About the Author

1 Transformations in the Fine and Speciality Chemicals Business
  1.1 Fine and Speciality Chemicals Industry Structure
    1.1.1 Global Chemical Industry Trends
      1.1.1.1 Macro Trends Shaping the Fine and Speciality Chemicals Industry
      1.1.1.2 Consolidation Continues
    1.1.2 Managing Transitions in the Fine and Speciality Chemicals Industry
      1.1.2.1 Manage Commoditization Threats
      1.1.2.2 Restructure Portfolios through Mergers and Acquisitions
      1.1.2.3 Investing in Innovative R&D Platforms
      1.1.2.4 Leveraging Emerging Technologies
      1.1.2.5 Tapping the Promise of Renewables
      1.1.2.6 Rationalization of Cost Structures
    1.1.3 Industry Shifts, Competitiveness and Markets
      1.1.3.1 Understanding Fine and Speciality Chemicals
      1.1.3.2 Shift of Manufacturing and Markets to Emerging Economies
      1.1.3.3 Market Focus on Sustainable Products
  1.2 Regulations and Fine and Speciality Chemicals Industry
    1.2.1 New Directions in Regulatory Regimes
      1.2.1.1 GHG and Water Footprint Mapping
      1.2.1.2 Impact of REACH on Fine and Speciality Chemicals Industry
  1.3 Fine and Speciality Chemicals Industry and Sustainable Practices
    1.3.1 Sustainable Value Creation in the Fine and Speciality Chemicals Industry
      1.3.1.1 New Growth Models Driven by Sustainability Forces
      1.3.1.2 Customer Drives Industrial Sustainability

Contents

2 Sustainable Management: Evolution, Transitions and Tools

2.1 Chemical Industry: Aligning with Sustainable Development Mandates
   2.1.1 Developing a Sustainable Strategy
      2.1.1.1 Defining Sustainability
      2.1.1.2 New Green Chemistry and Technology Strategies
      2.1.1.3 Sustainability Moves Beyond Manufacturing
      2.1.1.4 Managing Sustainability Initiatives

2.2 Sustainability Performance Assessment
   2.2.1 Evolution of Tools and Metrics
      2.2.1.1 Sustainable Value Creation Tools
      2.2.1.2 Sustainable Reporting
      2.2.1.3 Role of Sustainability Exchanges and Indices
      2.2.1.4 Sustainability Certifications
   2.2.2 Carbon Footprint Analysis
      2.2.2.1 Trends in CFA
      2.2.2.2 Industrial Initiatives in Lowering Carbon Footprints

2.3 Sustainability Trends in the Chemical Industry
   2.3.1 Sustainability Strategies
   2.3.2 Innovation and Sustainability
      2.3.2.1 Innovations: Commercial Developments
      2.3.2.2 Regulation Drives Innovation
      2.3.2.3 Drivers and Limiters for Innovation
   2.3.3 Sustainable Technologies: Reflections
      2.3.3.1 Contemporary Trends
      2.3.3.2 Promotional Barriers in Developing Countries
      2.3.3.3 Future Directions

References

3 Research and Technology Directions

3.1 Shifts in Fine and Speciality Chemicals Technologies
   3.1.1 Evolution of Green Chemistry and Engineering
      3.1.1.1 Emergence of a Novel Technology Pool
      3.1.1.2 GCT as a Sustainability Tool: Evolving Perceptions
      3.1.1.3 Developing Green Chemistry Tools and Metrics
   3.1.2 Strategies for Commercializing GCT Models
      3.1.2.1 Trends in Design of Greener Processes
      3.1.2.2 Advances in Novel Reaction Media
      3.1.2.3 Nonconventional Process
      3.1.2.4 New Activations
      3.1.2.5 Leveraging Green Engineering Principles
   3.1.3 Future Directions in GCT
      3.1.3.1 Policy Initiatives
      3.1.3.2 Emerging Perspectives and Future Challenges
      3.1.3.3 The Road Ahead: What Has Been Learnt?
3.2 Catalytic Technologies

3.2.1 New Catalytic Technologies Shape the Fine Chemicals Industry

3.2.1.1 Homogeneous and Heterogeneous Catalysis

3.2.1.2 Phase Transfer Catalysis

3.2.1.3 Asymmetric Catalysis

3.2.2 Biocatalysis

3.2.2.1 Advances in Biotransformations through Biocatalysis

3.2.2.2 Advances in Biocatalysis for Fine Chemicals Synthesis

3.2.2.3 Biotransformations Driven by Microbial Cells

3.2.2.4 Future Directions in Biocatalysis

3.2.3 Advances in Catalysis

3.2.3.1 Novel Catalysis

3.2.3.2 Future Directions in Catalytic Technologies for Fine Chemicals

3.3 Enabling Technologies

3.3.1 Process Intensification: Concepts and Evolution

3.3.1.1 Process Intensification: PI Equipment and PI Methodology

3.3.1.2 Enabling New Process Options

3.3.1.3 Micro Reactor Technologies (MRTs) for Fine Chemical Synthesis

3.3.2 Tools for Eco-Efficient Process Development

3.3.2.1 Reaction and Process Design

3.3.2.2 Computational Tools

3.3.2.3 Combinatorial Chemistry Tools

3.3.3 Nanotechnology

3.3.3.1 Nanotechnology: Emerging Areas

3.3.3.2 Future Directions

3.4 Product Engineering: A Key Sustainability Tool

3.4.1 Product Engineering: A Multidisciplinary Approach

3.4.1.1 Product Design in Formulated Products

3.4.1.2 New Directions in Product Engineering

3.5 Emerging Trends in Chemical Sciences and Engineering Education

3.5.1 New Directions

3.5.1.1 Context-Based Model

References

4 Resource Optimization Strategies

4.1 Resource Optimization: A Systems Approach

4.1.1 Process Integration

4.1.1.1 Heat and Mass Resource Optimization

4.1.1.2 Water Networks

4.1.2 Solvent Optimization Approaches

4.1.2.1 Solvent Optimization Tools

4.1.2.2 Advances in Solvent Recovery Systems
x Contents

4.1.3 Water Optimization Strategies 139
  4.1.3.1 Closed Loop Wastewater Recycling 139
  4.1.3.2 Complexities in Wastewater Minimization 141

4.2 Waste Valorization to High Value Chemicals 141
  4.2.1 Chemical Waste Recovery and Valorization 142
    4.2.1.1 Waste By-products to High Value Chemicals 143
    4.2.1.2 Waste Exchanges as a Route to Pollution Prevention 143
  4.2.2 Valorization of Bio-Based Organic Wastes 144
    4.2.2.1 Bio Wastes to High Value Specialities: Prospects and Challenges 144
    4.2.2.2 Biosurfactants from Wastes 145
  4.2.3 Valorization of Carbon Dioxide and Carbon Monoxide 145
    4.2.3.1 High Value Chemicals from Carbon Dioxide 146
    4.2.3.2 Novel Developments Based on Carbon Dioxide 146

5 Bio-Based Chemicals, Specialities and Polymers 153
  5.1 Towards a Bio-Based Economy 153
    5.1.1 Bio-Based Industry: Evolution and Structure 155
      5.1.1.1 Bio-Based Industry Attracts Investments 156
      5.1.1.2 Bio-Based Industry Adopts Diverse Strategies 157
      5.1.1.3 Bio-Based Markets and Trends 159
  5.2 Biorefinery and Biofeedstocks 160
    5.2.1 Biorefining Technologies 162
      5.2.1.1 Conversion Technologies 162
      5.2.1.2 Biorefineries go Commercial 163
      5.2.1.3 Future of Biorefining Technologies 164
    5.2.2 Biofeedstocks 164
      5.2.2.1 Emerging Trends in Biofeedstocks 165
    5.2.3 Platform Chemicals: Technologies at a Nascent Stage 166
      5.2.3.1 Bio-Based Products Value Chain 167
      5.2.3.2 Platform Chemicals to High End Specialities 169
      5.2.3.3 Future Research Directions 172
  5.3 Bioproducts: Moving from Laboratory to Markets 173
    5.3.1 Bio-Based Commodities 173
      5.3.1.1 1,3-Propanediol (1,3-PDO) 174
      5.3.1.2 Epichlorohydrin 174
      5.3.1.3 Propylene and Derivatives 174
      5.3.1.4 Butanol 174
      5.3.1.5 Glycerine 175
      5.3.1.6 Cellulosic Ethanol 175
      5.3.1.7 Methyl Methacrylate 175
      5.3.1.8 Isoprene 175
    5.3.2 Bio-Based Fine Chemicals 176
      5.3.2.1 Biosuccinic Acid 176
      5.3.2.2 Acrylic Acid 176

Contents

6.5.1 Sustainability Practices gain Momentum in the Personal and Home Care Sector 215
   6.5.1.1 Industry Developed Rating Standards and Indices 215
   6.5.1.2 Greener Product Innovations 216
   6.5.1.3 Shift to Natural Products 216
   6.5.1.4 Future Directions 217

6.6 Sustainable Practices in the Coatings Industry 217
   6.6.1 Transitions to Sustainable Models 217
      6.6.1.1 Innovative and Sustainable Coating Technologies 219
      6.6.1.2 Sustainable Practices at Industry Level 220
      6.6.1.3 Developments in Sustainable Coating Additives 221
      6.6.1.4 Future Directions 222

6.7 Sustainable Practices in the Adhesives and Sealants Industry 223
   6.7.1 Transformations in the Adhesives and Sealants Industry 223
      6.7.1.1 Development of Sustainable Adhesives and Sealants 223
      6.7.1.2 Commercial Developments 224
      6.7.1.3 Future Directions 225

6.8 Sustainable Practices in the Lubricant and Greases Industry 226
   6.8.1 Emergence of New Generation Lubricants 227
      6.8.1.1 Biolubricants: Market Trends 227
      6.8.1.2 Biodegradable Lubricants: Trends 228
      6.8.1.3 Product Certifications 229
      6.8.1.4 Future Directions 229

6.9 Sustainability Practices in the Colourants Industry 230
   6.9.1 Evolution of the Colourants Industry 230
      6.9.1.1 Emergence of Hi-Tech Colourants 231
      6.9.1.2 Industry Initiatives Address EHS Concerns 232
      6.9.1.3 Transitions to Sustainable Practices 232
      6.9.1.4 Future Directions 237

7 Sustainable Value Creation Strategies 245
   7.1 Why Sustainable Value Creation? 245
      7.1.1 Evolving a Strategy for Sustainable Value Creation 245
         7.1.1.1 Value Creation Initiatives 246
         7.1.1.2 Approach to Create Sustainable Value 247
         7.1.1.3 Strategic and Operational Approaches 248
      7.1.2 Innovating for Sustainable Value Creation 249
         7.2.1 Innovation in Practice 249
            7.2.1.1 Capturing Value Through Innovations 251
            7.2.1.2 New business models 253
            7.2.1.3 Collaborative Innovation 254
         7.2.2 Innovation in Technology, Feedstocks and Materials 255
            7.2.2.1 Technology 255
            7.2.2.2 Feedstocks 255
            7.2.2.3 Materials 256
7.2.3 Innovation in Supply Chains 256
  7.2.3.1 Chemical Management Systems 256
  7.2.3.2 Chemical Servicing 257
  7.2.3.3 Chemical Leasing 257
7.3 Strategic Cost Management 257
  7.3.1 Strategic Cost Management: A Key Tool 258
    7.3.1.1 Green Chemistry and Technology Tools 259
    7.3.1.2 Cluster Models: A Key to Sustainable Manufacturing 259
    7.3.1.3 New Operating Models 260
    7.3.1.4 Product Portfolio Rationalization 261
7.4 Prognosis for the Future 261
  7.4.1 Moving up the Value Chain 261
    7.4.1.1 Managing Sustainability Goals 262
    7.4.1.2 Innovation to Markets 263
  7.4.2 Emerging Perspectives in Sustainable Technologies 264
    7.4.2.1 Technology Transfer 264
    7.4.2.2 Technology Strategy 265
    7.4.2.3 Human Resources Development: Shifting Focus 266
7.4.3 Game Changers in the Industry 266
  7.4.3.1 Game Changing Technologies 267
  7.4.3.2 Power of the Consumer 268
