 Analysis of the Combined Health Index Concept 337
9.3 Testing and Quality Assurance 338
9.3.1 Accelerated Ageing to Reduce Child Mortality 338
9.3.2 Tests with Limited Test Object Numbers and Sizes 339
9.4 Incident Management (Determining End of Trouble) 342
9.4.1 Component Failure Data and Confidence Intervals 342
9.4.1.1 References to Introductory Material 343
9.4.1.2 Analysis of the Case 343
9.4.1.3 Remarks 345
9.4.2 Failures in a Cable with Multiple Problems and Stress Levels 347
9.4.2.1 References to Introductory Material 348
9.4.2.2 Analysis of the Case 348
9.4.2.3 Remarks 352
9.4.3 Case of Cable Joints with Five Early Failures 352
9.4.3.1 References to Introductory Material 353
9.4.3.2 Analysis of the Case 353
9.4.3.3 Prognosis Using a Weibull Plot and Confidence Intervals 354
9.4.3.4 Estimation of Sample Size Using the Similarity Index 356
9.4.3.5 Redundancy and Urgency 359
9.4.3.6 Remarks 359
9.4.4 Joint Failure Data with Five Early Failures and Large Scatter 360
9.4.4.1 References to Introductory Material 360
9.4.4.2 Analysis of the Case 361
9.4.4.3 Prognosis Using a Weibull Plot and Confidence Intervals 361
9.4.4.4 Estimation of Sample Size Using the Similarity Index 364
9.4.4.5 Remarks 364

10 Miscellaneous Subjects 367
10.1 Basics of Combinatorics 367
10.1.1 Permutations and Combinations 367
10.1.2 The Gamma Function 368
10.2 Power Functions and Asymptotic Behaviour 369
10.2.1 Taylor and Maclaurin Series 370
10.2.2 Polynomial Fitting 371
10.2.2.1 Polynomial Interpolation 371
10.2.2.2 Polynomial and Linear Regression 374
10.2.3 Power Function Fitting 378
10.3 Regression Analysis 380
10.4 Sampling from a Population and Simulations 386
10.4.1 Systematic Sampling 387
10.4.2 Numerical Integration and Expected Values 389
10.4.3 Ranked Samples with Size \( n \) and Confidence Limits 396
10.4.3.1 Behaviour of Population Fractions 396
Contents

10.4.3.2 Confidence Limits for Population Fractions  399
10.4.4 Monte Carlo Experiments and Random Number Generators  401
10.4.5 Alternative Sampling and Fractals  405
10.5 Hypothesis Testing  407
10.6 Approximations for the Normal Distribution  408
10.6.1 Power Series  409
10.6.2 Power Series Times Density $f(y)$  409
10.6.3 Inequalities for Boxing $R(y)$ and $h(y)$ for Large $y$  410
10.6.4 Polynomial Expression for $F(y)$  410
10.6.5 Power Function for the Reliability Function $R(y)$  410
10.6.6 Wrap-up of Approximations  412

Appendix A Weibull Plot  413

Appendix B Laplace Transforms  415

Appendix C Taylor Series  417

Appendix D SI Prefixes  419

Appendix E Greek Characters  421

Appendix F Standard Weibull and Exponential Distribution  423

Appendix G Standardized Normal Distribution  429

Appendix H Standardized Lognormal Distribution  435

Appendix I Gamma Function  441

Appendix J Plotting Positions  447
J.1 Expected Ranked Probability $<F_{i,n}>$ for $n = 1, \ldots, 30$  448
J.2 Expected Ranked Probability $<F_{i,n}>$ for $n = 31, \ldots, 45$  449
J.3 Expected Ranked Probability $<F_{i,n}>$ for $n = 45, \ldots, 60$  450
J.4 Median Ranked Probability $F_{M,i,n}$ for $n = 1, \ldots, 30$  452
J.5 Median Ranked Probability $F_{M,i,n}$ for $n = 31, \ldots, 45$  453
J.6 Median Ranked Probability $F_{M,i,n}$ for $n = 46, \ldots, 60$  454
J.7 Probability of Expected Ranked Weibull Plotting Position $F(<Z_{i,n}>)$ for $n = 1, \ldots, 30$  456
J.8 Probability of Expected Ranked Weibull Plotting Position $F(<Z_{i,n}>)$ for $n = 31, \ldots, 45$  457
J.9 Probability of Expected Ranked Weibull Plotting Position $F(<Z_{i,n}>)$ for $n = 46, \ldots, 60$  458
J.10 Expected Ranked Weibull Plotting Position $<Z_{i,n}>$ for $n = 1, \ldots, 30$  460
J.11 Expected Ranked Weibull Plotting Position $<Z_{i,n}>$ for $n = 31, \ldots, 45$  461
J.12 Expected Ranked Weibull Plotting Position $<Z_{i,n}>$ for $n = 46, \ldots, 60$  462
J.13 Weights for Linear Regression of Weibull-2 Data for $n = 1, \ldots, 30$  464
J.14  Weights for Linear Regression of Weibull-2 Data for \( n = 31, \ldots, 45 \)  465
J.15  Weights for Linear Regression of Weibull-2 Data for \( n = 46, \ldots, 60 \)  466
References  469
