Abma, Tineke A., 13, 171, 273–274
Accountability, 7–8
Adequate Yearly Progress (AYP), 266
Advocacy, 56, 67, 71–72
AEA. See American Evaluation Association
African Americans: stereotypes of, 89; TDE and prenatal program, 88–89, 92
Alcohol sales, to minors, 64
American Evaluation Association (AEA), 54, 87, 144, 147, 252; guiding principles of, 219–228, 243–246; scope of work contract by, 222–223
American Journal of Evaluation, 144
Analysis: breadth of, 55–56, 59–63, 68, 72; depth of, 55–56, 59–61, 68, 72; evaluators balancing breadth and depth of, 61–63; situation, 155; of study data, 157–159. See also Data analysis; Qualitative analysis
Anecdotes, 38, 70
Anthropological theory, 12
Approaches. See specific approaches
Arnstein, S. R., 111–112
Asymmetric relations, 179–181, 183–184; in evaluator-stakeholder relationships, 174–175; interviews, 178; storytelling and, 174–175
Audience, 30
Authentic voices, 178
AYP. See Adequate Yearly Progress
B
Balance of powers, 59
Barela, Eric, 266
Barnes, M, 180
Baur, Vivianne E., 171, 273–274
Belmont Report, 275, 276n4
Beneficence, 217, 221, 234, 240, 242, 244
Biases, 266, 271
Biological efficiency, 199
Black-box approach, 44, 81–82, 84
Bledsoe, Katrina L., 265
Bober, M. J., 150
Breach of confidentiality, 237–239
Bridging the Gap (BTG), 244; case studies and breach of confidentiality at, 237–239; case studies’ draft papers released at, 232–233; creating context for project evaluation at, 221–223; evaluator’s role negotiations at, 221–223; funding agency report for project at, 239; funding project tasks and goals of, 215–217; participant engagement and project clarification at, 223–226; perspectives of participants and research team at, 233–240; philosophical traditions of schools and, 216, 225; professional development and filmmaking support at, 240–242; project panel discussions
summarized for, 230–231; project replication process for, 225–227; qualitative research for project at, 229–230; research team cooperation and project of, 226–233; research team’s over-representation of schools at, 235–236, 246
Brunner, L., 125
BTG. See Bridging the Gap
C
Canadian Evaluation Practice, 149–150
Canadian Evaluation Society (CES), 144, 146, 148–150
Canadian Journal of Program Evaluation, 144
Care ethic, 220
Care theory, 220
Caring reflexivity, 214, 221, 244, 246
Carman, J. C., 85
Carter, S. M., 109–111
Case studies: breach of confidentiality and BTG’s, 237–239; draft paper releases of BTG, 232–233; evaluation theory connection, 140; as form of social communication, 18; outcome evaluation and importance of, 39; qualitative inquiry supporting systems-oriented, 48–49
Cash, Timothy K., 273
Causal mechanisms, 48, 87
Cause-and-effect relationships, 80
Causes feature, in TDE, 83–87
CES. See Canadian Evaluation Society
CES Professional Designations Program, 150
Chambers, R., 119, 124
Chen, H. T., 81–84, 86–88, 90, 93–94
Child health programs, 67
Childhood obesity: challenges in, 206; environmental perspective on, 199–200; Latino families with, 189–190, 204; local public health experts and, 192–194, 196–197; parent involvement in, 197, 201–202; racial/ethnic groups with, 193–194
Cigarette sales, to minors, 64
Circus performer, 255
Citizens Health Care Working Group, 62–63
Client councils, 171–183
COD. See Community Outreach Department
Coding, 158–159, 219, 241
Cognitive constructionism, 10–11
Cognitive demand, 236–237
Collaborations, partnership, 103
Collegiality, 195, 200
Communication: case studies as form of social, 18; dialogue and styles of, 182–184; evaluation in, 17–18; responsive, 170
Communication styles: joint action agenda in dialogue and, 183; nursing home project’s dialogue and, 182–184; storytelling in dialogue and, 182–184
Communities: needs and circumstances of local, 44, 89; outreach workers (promotoras), 194, 205, 209–210; programs affecting, 1; shared language in, 206; stakeholders invited prior to evaluation of, 90; studies of interest as issues affecting, 64–67; TDE and settings based in, 90; theory for African American schools in, 88–89, 92
Community needs assessment: evaluation design in, 200–201; evaluator/researcher in, 190; health educator conducting,
Index 279

190–191; qualitative inquiry in, 208–209; stakeholders in, 191–192; trusting working relationships in, 196
Community of interest, 192
Community Outreach Department (COD), 191, 201, 210
Community Public Relations Departments, 191
Competencies, 154; areas of, 141–142; for evaluation, 148, 150; evaluators’ distinctive features as, 162; management, 152; in professional practice, 142–144, 150–152; professional practice and evaluator, 142–144; for qualitative evaluators, 151; of qualitative research consultants’ professional, 148, 150–152; situation analysis category, 155; surveys in evaluator, 146–147; taxonomy comparisons across evaluator, 145–147, 150. See also Core competency domains; Evaluator competency taxonomies: specific competencies
Conceptual intersections, 108–110
Confidentiality, 71, 208, 237–239
Congress, 34, 57–58, 63–64, 66, 68
Congressional Research Service, 58
Consensus, 55, 149; balance of powers as reason for, 59; policy makers’ reasons for solutions by, 59–60; unsolvable problems as reason for, 59–60
Consequentialist ethical theory, 218–219, 245–246. See also Non-consequentialist ethical theory
Consultative approach, 209
Contexts: creating BTG project evaluation, 221–223; cultural, 92, 100, 111, 153; in epistemological intersections, 114–116; local, 11, 100, 109, 124, 127; participatory evaluation as specific and rich in, 115; qualitative evaluation, 37, 47–48; quality, 37; sociopolitical, 114
Contextual factors, 86–87; evaluation field and exploration of, 91, 213, 254, 256, 269; perspectives of macro and micro, 114–115, 129; qualitative approach of understanding, 84
Contextual knowledge, 269
Contingency model, 93–94
COPE self-assessment technique, 100–102
Core competency domains, 148, 151–154
Cornwall, A., 103–104
Cousins, J. Bradley, 104
Credentials, 207–208
Credibility, 62, 72, 158, 266–269
Crishna, B., 125
Critical friend, 222, 224, 229, 231, 233, 244, 246–247
Critical subjectivity, 112
Cronbach, Lee J., 3–4, 6, 80, 81
Cultural factors, 206–207
Cultural sensitivity, 195–196, 208, 233
Cultures, 213, 233; demands for design deliberations sensitive to, 82, 89; dilemma from conflicting, 214; TDE as being responsive to, 92
Curriculum development, 4–5
Cycle of quality, 254
D
Dagenais, C., 91–92
Data: analyzing study, 157–159; qualitative, 142–143, 162, 208, 267–269; staying true to, 251,
Index

See also Process data

Data analysis: in elements of quality, 270–272; practical intersections’ interpretation and, 125–126; stakeholders’ involvement in, 125–126

Data collection, 84–85, 201, 204, 206, 268–269; emergent, 101, 106, 118, 120, 122–127; findings presentation of, 205; focus groups with, 196; of Latino families, 208; limitations and complexities in, 205; methods of, 118–119; mixed-method approach of, 124; question selection in, 209–210; TDE implementation as analysis and, 90–91; verbal interactions in, 202–203

de facto Kantian principles, 244, 248n3

del Teja, I., 150
