## Contents

**Preface** ix  

1 **Introduction** 1  
   1.1 Social dilemmas and social networks 1  
      1.1.1 Cooperation and social networks 4  
      1.1.2 Coordination and social networks 5  
   1.2 Dynamic networks, co-evolution, and research questions 6  
   1.3 Social networks and social dilemmas between sociology and economics 9  
   1.4 Approach: Models, simulation, and empirical tests 10  
      1.4.1 Theoretical models 13  
      1.4.2 Empirical approach 14  
   1.5 Description of the remaining chapters 15  
   References 17  

2 **Consent or conflict: Co-evolution of coordination and networks** 23  
   2.1 Introduction 23  
      2.1.1 Polarization, conflict, and coordination 24  
      2.1.2 Coordination and social networks 26  
   2.2 The model 28  
   2.3 Stable states 29  
   2.4 Simulation design 32  
   2.5 Simulation results 35  
      2.5.1 Predicting stable states I: Polarization 36  
      2.5.2 Predicting stable states II: Efficiency 39  
   2.6 Conclusions and discussion 41  
   References 42  

3 **Cooperation and reputation in dynamic networks** 47  
   3.1 Introduction 47  
      3.1.1 Cooperation and network effects 48  
      3.1.2 The case for network dynamics 49  
      3.1.3 Learning in networks 50  
      3.1.4 Related theoretical literature 51
vi CONTENTS

3.2 The model
  3.2.1 Formalization of the problem
  3.2.2 Individual strategies
  3.2.3 Reputation
  3.2.4 Network decisions
  3.2.5 Convergence

3.3 Analysis of the model
  3.3.1 Dynamics of behavior with two actors
  3.3.2 Stable states in fixed networks
  3.3.3 Stable states in dynamic networks

3.4 Setup of the simulation
  3.4.1 Dependent variables
  3.4.2 Parameters of the simulation
  3.4.3 Initial conditions of the simulation
  3.4.4 Convergence of the simulation

3.5 Simulation results
  3.5.1 Results for fixed networks
  3.5.2 Results for dynamic networks

3.6 Conclusions and discussion

References

4 Co-evolution of conventions and networks: An experimental study 81

4.1 Introduction
  4.1.1 Coordination, conventions, and networks
  4.1.2 An experimental approach

4.2 Model and simulation
  4.2.1 The model
  4.2.2 Analytic results
  4.2.3 Simulation
  4.2.4 Overview of micro-level and macro-level hypotheses

4.3 Experimental design

4.4 Results
  4.4.1 Macro-level results
  4.4.2 Individual behavior I: Decisions in the coordination game
  4.4.3 Individual behavior II: Linking decisions

4.5 Conclusions and discussion

References

5 Alcohol use among adolescents as a coordination problem in a
dynamic network 113

5.1 Introduction
  5.1.1 Coordination, influence, and alcohol use
  5.1.2 Approaches to the study of selection and influence

5.2 Predictions

5.3 Data
