# CONTENTS

**Preface**

**Contributors**

1. **Modeling the Vascular System and Its Capillary Networks**
   Thomas H. Dawson

2. **Wall Shear Stress in the Arterial System In Vivo: Assessment, Results, and Comparison with Theory**
   Robert S. Reneman, Theo Arts, and Arnold P. G. Hoeks

3. **Relating Cerebral Aneurysm Hemodynamics and Clinical Events**
   Juan R. Cebral and Christopher M. Putman

4. **Prognostic Significance of Aortic Pulse-Wave Velocity**
   Tine Willum Hansen, Jørgen Jeppesen, and Christian Torp-Pedersen

5. **Closed-Loop Modeling of the Circulatory System**
   Carol L. Lucas, Randal Cole, and Ajit Yoganathan

6. **Artery Wall Mechanics Determined by Ultrasound**
   Arnold P. G. Hoeks, Evelien Hermeling, and Robert S. Reneman

7. **Plaque Mechanics**
   Zhi-Yong Li

8. **The Pressure Gradient at Arterial Stenoses: Towards a Noninvasive Measurement**
   Peter J. Yim

9. **Measurement of Blood Flow with Phase Contrast Magnetic Resonance Imaging**
   Reza Nezafat and Richard B. Thompson
10. Measuring Cerebral Perfusion Using Magnetic Resonance Imaging  245
    Fernando Calamante

11. Cerebral Perfusion Computed Tomography in Stroke  273
    Max Wintermark

12. Cerebrovascular Reactivity Changes in Symptomatic Carotid Stenosis  285
    Natan M. Bornstein and Alexander Y. Gur

13. Essential Hypertension, Cerebrovascular Reactivity, and Risk of Stroke  299
    Cristina Sierra

Index  315
