Contents

Preface to the Third Edition ix

1 Science and Religion: Exploring a Relationship 1
   Why Study Science and Religion? 2
   The Chessboard: The Diversity of Science and Religion 5
   Ian Barbour’s Four Models of the Relation of Science and Religion 7
      Conflict 8
      Independence 9
      Dialogue 10
      Integration 11
   Four Ways of Imagining the Relation of Science and Religion 13
      Science and Religion Offer Distinct Perspectives on Reality 13
      Science and Religion Engage Distinct Levels of Reality 14
      Science and Religion Offer Distinct Maps of Reality 15
      The Two Books: Two Complementary Approaches to Reality 15

2 Getting Started: Some Historical Landmarks 19
   Why Study History? 20
   Inventing the ‘Warfare’ of Science and Religion 21
   The ‘Essentialist Fallacy’ about Science and Religion 24
## Contents

- Dispelling Myths about Science and Religion 25
- The Importance of Biblical Interpretation 28
- The Emergence of the Medieval Synthesis 29
- Copernicus, Galileo, and the Solar System 31
- Newton, the Mechanical Universe, and Deism 38
- Darwin and the Biological Origins of Humanity 43
- The ‘Big Bang’: New Insights into the Origins of the Universe 50

### 3 Religion and the Philosophy of Science 57

- Fact and Fiction: Realism and Instrumentalism 58
  - Realism 59
  - Idealism 61
  - Instrumentalism 62
  - Theology and Debates about Realism 64

- Explanation, Ontology, and Epistemology: Research Methods and the Investigation of Reality 65
  - A Case Study in Explanation: Nancey Murphy on ‘Non-Reductive Physicalism’ 68
  - What Does it Mean to Explain Something? 70
  - Ontic and Epistemic Approaches to Explanation 71
  - Religion and Explanation 73
  - Philip Clayton on Explanation in Religion 75
  - How Do We Decide What is the Best Explanation? 76
  - ‘Logic of Discovery’ and ‘Logic of Justification’ 77
  - Inference to the Best Explanation 79
  - A Case Study: Darwin and Natural Selection 81
  - Theory Choice and Religion 82
  - Verification: Logical Positivism 84
  - Falsification: Karl Popper 86
  - Theory Change in Science: Thomas S. Kuhn 89

### 4 Science and the Philosophy of Religion 95

- Science, Religion, and Proofs for God’s Existence 96
- Traditional Philosophical Arguments for the Existence of God 98
  - Thomas Aquinas’s Five Ways 99
  - The Kalam Argument 102
  - A Case Study: William Paley’s Biological Argument from Design 103
- The Ambiguity of ‘Proof’: Justification in Science and Theology 108
God’s Action in the World
   Deism: God Acts Through the Laws of Nature 112
   Thomism: God Acts Through Secondary Causes 114
   Quantum Theory: God Acts Through Indeterminacy 118
Miracles and the Laws of Nature
   David Hume’s Critique of Miracles 121
   Keith Ward on Miracles 123
   Wolfhart Pannenberg on Miracles 124
Natural Atheology? Evolutionary Debunking Arguments against God 125
Natural Theology: Is God the ‘Best Explanation’ of our Universe? 128
   A Metaquestion: Creation and the Uniformity of Nature 133

5 Models and Analogies in Science and Religion 143
The Use of Models in the Natural Sciences 145
   The Kinetic Model of Gases 148
   Complementarity: Light as Wave and Particle 151
   Analogical Reasoning: Galileo and the Mountains of the Moon 153
Using Scientific Models Critically: Darwin’s Principle of Natural Selection 155
The Use of Models and Metaphors in Christian Theology 158
   Thomas Aquinas on the Analogia Entis (‘Analogy of Being’) 159
   Ian T. Ramsey on the Model of the Divine Economy 160
   Arthur Peacocke on the Theological Application of Models and Analogies 162
Sallie McFague on Metaphors in Theology 163
Using Religious Models Critically: Creation 164
   Using Religious Models Critically: Theories of the Atonement 167
Models and Mystery: The Limits of Representation of Reality 169
Ian Barbour on Models in Science and Religion 173

6 Science and Religion: Some Major Contemporary Debates 179
Moral Philosophy: Can the Natural Sciences establish Moral Values? 179
   Evolution and Ethics: The Debate about Darwinism and Morality 180
   Neuroscience and Ethics: Sam Harris on the Moral Landscape 182
Philosophy of Science: Is Reality Limited to What the Sciences Can Disclose? 185
Philosophy of Religion: Theodicy in a Darwinian World 189
Theology: Transhumanism, the ‘Image of God’, and Human Identity 192
Mathematics: Science and the Language of God 196
Physics: Does the ‘Anthropic Principle’ have Religious Significance? 199
Contents

Evolutionary Biology: Can we speak of ‘Design’ in Nature? 203
The Psychology of Religion: What is Religion All About? 207
Conclusion 218
