List of Contributors ix

Preface xv
Claus-Wilhelm von der Lieth

Section 1: Introduction
1. Glycobiology, Glycomics and (Bio)Informatics 3
Claus-Wilhelm von der Lieth

Section 2: Carbohydrate Structures
2. Introduction to Carbohydrate Structure and Diversity 23
Stephan Herget, Rene Ranzinger, Robin Thomson, Martin Frank and Claus-Wilhelm von der Lieth
3. Digital Representations of Oligo- and Polysaccharides 49
Stephan Herget and Claus-Wilhelm von der Lieth
4. Evolutionary Considerations in Studying the Sialome: Sialic Acids and the Host–Pathogen Interface 69
Amanda L. Lewis and Ajit Varki

Section 3: Carbohydrate-active Enzymes and Glycosylation
5. Carbohydrate-active Enzymes Database: Principles and Classification of Glycosyltransferases 91
Pedro M. Coutinho, Corinne Rancurel, Mark Stam, Thomas Bernard, Francisco M. Couto, Etienne G. J. Danchin and Bernard Henrissat
6. Other Databases Providing Glycoenzyme Data 119
Thomas Lütteke and Claus-Wilhelm von der Lieth
7. Bioinformatics Analysis of Glycan Structures from a Genomic Perspective 125
Kiyoko F. Aoki-Kinoshita and Minoru Kanehisa
8. Glycosylation of Proteins 143
Claus-Wilhelm von der Lieth and Thomas Lütteke
9. Prediction of Glycosylation Sites in Proteins
   Karin Julenius, Morten B. Johansen, Yu Zhang, Søren Brunak and Ramneek Gupta

Section 4: Experimental Methods – Bioinformatic Requirements
10. Experimental Methods for the Analysis of Glycans and Their Bioinformatics Requirements
    Claus-Wilhelm von der Lieth

11. Analysis of N- and O-Glycans of Glycoproteins by HPLC Technology
    Anthony H. Merry and Sviatlana A. Astrautsova

12. Glycomic Mass Spectrometric Analysis and Data Interpretation Tools
    Niclas G. Karlsson and Nicolle H. Packer

    Kai Maass and Alessio Ceroni

    Rahul Raman, S. Raguram and Ram Sasisekharan

15. NMR Databases and Tools for Automatic Interpretation of Spectra of Carbohydrates
    Claus-Wilhelm von der Lieth

16. Automatic Spectrum Interpretation Based on Increment Rules: CASPER
    Roland Stenutz

17. Interpretation of $^{13}$C NMR Spectra by Artificial Neural Network Techniques (NeuroCarb)
    Andreas Stoeckli, Matthias Studer, Brian Cutting and Beat Ernst

Section 5: 3D Structures of Complex Carbohydrates
18. Conformational Analysis of Carbohydrates – A Historical Overview
    Martin Frank

19. Predicting Carbohydrate 3D Structures Using Theoretical Methods
    Martin Frank

20. Synergy of Computational and Experimental Methods in Carbohydrate 3D Structure Determination and Validation
    Thomas Lütteke and Martin Frank
Contents

Section 6: Protein–Carbohydrate Interaction
21. Structural Features of Lectins and Their Binding Sites 415
   Remy Loris

22. Statistical Analysis of Protein–Carbohydrate Complexes Contained in the PDB 433
   Thomas Lütteke and Claus-Wilhelm von der Lieth

Section 7: Appendices
Appendix 1: List of Available Websites 449
Appendix 2: Glossary 453

Index 461
