# Table of Contents

Preface ix  
Original Preface from Jack Gibson xiii  
Acknowledgments xv  
About the Companion Website xvii  

## Part One: Primer  

### 1. Introduction 3  
1.1 What is a System? 4  
1.2 Terminology Confusion 6  
1.3 Systems Analysis Equals Operations Research Plus Policy Analysis 10  
1.4 Attributes of Large-Scale Systems 11  
1.5 Transportation Systems: An Example of a Large-Scale System 13  
1.6 Systems Integration 16  
1.7 What Makes a “Systems Analysis” Different? 17  
1.8 Distant Roots of Systems Analysis 19  
1.9 Immediate Precursors to Systems Analysis 20  
1.10 Development of Systems Analysis as a Distinct Discipline: The Influence of RAND 23  
References 26  

### 2. Six Major Phases of Systems Analysis 28  
2.1 The Systems Analysis Method: Six Major Phases 28  
2.1.1 Determine Goals 28  
2.1.2 Establish Criteria for Ranking Alternative Candidates 30  
2.1.3 Develop Alternative Solutions 31  
2.1.4 Rank Alternatives 32  
2.1.5 Iterate 34  
2.1.6 Action 35  
2.2 The Goal-Centered or Top-Down Approach 35  
2.3 The Index of Performance Concept 41  
2.4 Developing Alternative Scenarios 45  

COPYRIGHTED MATERIAL
2.5 Ranking Alternatives 47
2.6 Iteration and the “Error-Embracing” Approach 47
2.7 The Action Phase: The Life Cycle of a System 51
References 53

3. Goal Development 55
3.1 Seven Steps in Goal Development 55
3.2 On Generalizing the Question 59
3.3 The Descriptive Scenario 61
3.4 The Normative Scenario 63
3.5 The Axiological Component 63
3.6 Developing an Objectives Tree 67
3.7 Validate 73
3.8 Iterate 74
References 75

4. The Index of Performance 76
4.1 Introduction 76
4.2 Desirable Characteristics for an Index of Performance 78
4.3 Economic Criteria 81
4.4 Four Common Criteria of Economic Efficiency 83
4.5 Is There a Problem with Multiple Criteria? 86
4.6 What is Wrong with the B–C Ratio? 90
4.7 Can IRR be Fixed? 92
4.8 Expected Monetary Value 94
4.9 Nonmonetary Performance Indices 96
References 99

5. Develop and Evaluate Alternative Candidate Solutions 101
5.1 Introduction 101
5.2 The Classical Approach to Creativity 101
5.3 Concepts in Creativity 103
5.4 Brainstorming 104
5.5 Brainwriting 107
5.6 Dynamic Confrontation 109
5.7 Zwicky’s Morphological Box 110
5.8 The Options Field/Options Profile Approach 112
5.9 Computer Creativity 115
5.10 Trade Study Methods 116
5.11 Trade Study Example 120
References 127

6. The 10 Golden Rules of Systems Analysis 130
6.1 Introduction 130
6.2 Rule 1: There Always is a Client 131
6.3 Rule 2: Your Client Does Not Understand His Own Problem 132
6.4 Rule 3: The Original Problem Statement is too Specific: You Must Generalize the Problem to Give it Contextual Integrity 133
6.5 Rule 4: The Client Does Not Understand the Concept of the Index of Performance 135
6.6 Rule 5: You are the Analyst, Not the Decision Maker 137
6.7 Rule 6: Meet the Time Deadline and the Cost Budget 139
6.8 Rule 7: Take a Goal-Centered Approach to the Problem, not a Technology-Centered or Chronological Approach 140
6.9 Rule 8: Non-users Must Be Considered in the Analysis and in the Final Recommendations 141
6.10 Rule 9: The Universal Computer Model is a Fantasy 143
6.11 Rule 10: The Role of Decision Maker in Public Systems is Often a Confused One 143
References 145

Part Two: Casebook

Cases in Systems Engineering 149

Introduction 149
The Case Study Method 151
What is a “Case”? 152
Implementing the Case Study Method 152
Chat Rooms and Polls 152
In-Class Group Activities 153
Case Study Assignments 153
Peer Review 154
The Case Studies 154
Using Case Studies to Build Teamwork and Communications Skills 154
Building the Systems Team 155
Tips on Managing the Team 156
How to Make an Effective Oral Presentation 157
How to Write a Report 162
Aligning Case Studies with the Ten Golden Rules of Systems Analysis 164
To Winnebago or to not Winnebago? 164
How can this Case be Used to Teach and Reinforce Systems Analysis? 169
A Word about the Cases 170
Validation of Learning: Evidence-Based Learning 170
Sample Evaluation Instrument: Exam with Solutions 171
Sample Evaluation Instrument: Exam without Solutions 176

Case 1: Great Buys 183

Case 2: Surf’s Up? 188
