SUBJECT INDEX

Page references followed by fig indicate an illustrated diagram; followed by t indicate a table; followed by e indicate an exhibit.

A
Accenture, 309
Accountability, 10
ADDIE model: evaluation methods used in context of, 60t; limitations of evaluation using, 71
Adult Education Program, 340
AEA University Programs, 356
AEA's Guiding Principles for Evaluators, 107, 110–111, 363
The Agenda (Hammer), 44
American Education Research Association (AERA), 365
American Evaluation Association (AEA), 38, 107, 358, 359
American Journal of Evaluation (AJE), 357
American Society for Personnel Administration (ASPA), 355
American Society for Quality (ASQ), 200, 366–367
American Society for Training and Development (ASTD), 200, 368, 369–370
Analysis: cause, 248t–249; definition of, 6; functional, 6–7; performance, 6; stakeholder, 277–279t, 293–294. See also Data analysis
Annie E. Casey Foundation, 286, 288
Appreciative inquiry (AI): description of, 322–323; evaluation using, 325–326; five principles of, 323–324; 4D process of, 324–325fig
Aspen Institute, 293
Assessments. See Organization assessments
Assistive technology, 308–309
Association for Educational Communications and Technology (AECT), 161
Audio Home Recording Act (1992), 310
Audits, 32–33
Authenticity Consulting, 288
Avatars, 306
Averages: definition of, 192; three ways of calculating, 192

The Balanced Scorecard (Kaplan & Norton), 164

Baseline data, 264

Baseline setting: rule on, 185–186; technique and tip on, 186; tool for, 185–186

Behavior: automatic measurement of, 16–17; observing, 17; performance chain and related, 14–15, 16–18; self-monitoring, 17–18; Six Boxes Model on, 18fig–19

Behavior engineering model (BEM): cause analysis used in, 248; description of, 99

Blogs, 309, 310

Boston Public Schools, 340

Brinkerhoff’s impact map, 344

Brinkerhoff’s stage model, 343

Brinkerhoff’s success case method, 344

Broadcaster.com, 301

Budget assessment, 235–236

Business needs: assessing strategic or operational, 99; BSC (balanced scorecard) perspective on, 319; ROI process model alignment with, 234; ROI process model identification of, 225. See also Organizations

Calendar time, 20–21fig

Calibration: definition of, 12; performance applications of, 12–14

Canadian Evaluation Society, 38

Casey Foundation, 286, 288

Causation: correlation compared to, 193–194; definition of, 194

Cause analysis: behavior engineering model (BEM), 248; HPT evaluation model step of, 248–249

Centers for Disease Control and Prevention (CDC): evaluation work plan using framework of, 284–285t, 286; public health evaluation approach used by, 284, 294

Certification: for full-time evaluators, 365; for part-time evaluators, 365–368; project management, 365–366. See also Profession

Certification Guide (Weinberg), 355

Certified Performance Technologist (CPT), 367–368

Certified Professional in Learning and Performance (CPLP) credential, 368

Change: beware of lurking monsters within, 270–271; critical success factors for, 266; interrelationships between clients and, 268–270; selection of specific, 264–266; value, sequence, and timing of, 266–268. See also HPT projects; Performance interventions

Change process: HPT evaluation model implementation for, 251–253; impact evaluation process and, 124–125; organizational enablers of, 257–258

Checklists: performance, 216fig; self-instructional training, 149–150e

Chi-square goodness of fit, 193

Classes of information data, 291–292t, 293

Clients: ethical dilemma of data collection interference by, 169; HPT professionals’ ethical relationship with, 167; interrelationships between changed interventions and, 268–270

Code of Ethics (ASQ), 367

Code of Ethics (ISPI), 161, 166, 171. See also Ethical issues

The Cognitive Style of PowerPoint (Tufte), 172

Communication tools: performance conversations as, 55–56; podcasts and webcasts, 299–300; social network websites, 300–301; web-based surveys, 300. See also Reporting

Competency-based needs assessments, 103–104

Conference Board study (2005), 339

Confidentiality issues, 309–310, 311

Confirmative evaluation, 241

Congress of the United States Congressional Budget Office, 310

Content validity, 133, 140

Context: data collection consideration of, 289–291e; definition of, 47; expanding
for evaluation, 340–341; foundation guidelines for evaluation, 286–290; listing evaluation issues to establish, 279–281; logic models used to establish evaluation, 281–284; matching evaluation goals with, 276–277; reporting results and role of, 291–293; stakeholder analysis to establishing evaluation, 277–279, 293–294; third-party industry specializing in evaluation, 288; transforming performance measurement into, 47–49
Continual improvement: characteristics guiding evaluation framework for, 122–124; description of, 121; Plan-Do-Check-Act (PDCA) cycle of, 328fig; self-evaluation framework for monitoring, 121–122; TQM (total quality management) used for, 329–331
Continuous evaluation: definition and benefits of, 259–261; timing of, 262–263; types of anecdotal or, 262
Copyright issues, 310–311
Cornell University, 355
Corporation for Skilled Workforce, 288
Correlation: causation compared to, 193–194; definition of, 193
Correlation coefficient (Spearman Rho), 193
Counting period, 13
CPT (Certified Performance Technologist), 367–368
Criterion-referenced tests (CRTs), 154–155
Cross-functional measures, 53–54
C.S. Mott Foundation, 285
Culture: of Southwest Airlines, 51; surveys taken on, 34–35
Culture and climate surveys, 34–35
Customer satisfaction index (ACSI), 36–37
Customer-level assessments, 36–37

D
Data: baseline, 264; converting to monetary values, 233; falsifying, 171; leveraging, 180, 186–187; reliability of, 12–13, 139; reporting on classes of information, 291–292t, 293; tracking leading indicators, 180, 187–190t; types of, 190–191
Data analysis: ethical issues related to, 170; Full-Scope Evaluation Pre-Planning Inventory, 133; impact evaluation process, 120; ROI process model, 225–226, 228–231fig; rules, techniques, tips, and tools for, 180, 190–194. See also Analysis
Data collection: client interference with, 169; context as consideration in, 289–291e; ethical issues related to, 168–169; Full-Scope Evaluation Pre-Planning Inventory, 133; impact evaluation process, 119–120; ROI process model, 228, 229fig–231fig, 232fig; security issue of web-based, 304–305; for Working Together project evaluation, 290e–291e. See also Surveys
Decision making: for defining test strategy, 203–206t, 208–209; `earning a seat at the table,’’ 236; measurement role in, 10; performance test design, 209–214; standard data display for, 19–22; test `deal breakers,’’ 213–214
Decision making data display: equal-interval vs. multiply-divide graphic scale, 21–22; stretch-to-fill graphs vs. standard graphic, 19–20; uninterrupted calendar time vs. sessions scales, 20–21fig
Dell Computer `cash conversion cycle time,’’ 50
Deming Wheel (or PDCA cycle), 328fig
Descriptive statistics, 192–193
Dessinger-Moseley model. See Full-scope evaluation
Digital media ethical standards, 310
Digital Millennium Copyright Act (1998), 310
Dissemination. See Reporting
`The dog food test,’’ 143

E
`Earning a seat at the table,’’ 236
Educational Evaluation and Policy Analysis (EEPA), 357
Educational Researcher (ER), 357
Employee engagement model, 67fig
396 SUBJECT INDEX

Employees: assessments of, 35–36; how they respond to measurement, 46–47. See also Human capital; Training

Equal-interval graphic scale, 21–22

Ethical case studies: client interference with data collection, 169; using deceptive graphics, 173; falsifying data, 171

Ethical issues: American Society for Quality concern with, 367; early concerns related to, 161–162; of performance measurement, 167–173; responses to performance management system conflicts, 166–167; standards and competencies inclusion of, 365; technology and related, 309–311. See also Code of Ethics (ISPI)

Evaluating Training Programs: The Four Levels (Kirkpatrick), 357

Evaluation: application of traditional types of, 62; broad goals of, 276–277; business-perspective strategy for, 69; categorization by type of, 241–242; changing role of, 368–370; confirmative, 241; context of, 47–49, 276–294; continuous, 259–261, 262; definition of, 6, 28, 180; expanding scope and uses of, 340–349; formative, 241; foundation guidelines for, 286–290; future directions and challenges of, 348–349; integrated evaluation structure of, 242–243; meta-evaluation of, 349; multiple interventions and relative, 261, 263; needs assessments used as, 106–111; organizational enablers of, 257–258; outcomes-based approach to, 341–343; performance-based tools, techniques, and tips on, 179–199; process and systems approaches to, 343–347; process of workplace measurement and, 315, 317; `smile sheets,'” 301; summative, 241; technology to create user-friendly process of, 296–311; traditional types of, 60; Working Together project example of, 284–287, 290–291. See also Organizational assessments; Performance interventions; Performance measurement; Training

Evaluation and Program Planning (EPP), 357–358

Evaluation as profession: certification issue of, 365–368; defined common body of knowledge argument for, 359; education and training argument for, 356–358; practical application argument for, 362; professional evaluation associations argument for, 358–359; standards, competencies, and ethics argument for, 362–365

Evaluation models: ADDIE model used as, 60; AI (appreciative inquiry) used as, 325–326; Brinkerhoff’s impact map, 344; Brinkerhoff’s stage model, 343; Brinkerhoff’s success case method, 344; BSC (balanced scorecard) used as, 319–320; case study on business-perspective, 61–74; CDC (Centers for Disease Control and Prevention), 284; foundation guidelines for, 286–290; full-scope, 128–140, 251; Hamblin’s five-level, 342; Holton’s HRD evaluation research and measurement model, 344–345; HPT (human performance technology), 243–255, 260; IBM’s input, process, output model, 343–344; impact evaluation process, 113–125; Kaufman, Keller, Watkins five-level, 342; Kirkpatrick’s four level, 76, 142–159, 164, 241, 251, 341–342; Preskill and Russ-Eft systems model, 345–347; Richey’s systemic model of training, 344; ROI process, 148, 226–236, 251, 342–343; SCM (Success Case Method), 81–93; Six Sigma used as, 333–335; strategy map used as, 321–322; Swanson and Holton’s results framework, 342; TEE (training effectiveness evaluation) system, 342; TQM (total quality management) used as, 329–331; Training efficiency and effectiveness model (TEEM), 343; Working Together project framework, 284–285, 286

Evaluation planning: establishing purpose, 279–281; logic models used in, 281–284; matching context to goals in, 276–277; public workforce development project example of, 286, 287; stakeholder
analysis step in, 277–279t, 293–294
Evaluation Review (ER), 358
Evaluation strategy case study: academic perspective of, 61; bridging the gap during, 71–72; business perspective of, 65–70; designing a business-perspective evaluation strategy during, 72–74; experienced perspective of, 63–64; generalist perspective of, 63; lessons learned from, 70–71; novice perspective of, 61–62; second academic perspective of, 62–63
Evaluation strategy model: designing the business-perspective, 72–74; illustrated diagram of, 69
Evaluation Theory, Models, and Applications (Stufflebeam & Shinkfield), 356–357
Evaluators: certification issue and, 365–368; education and training for, 356–358; full-time, 359–360; IBSTPI competencies for, 364–365; part-time, 360–362; professional evaluation associations for, 358–359; professional journals for, 357–358. See also Evaluation standards; HPT practitioners

F
Face validity, 133, 140
Facebook, 301, 309
Feedback: gathering HPT project, 271; 360-degree assessments, 35
Focus: definition of, 49; transforming performance measurement and, 49–52
Formative evaluation, 241

The Forum (journal), 340
Frequency count, 192
Full-scope evaluation: Full-Scope Evaluation Pre-Planning Inventory tool of, 131–139; implementation of, 251; integrated structure of, 242–243; issues to consider in, 128–129; when-why-what of, 129–130t
Full-Scope Evaluation Pre-Planning Inventory: contents of, 134–137; data collection and analysis of, 133; description of, 131–132; distribution of, 132–133; scoring guide for, 137–140; validity and reliability of, 133, 140
Full-time evaluators: certification for, 365; description of, 359–360
Functional analysis, 6–7
``The Futility of the Spelling Grind’’ (Rice), 340

G
Getting clarity: measures and metrics on, 183t–185; rule on, 180, 181; techniques and tips on, 182–183; tools for, 181–182t, 192t
Global Professional in Human Resources (GPHR), 366
Government Auditing Standards (2003), 363–364
Group-level assessments, 34–35
Guiding Principles for Evaluators (AEA), 107, 110–111, 363

H
Hamblin’s five-level model, 342
Hamlet (Shakespeare), 174
Hard data, 190
Harvard Business Review, 36
HCM (human capital management survey), 32
Head Start program, 340
Holton’s HRD evaluation research and measurement model, 344–345
HPT evaluation model: cause analysis step in the, 248t–249; evaluation step of the, 253–254t; illustrated diagram of, 260fig; implementation and change using, 251–253; integrated matrix for, 246t; intervention selection and design in,
HPT evaluation model: (Continued) 249–251; limitations of, 254–255; performance analysis step in the, 246–248; planning the integrated, 243–246

HPT practitioners: ethical issues for, 161–162, 165–173, 309–311; expanding approaches for evaluation, 341–347; expanding contexts for evaluation, 340–341; expanding uses of evaluation, 347–348; future directions and challenges for, 348–349; guidelines for testing for, 204–205; managing performance system expectations, 164–165; performance measurement considerations for, 163–164; technology-based evaluation tools being used by, 301–302; technology-based tools ethical/legal issues for, 309–311; technology-based tools pros and cons for, 302–305. See also Evaluators

HPT projects: baseline data on, 264; beware of lurking monsters within, 270–271; continuous evaluation of, 259–261; gathering feedback for the future on, 271; interrelationships between clients and changed, 268–270; organizational enablers for, 257–258; selection of changes for, 264–266; value, sequence, and timing of change, 266–268. See also Change; Performance interventions

Human capital: HCM (human capital management survey) on, 32; measurement and evaluation of, 27. See also Employees

Human Resource Certification Institute (HRCI), 355, 366

Human resources department (HRD), 256, 366

Hypothesis-testing research, 7–8

I

IBM’s input, process, output model, 343–344

IBSTPI Evaluator Domains and Competencies, 37–38e

Idaho Power, 298

Ilias, 299

Impact evaluation process: background of, 113–115; building the case for, 115–116; change process component of, 124–125; continual improvement component of, 121–124; illustrated diagram of, 117fig; performance dashboard of the, 124; seven steps of, 116–121; systems theory basis of, 123

Independent variables (Six Boxes Model), 18fig–19

Individual-level assessments, 35–36

Inductive reasoning research, 8

Inferential statistics, 193

Informational measurement, 45

Instructional design certification, 368

Intangible benefits, 224, 232

Integration: definition of, 52; transformational measurement and, 52–54

Integrity: definition of, 168; as framework for ethical issues, 168

Integrity (Carter), 168

Interactivity: definition of, 54; performance conversations to increase, 55–56; transformational performance measurement and, 54–56

International Board of Standards for Training, Performance, and Instruction (IBSTPI): assessment research by, 37; competencies for evaluators list by, 364–365; Evaluator Domains and Competencies of, 37–38e

International Organization for Cooperation in Evaluation, 341

International Society for Performance Improvement (ISPI): certification offered by, 200; Code of Ethics of, 161, 166, 171; CPT designation offered by,
367–368; description of, 9; “Integrity Principle” of, 171

J
J.C. Penney, 298–299
Job and task analysis, 102–103
Joint Certification Task Force, 161
Joint Committee on Program Evaluation Standards, 106, 363

K
Kaufman, Keller, Watkins five-level model, 342
Kaufman’s Level 5, 148
Kellogg Foundation, 286, 287, 341
Kirkpatrick’s evaluation model: applied to non-training intervention, 147–148; assessing relevance of, 142–143; balanced approach taken by, 164; criterion-referenced tests (CRTs) used during, 154–155; using evaluation approach based on, 151–153; extensions of, 148–150; interventions applied through, 145–148; levels as “evidentiary chain” links, 150–151; misalignment between levels of, 240; quasi-experimental design used for, 156t, 158t; ROI Level 5 extension of, 148, 223/fig, 224, 231/fig, 241; technology-based tools to create time period context of, 305–306
Kirkpatrick’s Level 0, 153–154
Kirkpatrick’s Level 1: description of, 76, 143–144; elaborations of, 148–150e; intervention issues of, 146t; as most common method of evaluation, 301; tips for measuring, 154
Kirkpatrick’s Level 2: description of, 76, 144; intervention issues of, 146t; tips for measuring, 154–155
Kirkpatrick’s Level 3: description of, 76, 144; intervention issues of, 146t; tips for measuring, 156t–157
Kirkpatrick’s Level 4: description of, 76, 144–145; intervention issues of, 146t; tips for measuring, 157–158t
Knowledge and skills assessment, 101–102
Knowledge tests: additional comments on, 204; description of, 203; performance tests vs., 203t; tips for developing, 217

L
Leaders: assessments of, 35; change process for, 124–125; Preskill and Russ-Eft systems model on role of, 345; ROI process model for partnership with, 236; securing Kirkpatrick’s model agreement with, 142–143. See also Management
Leading indicators: definition of, 187; tracking, 187–190
Learning management system (LMS), 299
Learning needs: assessing individual, 99, 105–106; ROI process model on, 225
Legal issues: copyright, 310–311; digital media, 310
Level I information/data, 291–292t, 293
Level II information/data, 291–292t, 293
Level III information/data, 291–292t, 293
Leverage data rule, 180, 186–187
LinkedIn, 301
Logic models: context factors making us the, 282; description of, 281; elements included in, 281–282; sample public health program, 282, 283/fig; three approaches to constructing, 282, 284

M
Management: BSC (balanced scorecard) used by, 317–320/fig; certification for human resource, 366; performance, 3, 5–8; ROI process model partnership with, 236; securing Kirkpatrick’s model agreement with, 142–143, 236; TQM (total quality management) approach to, 326–331. See also Leaders; Supervisors
Mean, 192
Measurement: cross-functional, 53–54; definition of, 5, 27–28, 180; how people experience, 46–47; informational, 45; motivational, 45; natural science and role of, 9–10; process for workplace evaluation and, 316, 317/fig; work outputs, 15–16. See also Performance measurement; Units of measurement “Measurement Counts!” (Binder), 4
Measures: definition of, 180–181; getting clarity, 183t–185
Measuring Program Outcomes guide (United Way), 288

SUBJECT INDEX 399
Median, 192
Meta-evaluation, 349
Metrics: definition of, 181; getting clarity, 183t–185
Microsoft, 200
Mode, 192
Motivational measurement, 45
Mott Foundation, 285t
Multiply-divide graphic scale, 21–22
MySpace, 301

N
National Society for Performance and Instruction (NSPI), 161
National Society for Programmed Instruction (NSPI), 367
Natural science: calibration concept of, 12–14; historical roots of, 9; role of measurement in, 9–10; units of measurement used in, 10–12
Needs assessments: competency-based, 103–104; description of, 34, 98; as evaluation, 106–111; four different approaches to, 100–105; for individual learning and performance needs, 105–106; job and task analysis, 102–103; knowledge and skills, 101–102; models for, 99–100; strategic, 104–105
Negative measurement, 46
Net promoter score (NPS), 36
New Directions for Evaluation (NDE), 358
No Electronic Theft Act (1997), 310
Non-profit organizations: CDC framework methodology used by, 284, 285t; data collection and measurement by, 289–291e; foundation evaluation guidelines for, 286–288; growth of collaborative projects among, 284, 286; reporting evaluation results, 291–293; rigorous evaluation efforts of, 294; Working Together project evaluation, 285t, 286–287t, 290e–291e. See also Organizations

O
Observing behavior, 17
Occupational Outlook Handbook (Wilkins), 355
One-Touch System, 298–299
Organizational assessments: customer-level, 36–37; financial and performance measurements used in, 30–32; future trends in, 37–39; individual-level, 35–36; methods and types of, 29t–30t; needs, 34, 98–111; team- or group-level, 34–35. See also Evaluation
Organizational dashboard, 31
Organizational elements model (OEM), 100
Organizations: expanding scope of evaluation in, 339–349; financial measurements kept by, 27; performance chain and results for, 15; Preskill and Russ-Eft systems model on infrastructure of, 345–346; supporting evaluation and change, 257–258; as system, 26. See also Business needs; Non-profit organizations; Workplace
An Ounce of Analysis is Worth a Pound of Objectives (Harless), 99
Outcomes-based approaches: Hamblin’s five-level model as, 342; Kaufman, Keller, Watkins five-level model as, 342; Kirkpatrick’s four level model as, 76, 142–159, 164, 241, 251, 341–342; Phillips’ ROI process model as, 148, 226–236, 251, 342–343; Swanson and Holton’s results model as, 342; TEE (training effectiveness evaluation) system as, 342
Packard Foundation, 289
Part-time evaluators: certification issues for, 365–368; description of, 360–362
Pearlstein’s Level 0, 150
Percentage, 192
Percentage correct, 11
Performance: assessing individual needs related to, 99; components of, 207fig; example of checklist for, 216fig; identifying critical elements of, 214–215
Performance analysis: definition of, 6; HPT evaluation model step of, 246–248
Performance Based Evaluation (Hale), 194
Performance chain: illustrated diagram of, 14fig; measurement and the, 14–18
Performance conversations, 55–56
Performance improvement: incremental approach to, 52; integrating evaluation for, 240–242; using technology to enhance, 309

Performance Improvement Quarterly (PIQ), 358

See also Change; Evaluation; HPT projects

Performance management: terminology related to, 5–8; three conditions in place for effective, 3

Performance management systems: ethical responses to conflicts of, 166–167; managing expectations issue of, 164–165; measurement considerations of, 163–164; taxonomy of functions, 162–163; TQM (total quality management), 326–331; typical conflicts of, 165–166

Performance measurement: audits as, 32–33; balanced scorecard as, 31–32; BSC (balanced scorecard) as, 31–32, 317–320; culture and climate surveys as, 33–34; dysfunctions of, 44–46; ethical considerations in, 161–174, 309–311, 365, 367; HCM (human capital management survey), 32; how people experience, 46–47; importance of, 43–44; needs assessments as, 34, 98–111; used in organizational assessment, 30–32; organizational dashboard as, 31; ROI (return on investment) as, 31, 157, 219, 232; transformational, 47–56. See also Evaluation; Measurement

Performance technology certification, 367–368

Performance tests: assessment through, 200–201; common problems and misconceptions about, 201–203; components on performance to consider in, 207ff; CRTs (criterion-referenced tests), 154–155; “deal breakers” decisions on, 213–214; defining “chunks” of, 210–211; description of, 203; design decisions for, 209–214; development of, 214–217; example of content of, 215–217; guidelines for, 204–205; knowledge vs., 203–204, 217; planning process for, 205–209; portfolio approach to, 211; of product vs. process, 211–212; real vs. simulated work, 212–213; World War I military use of, 340

Personal digital assistants (PDAs), 302

Phi Delta Kappa National Study Committee on Evaluation (1971), 116

Phillips’ Level 5. See ROI process model

Plan-Do-Check-Act (PDCA) cycle, 328ff

Podcasts, 299–300

Portfolio assessment, 211

Preskill and Russ-Eft systems model, 345–347

Primary stakeholders, 278

Process and systems approaches:

Brinkerhoff’s impact map, 344;
Brinkerhoff’s stage model, 343;
Brinkerhoff’s success case method, 344;
Holton’s HRD evaluation research and measurement model, 344–345; IBM’s input, process, output model, 343–344;
Preskill and Russ-Eft systems model, 345–347; Richey’s systemic model of factors predicting employee training outcomes, 344

Profession: earliest accepted definitions of a, 354–355; five distinct characteristics of a, 355; making the case for evaluation as a, 356–365; SHRM’s definition of, 355. See also Certification
Professional evaluation associations, 358–359
Professional in Human Resources (PHR), 366
Professional journals, 357–358
Program success evaluation: changing definition of, 221–222; identifying intangible benefits of, 232; initial analysis of, 225–226; using the ROI process model for, 226–236; tabulating project costs, 233–232; types of data to evaluate, 222–224
Project Managers Institute (PMI), 200, 356, 365–366
Public health programs: CDC framework for evaluating, 284; sample logic model from, 282, 283f; workforce development framework for evaluating, 284–285f, 286

Q
Qualitative data, 191
Quality: evaluator certification issues of, 366–367; Six Sigma to improve, 331t–335; TQM (total quality management) to improve, 326f–331
Quantitative data, 191
Quasi-experimental design, 156t, 158t
Questionmark, 298

R
Rating scales, definition of, 11–12
Relative evaluation, 261, 263f–264
Reliability of data: calibration and, 12–13; Full-Scope Evaluation Pre-Planning Inventory, 139
Reporting: using deceptive graphics as part of, 173; ethical issues related to, 171–173; evaluation context role in, 291–293; impact evaluation process, 120–121; ROI process model, 232–233; SCM (Success Case Method) step of, 90; “tell the story” techniques and tips for, 194–198f. See also Communication tools
Research: definition of, 7; hypothesis-testing, 7–8; inductive reasoning, 8; quasi-experimental design for, 156t, 158t

S
SCM steps: 1: focus and plan evaluation study, 83–84; 2: craft an “impact model,” 84–85t; 3: design and implement a survey, 86–87; 4: interview and document success and non-success cases, 87–89; 5: communicating findings and recommendations, 90
SCM (Success Case Method): application of information gathered from, 90–91; case study on, 81–82; five simple steps of, 82–90; four basic questions answered by, 81; getting started with using the, 91–93
Secondary stakeholders, 278
Self-instructional training checklist, 149e–150e

Return on Investment in Training and Performance Improvement Programs (Phillips), 357
Richey’s systemic model of training, 344
ROI process levels: Level 0 input, 222, 223f; Level 1 reaction and perceived value, 222, 223f, 229f; Level 2 learning and confidence, 222–223f, 229f–230f; Level 3 application and implementation, 223f, 224, 230f–231f; Level 4 impact and consequences, 223f, 224, 231f; Level 5 extension of Kirkpatrick’s model, 148, 223f, 224, 231f, 241
ROI process model: accommodating intangibles, 224; benefits of using the, 234–236; converting data to monetary value, 233; data analysis in, 225–226, 228–231f; data collection, 228, 229f–231f, 232f; evaluation planning, 226, 228; identifying intangible benefits, 232; illustrated diagram of, 227f; implementing and sustaining the process of, 233–234; isolating effects of the project, 232; as outcomes-based approach, 342–343; tabulating project costs, 233–232; types of data used in, 222–224
ROI (return on investment): calculating the, 232; description of, 31; Kirkpatrick’s Level 4 use of, 157; as value statement, 219
Self-monitoring behavior: definition of, 17; performance chain and, 17–18
Senior Professional in Human Resources (SPHR), 366
Sensitivity of procedures, 13
``Show me’’ generation, 220
Simulated work testing, 212–213
Six Boxes Model, 18
Six Sigma: description of, 331–332; DMAIC and DMADV approach of, 333, 334
practical meaning of, 332; product/service quality levels of, 331
``Smile sheets’’ evaluations, 301
Social network websites, 300–301, 309
Society for Human Resources Management (SHRM), 355, 366
Soft data, 191
Southwest Airlines: on competitive advantage of intangibles, 51;
``turnaround time’’ measure of, 50
Spearman Rho (correlation coefficient), 193
Stakeholder analysis: as best practice in non-profit evaluation, 293–294;
description of, 277–278; establishing context of evaluation through, 277–279
Stakeholders: getting clarity regarding evidence used by, 180, 181–185; impact
evaluation process, 117–118; primary versus secondary, 278; ``show me’’ generation of, 220
Standard deviation, 193
Standardized graphic displays, 20
Standards of Performance Technology and Code of Ethics (ISPI), 161
Standards. See Evaluation standards
Statistics: descriptive, 192–193; inferential, 193
Strategic HR model: evaluation strategy model used for, 68–70; overview of, 66
Strategic needs assessments, 104–105
Strategy maps: description of, 320–321; evaluation using, 321–322; showing how workplace creates value, 322
Stretch-to-fill graphs, 19–20
The Success Case Method (Brinkerhoff), 357
Summative evaluation, 241
Supervisors: assessments of, 35; impact model for coaching skills training for call center, 85t. See also Management
Survey Money, 300, 302
Surveys: culture and climate, 34–35; HCM (human capital management survey), 32; SCM (Success Case Method) use of, 86–87; web-assisted survey tools, 302; web-based, 300. See also Data collection
Swanson and Holton’s results model, 342
Systems: evaluation approached through process and, 343–347; impact evaluation process theoretical basis on, 123; organizations as, 26
T
T + D (training and development): using business model for, 65–70; limitations of, 59–60; traditional types of evaluation used in, 60t. See also Training
T + D (training and development) case study: academic perspective of, 61; bridging the gap during, 71–72; business perspective of, 65–70; designing a business-perspective evaluation strategy during, 72–74; experienced perspective of, 63–64; generalist perspective of, 63; lessons learned from, 70–71; novice perspective of, 61–62; second academic perspective of, 62–63
Talent management model, 67
Team-level assessments, 34–35
Techniques: for data analysis, 190–194; definition of, 179; for getting clarity, 182–183; for leveraging data, 187; ‘‘tell the story,’’ 194–198; for tracking leading indicators, 188–189
‘‘Techniques for Evaluating Training Programs’’ (Kirkpatrick), 357
Technology: assistive, 308–309; ethical and confidentiality issues of, 309–311; performance improvement enhanced through, 309
Technology-based evaluation tools:
avatars as, 306; benefits of using, 302–304; build-in features, 299; future possibilities for using, 305–309; how HPT practitioners are using, 301–302; Kirkpatrick’s four levels time periods using, 305–306; multi-taking and engagement characteristics of, 297–298; One-Touch System, 298–299; for one-way communication interventions, 299–300; overcoming disadvantages of, 304–305; possible ways to use emerging, 307–308; Questionmark, 298; standalone, 298–299; for two-way communication interventions, 300–301
Test planning concept model, 203–206, 208–209
Testing: assessment through, 200–201; common problems and misconceptions about, 201–203; components of performance to consider in, 207–208; criterion-referenced tests (CRTs), 154–155; example of content of, 215–217; guidelines for, 204–205; performance versus knowledge, 203–204; planning process for, 205–209; portfolio approach to, 211; product vs. process, 211–212; real vs. simulated work, 212–213; World War I military use of, 340
360-degree assessments: description of, 35; of individual learning needs, 105–106
Tips: for baseline setting, 186; for data analysis, 190–194; definition of, 179; for developing tests, 214–217; on getting clarity, 182–183; for leveraging data, 187; “tell the story,” 194–195; for tracking leading indicators, 188–189
Tools: for baseline setting, 185–186; classes of information as reporting, 291–292; for data analysis, 194; definition of, 179; for getting clarity, 181–182; technology-based evaluation, 296–311; for tracking leading indicators, 187–189; Total quality management (TQM):
description of, 326–327; evaluation using, 329–331; PDCA cycle of continuous improvement using, 328–329; quality planning, assurance, and control using, 327–328
Training: for evaluators, 358–359; mythical view of, 79; One-Touch System used for, 298–299; Questionmark program used for, 298; two realities of, 78–81. See also Employees; Evaluation; T + D (training and development)
Training effectiveness evaluation (TEE) system, 342
Training efficiency and effectiveness model (TEEM), 343
Training realities: restating the two, 80–81; training alone never produces business impact, 79–80; training will yield predictable results as, 78–79, 80
Transformational measures: transforming into context, 47–49; transforming into focus, 49–52; transforming into integration, 52–54; transforming into interactivity, 54–56; two examples of, 50
Transforming Performance Measurement (Spitzer), 47
Two-tailed t tests, 193
U
United Way of America, 288
Units of measurement: definition of, 10–11; percentage correct, 11; rating scales, 11–12. See also Measurement
U.S. Copyright Office, 310
U.S. Department of Education, 286
U.S. Department of Labor, 286, 288, 294, 355
V
Validation of measurement, 9–10
Validity of analysis unit: calibration of, 12; content, 133, 140; face, 133, 140; Full-Scope Evaluation Pre-Planning Inventory, 40, 133
Value: changing definitions of, 220; converting data to monetary, 233; ROI as definition of, 219; ROI process model forecasting, 226; strategy map showing how workplace creates, 322
