There Always is a Client 131, 164
Your Client Does Not Understand His Own Problem 132–133, 164–165
The Original Problem Statement is Too Specific: You Must Generalize the Problem to Give it Contextual Integrity 133–135, 165–166
The Client Does Not Understand the Concept of the Index of Performance 135–137, 166–167
Ten Golden Rules of Systems Analysis 
(continued)

You Are the Analyst, Not the Decision Maker 137–139, 167
Meet the Time Deadline and the Cost Budget 139–140, 167
Take a Goal-Centered Approach to the Problem, Not a Technology-Centered or Chronological Approach 140–141, 167–168
Non-Users Must be Considered in the Analysis and in the Final Recommendations 141–142, 168
The Universal Computer Model is a Fantasy 143, 168
The Role of Decision Maker in Public Systems is Often a Confused One 143–145, 168–169
