Index

A
abdominocentesis, 177–181
complications, 177
equipment for, 177, 178
procedure, 178–181
purpose, 177
restraint and positioning, 178
abscess formation, at catheter
insertion site, 463
acepromazine, 113, 114–115, 343, 359, 500
agalactia, 402
allantoic fluid, transrectal
imaging of, 375
allantoic maximum depth
(AllMD), 380
AllMD, see allantoic maximum
depth
alpha-2 agonists, 113, 116–117, 337
alpha-2 antagonist, 113, 117
amnion staining, 397
amniotic fluid, transrectal
imaging of, 375
amniotic maximum depth
(AmnMD), 380
amniotic plaques, 400
anesthesia, epidural
complications, 595
equipment required, 595–596
procedure, 598–608
purpose, 595
restraint and positioning, 598
arterial blood collection, 67, 445
arteries commonly used
brachial artery, 67, 68
common carotid artery, 67, 68
dorsal metatarsal artery, 67, 68
facial artery, 67, 68
transverse facial artery, 67, 68
choice of arteriopuncture
site, 68
complications
contamination and infection, 68
hematoma, 68
hemorrhage, 68
inability to obtain sample, 69
trauma and laceration of
artery, 68
equipment for, 69
procedure, 69–71, 445–447
purposes, 67
restraint and positioning, 69
arterial blood gas (ABG)
analysis, 445
arterial blood pressure
measurement, in
neonatal foal
complications, 429
equipment required, 429
procedure
direct measurement, 430–431
indirect measurement, 429–430
purpose, 429
restraint/positioning, 429–430
arterial blood sampling, in
neonatal foal, 445–447
complications, 445
equipment required, 445
procedure, arterial blood
sampling, 446–447
purpose, 445
restraint/positioning, 446
arterial carbon dioxide tension
(PaCO₂), 445
arterial oxygen tension, 445
arteriopuncture, 67, see also
arterial blood collection
arthrocentesis and
intraarticular analgesia/
anesthesia, 282–292
approach for specific joints, 283–284
complications, 282
equipment for, 282, 283
general preparations, 285–286
injection of anesthetics in
specific joints
distal interphalangeal joint, 287, 289
distal intertarsal joint, 288, 291
femoropatellar joint, 288, 292
lateral femorotibial joint, 289, 292
medial femorotibial joint, 289, 292
metacarpo/
metatarsophalangeal
joint, 287, 290
middle carpal and
radiocarpal joints, 288, 291
navicular bursa, 287, 289
proximal interphalangeal
joint, 287, 290
tarsocrural joint, 288, 291
tarsometatarsal joint, 288, 291
purpose, 282
restraint, 285
arthrocentesis and joint
lavage, in neonatal foal, 488–492
complications, 488
equipment required, 488–489
arthrocentesis (continued)
  procedure
  arthrocentesis, 489–491
  joint lavage, 492
  purpose, 488
  restraint/positioning, 489
  stall side tests, 489, 491
  swollen carpal joint and, 488
  synovial fluid, collection of, 488
artificial insemination, see insemination, artificial
aseptic technique, 123–125
  complications, 123
  equipment for, 123
  procedure, 123–125
  purpose, 123
  restraint and positioning, 123
Aspergillus fumigatus, placenta 397
atipamezol, 113, 117
atlanto-occipital (AO) space
  CSF collection from, 457, 458
  location of, 458, 459
atropine, resuscitation drugs, 439
axial musculoskeletal system, of neonates evaluation, 419
B
bacterial cystitis, 504
bacterial pathogens, retrieval of, 225
BAL, see bronchoalveolar lavage
bandage, over catheter site, 471
BBL™ Port-A-Cul™ tubes, 348
benzodiazepines, administration of, 114, 119–121
bicipital tendonitis, 264, 267
biparietal diameter (BPD), 371, 373, 375
bitch catheter, for abdominocentesis, 178
blind wolf tooth extraction, 159–160
blood culture, 448, 450
blood pressure, measurement, 429–430
  indirect monitor, 431
  placement of cuff on tail, 431
body condition score (BCS), estimation of, 31, 41, 42, 43
body weight (BW), estimation of, 30, 40, 41
bone insertion device, 472
bone marrow aspiration complications, 627
  equipment required, 627
  procedure, 628–631
  purpose, 627
  restraint, 628
BPD, see biparietal diameter
  brachial artery, 67, 68
  breech, posterior presentation, 394
breeding soundness examination, in mare
  relevant history, 345
  systematic approach, 343–358
breeding soundness examination, in stallion
  systematic approach, 335–342
bronchoalveolar lavage (BAL), 247–254
  complications, 247
  equipment for, 247
  purpose, 247
  restraint, 248
via catheter, 248–251
via endoscopy, 251–253
brushing/grooming, in dermatologic evaluation
  equipment required, 553
  procedure, 554
  purpose, 553
  Buccal luxation, 169–171
Burn’s technique, 402, 405
butorphanol, 114, 117, 121
capillary refill time (CRT), 29, 34, 401
caps (deciduous tooth), 160, 161, see also deciduous tooth extraction
cardiopulmonary cerebral resuscitation (CPCR), 438
  complications, 438
  equipment required, 438–439
procedure
discontinuation, 444
impending cardiopulmonary failure, recognition/monitoring of, 440
resuscitation procedures, ABC sequence of, 441–444
  purpose, 438
  restraint/positioning, 440
CASA, See computerized automated semen analyzers
Caslick’s suture, placement of complications, 365
  equipment required, 365
  procedure, 366–369
  purpose, 365
  restraint/positioning, 365
  cast application, 325–332
  complications, 325
  equipment for, 325, 326
  procedure, 327–332
  purpose, 325
  restraint and positioning, 326
cecal trocharization, see percutaneous cecal trocharization
cecum tympany, 187, 188, see also percutaneous cecal trocharization
cellophane tape preparation, in dermatologic evaluation, 556
  equipment required, 556
  procedure, 556
  purpose, 556
central nervous system (CNS), 379
central venous catheter, 432
central venous pressure (CVP)
  complications, 432
  equipment required, 432
  measurement, in neonatal foal, 432
  procedure
with electronic blood pressure transducer, 434–435
  preparation, 433
with water manometer, 433–434
  restraint/positioning, 432
cephalic vein, 59, 60
blood collection from, 62–65, 449, 450
for IV injection, 77
cerebrospinal fluid (CSF) collection, in neonatal foal, 457–460
complications, 457
equipment required, 457
procedure, collection, 458
purpose, 457
restraint/positioning, 457
palpation of LS space, 460
spinal needle, 460
cervical defects/lacerations, 405, 408
cervical lacerations, 404
cervix, cyclical changes, 357
Chambers catheter, 241, 243
chemical restraint, 111–121
acepromazine, administration of, 114–115
alpha-2 agonists, administration of, 116–117
benzodiazepines, administration of, 119–121
complications, 111
considerations before sedation or tranquilization, 111–112
drugs, doses, and route of administration, 113–114
equipment for, 112
estimation of weight of horse, 113, 114
opioids, administration of, 117–119
purpose, 111
restraint and positioning, 112–113
Chinese finger trap suture, 455
chorioallantoic pouches, 400
chorioallantoic vesicles, 398, 400
cleaning of perineal area, 355, 363, 368, 506
cleaning of penis glans, 502
clenbuterol hydrochloride, injectable tocolytic agents, 385
clitoral area, perform clitoral swabbing, 353
CNS, see central nervous system
CO₂ detectors, 441, 443
colic signs in parturition, 388
combined thickness of the uterus and placenta (CTUP), 371, 372, 373, 376
common carotid artery, 67, 68
computerized automated semen analyzers (CASA), 337
conchofrontal sinus, landmarks for, 205
conjunctival cytology complications, 533
equipment required, 533
procedure, 533
purpose, 533
restraint and positioning, 533
cotton pledget, perineal area, 355, 363, 368, 502, 506
CPCR, see cardiopulmonary cerebral resuscitation
cranial nerve examination, procedure, 586–592
crusting dermatitis, 560
CTUP, see combined thickness of the uterus and placenta
CVP, see central venous pressure
D
daily sperm output (DSO), 340
deciduous tooth extraction criteria for removal, 160, 161
instruments for, 161
premature, complications of, 160, 162
procedure, 160–162
delivery, normal/abnormal stage, 392
dental chart, 154
dental malocclusions, 133, 140
dental procedures, 153–171
blind wolf tooth/unerupted premolar 1 extraction, 159–160
buccal luxation and tooth avulsion of incisors, 169–171
complications, 153
deciduous tooth extraction, 160–162
endodontic disease, management of, 168–169
equipment for, 153
fractured teeth, management of, 162–165
occlusal adjustment, 153–156
periodontal disease, management of, 165–168
purpose, 153
restraint and positioning, 153
wolf tooth/first premolar extraction, 157–158
Dermatophilus congolensis, 562
dermatophilus preparation complications, 563
equipment required, 563
procedure, 564–565
purpose, 562
detomidine, 113, 116, 118, 119, 343, 359, 365, 500
dexmedetomidine, 113, 116
diastema, 134, 142
diazepam, 114, 119, 121
distal front limbs, obstetric strap/chain placed on dorsal part, 392
distal interphalangeal joint, 283, 287, 289
distal intertarsal joint, 284, 288, 291
dorsal metatarsal artery, 67, 447
dorso sacral position of fetus, 393
draining tracts, 132, 139
dysphagia in neonatal foal, 419
dystocia, 390–394
dog-sitting posture, in dystocia 393
dorsal metatarsal artery, 67, 447
dorso sacral position of fetus, 393
draining tracts, 132, 139
dysphagia in neonatal foal, 419
dystocia, 390–394
ear hold, 12
ejaculation, 337
electrocardiography, in neonatal foal complications, 427
equipment required, 427
procedure, base-apex lead, 427–428
purpose, 427
restraint/positioning, 427
endodontic exam 135
endodontic disease,
management of, 168–169
endodontic status, examination
of, 135, 143–144
endometrial biopsy, schematic
drawing, 357
endometrial culture collection, 348
endometrial cytology, 348
findings, 357
sample collection,
instrument, 356
endometrial swabs, instrument
for collection, 356
endotracheal tube, self-inflating
resuscitation bag,
442, see nasotracheal
intubation, 234–237
tube sizes, 234
enema administration, in
neonatal foal
complications, 485
equipment required, 485
retention enema, 485
single enema, 485
procedure, 486–487
purposes, 485
restraint/positioning, 486
soapy water, 486, 487
enterocentesis, in
abdominocentesis, 177
entropion, 418
eosin-nigrosin smear to
determine live and dead
sperm, 339
epinephrine, resuscitation
drugs, 439
equine field anesthesia
complications, 611
equipment required, 611–612
procedure, 612–624
purpose, 609
restraint and positioning, 612
equine ocular examination,
513–521
complications, 513
equipment required, 513
purpose, 513
restraint and positioning, 513
equine restraint techniques
5–26
equine restraint and training
system (Stableizer®), 17
Escherichia coli placentitis, 397
esmarch bandage, 293, 493
esophagoscopy, see
gastroscopy and
esophagoscopy
estrus
ovary, ultrasonographic
image of, 354
reproductively intact mare,
340
stage of, 354
euthanasia, 647–650
complications, 647
equipment, 648
methods, 647
procedure, 649
purpose, 647
restraint and positioning, 649
evacuated tubes, for venous
blood collection, 60, 61
extended hindlimbs fetal
position, 393
eye depth (eyeD), 373, 375
eye volume (eye V), fetus, 371,
373
eye length (eyeL), fetus, 373, 375
extraoral exam, 132
F
facial artery, 67, 68
facial swelling, 132, 139
facial wounds, 133
feeding tube, radiographic
confirmation, 483
femoropatellar joint, 284,
288, 292
femur length (femurL) of fetus,
380
fetal aorta, 381
fetal aortic diameter (aortD),
379
fetal bradychardia, 379
fetal cranium, cross-sectional
view of, 375
fetal eye, cross-section of, 375
fetal eye depth (eyeD), 373, 375
fetal eye volume (eyeV), 371, 373
fetal eye length (eyeL), 373, 375
fetal femur length (femurL), 380
fetal fluids
echogenicity, 380
transabdominal
ultrasonographic
image, 382
fetal heart
M-mode image, 381
rate, 379
fetal presentation, position and
posture 390–394
fetal tachycardia, 379
fetoplacental unit, 378
fetus
delivery of, 389
first premolar (P1) teeth, see
wolf tooth extraction
fistula, rectovaginal, 403
flumazenil, 120
fluorescein stain—wet, 532
foal
alert system, 388
arterial blood sampling
445–447
arterial blood collection
from dorsal metatarsal
artery, 445–447
arterial blood pressure
429–431
arthrocentesis and joint
lavage, 489–492
brachial artery, location of,
447
cardiopulmonary cerebral
resuscitation 438
cardiopulmonary failure 440
chest compressions, 443
circulatory support 442–443
central venous pressure 432
cerebral spinal fluid collection
457
catheters for urinary
placement, 452
chest compressions in
resuscitation, 443
ECG, neonatal foal, 427–429
endotracheal intubation
(establish airway)
441–442
folding, restraint of neonatal
foal 413
heart rate, 444
intravenous catheter
placement, 463–471
over-the wire, 467–470
over-the needle, 466–467
intraosseous needle placement,
472–475
nasogastric intubation,
nasal oxygen insufflation, 476–479
physical examination, 416–426
axial musculoskeletal system, 419
angular limb deformity, 419, 421
flexural limb deformity, 419, 421
cardiac auscultation, 419–420, 425–426
carpus valgus, 422
murmurs, 420, 425–426
ophthalmic evaluation, 418
respiratory system, evaluation, 419
size, signs of prematurity, 417, 421
stance, evaluation, 421
pulse oxymeter, 436–438
umbilicus, evaluation, 418
urogenital examination, 418
vital values, heart rate, 417
respiratory rate 417
temperature 417
regional limb perfusion, adult horses, 293–297
neonatal foal, 493–495
restraining physical, 411–415
resuscitation drugs and doses 439
spine deformations, 422
stance, evaluation, 421
urinary catheterization, 452–456
venous blood sampling, 448–451
Foley® catheter, enema in neonatal foal, 485, 487
urinary catheterization, adult mare, 503, 507
urinary catheterization, filly, 456
foot conformation and balance, examination of, 305–312
abnormal hoof–pastern axis, 309, 310
bottom of foot, inspection of, 311
equipment for, 305, 306
excessive toe length, 309
flexural deformities of distal interphalangeal joint, 309
foot balance, evaluation of, 310
hoof angulation of rear foot, 309
hoof observation, 308
hoof–pastern axis, assessment of, 309
procedure, 306–312
purpose, 305
related terminology, 305
restraint and positioning, 305–306
solar surface and fit of shoe, 312
foot nape posture dystocia, 393
forelimb
incomplete extension of dystocia, 393
left, extended anterior presentation, dystocia, 394
fractured teeth, 162
classification of tooth fracture, 164, 165
complicated crown root fracture, 162, 164, 165
inflammatory root resorption, 162, 163
management of, 162–165
periapical lucency, 162, 163
periodontal ligament space, widening of, 162, 163
pulp horn explorer, use of, 162, 163
root fracture, 162, 164, 165
uncomplicated crown root fracture, 162, 164, 165
front foot, lifting and holding of, restraint 21–22
front leg, lifting and holding of, restraint 24–25
gastric ulcers, 198, 199, see also gastroscopy and esophagoscopy
gastrointestinal pathologies, 401
gastrointestinal system, evaluation of, 420
gastroscopy and esophagoscopy, 195–200
complications, 195
equipment for, 195
air compressor, 195, 196
drains, 195, 196
procedure, 195, 196
video monitor, 195, 196
purpose, 195
restraint and positioning, 196
general anesthesia, 197
standing sedation, 196
gingivitis, 165, see also periodontal disease (PD)
glans penis, urethral opening, 342
guttural pouch(es), 210, 212, 216
empyema, 238, 244
drains, 238
procedure, 238
equipment for, 238
indwelling tube placement, 245
normal guttural pouch, 243
purpose, 237
restraint and positioning, 239
structures within guttural pouch, 238
stylohyoid bone, thickening of, 243
vascular and neural structures visible on endoscopy, 242
mycosis, 237
Halter placement, 5–8
approaching the horse, 6
equipment for, 5, 6
halter selection, 6
halter with jaw snap, 6, 7
lead rope around neck, 6, 7
purpose of, 5
sliding halter over nose without rope around neck, 6, 8
head lowering effect, by
alpha-2 agonists, 118
heart, evaluation of, adult
horse 50–53
neonate 419
heart murmurs, identification

securing of, 106–107
subcutaneous anesthesia, 97, 99
through-the-needle intravenous catheter, insertion of, 105–106
types of, 96
intravenous (IV) injection, see also injection
needle size for, 76
procedure, 75–79
sites commonly used for, 77
intravenous regional limb perfusion (IVRLP), 293–297
antimicrobial drugs in, use of, 294
complications, 293
of distal limb, procedure for, 295–297
equipment for, 293–294
guidelines for performing of, 297
purpose, 293
restraint and positioning, 293
isoxuprine, injectable tocolytic agents, 385
IVRLP, see intravenous regional limb perfusion
K
Kangaroo bag, 482
Kendal nose twitch, 18–20
Klebsiella pneumoniae, placentitis, 397
L
lactated ringer’s solution (resuscitation drug), 438
lameness examination, 263–272
American Association of Equine Practitioners grading scheme for lamenesses, 263
carpal flexion, 266, 271
distal forelimb flexion, 265, 271
distal rearlimb flexion, 266, 271
equipment for, 263
femoropatellar effusion, assessment for, 265, 268
forelimb flexor tendons, palpation of, 264, 267
hoof testers, application of, 265, 269
horse in motion, observation of, 265, 270
inspection of foot, 265, 268
perineural/intraarticular anesthesia, 266
procedure, 264–272
proximal forelimb suspensory, palpation of, 264, 267
purpose, 263
restraint and positioning, 263
scapulohumeral joint or triceps pain, evaluation for, 264, 267
spavin flexion, 266, 272
tarsocrural joint, palpation of, 265, 268
lateral cervical muscles, for IM injection, 80, 82
quick-release knot, use of, 8, 9
releasing of quick-release knot, 8, 9
Leptospira pneumonia, placentitis, 397
lidocaine, resuscitation drugs, 439
limb bandages and splints, 313–324
bandage materials, 313
carpal bandage, 316–318
complications, 313
distal limb support bandage, 321
equipment for, 313
foot bandage, 319–321
forelimb stack bandage, 322
full-limb splint, 323–324
half-limb splint, 322–323
hock bandage, 318–319
lower limb wound bandage, 314–316
purpose, 313
restraint and positioning, 314
lip chain, 12–14
equipment for, 12
placement of, 13–14
around nose band, 13, 14
over bridge of nose, 13, 14
purpose of, 12
lip rope, 15–16
and caution, 16
equipment for, 15
modified, 17
placement, 15–16
purpose of, 15
lip twitch, 18–19
equipment for, 18
purpose of, 18
use of, 18, 19
lubrication, 384, 441
lumbosacral (LS) space, CSF collection from, 458–460
M
mammary glands, ventral abdomen, 385–388, 402
mandibular prognathia, relative, 133, 140
manual ear twitch, see ear hold
mare
  breeding soundness examination, 344–358
  purpose, 343
  restraint/positioning, 343
  delivery, (see foaling), 388–391
  intervention, 388–389
  monitoring, 385–388
  stage I, 388–389
  stage II, 389–390
  stage III, 391
dystocia, 391–394
impending parturition, 384–388
perineum, 368
pregnant mare, evaluation, 370–383
rectal tears, 182, 343, 395
post-parturient (see post-parturient mare)
pregnant (see pregnant mare)
maxillary nerve block, 146
  complications, 146
  procedure, 149
maxillary prognathia, relative, 133, 140
maxillary sinus, landmarks for, 205
meconium impaction, 485
medetomidine, 113, 116
medial femorotibial joint, 284, 289, 292
medication administration
  injectable formulation (see injection)
  intra-rectal, 92–95 (see also intra-rectal medication administration)
oral, 88–92 (see also oral medication administration)
medication halters, 88
mental nerve block, 146
  complications, 146
  procedure, 150
metacarpophalangeal/
  metatarsophalangeal joint, 284, 287, 290
methadone, 114, 117
midazolam, 114, 119
middle carpal and radiocarpal joints, 284, 288, 290, 291
morphine, 114, 117
mucopurulent vaginal discharge, 370
mucous membranes, evaluation, 48, 423
murmurs (neonatal foals), 420
murmurs, in horse, 36
  intensity of, 36, 51
  timing of, 36, 51
  types of, 52
muscle biopsy specimen, obtaining of, 298–304
  complications, 298
incisional biopsy, 298, 301–302
  purpose, 298
  restraint and positioning, 298
nasal discharge, 139
nasal insufflation tube, 476, 477
  complications, 476
  equipment required, 476
  procedure, 477–479
  purpose, 476
  restraint/positioning, 476–477
nasogastric intubation, 172–176
  complications, 172
  equipment for, 172
  lubrication of end of tube, 173, 175
  marking the tube, 172, 173
  opposite side tube insertion, 174, 176
  procedure, 173–176
  purpose, 172
  restraint and positioning, 172
  same side tube insertion, 173, 176
nasogastric tube placement, in neonatal foal, 480–484
  complications, 480
  confirmation of correct placement, 482, 483
  equipment required, 480–481
  feeding tube positioning, radiographic confirmation of, 483
  feeding via nasogastric tube, 484
  indwelling feeding tube, 483
  procedure, 482–484
  purpose, 480
  restraint/positioning, 481
  types of tubes, 481
nasopharyngeal lavage, in horses, 225
nasopharyngeal sampling, 225–232
  complications, 225
  equipment for collecting nasopharyngeal swab, 225
  for performing nasopharyngeal lavage, 225
  for sample preparation, 226
  procedure nasopharyngeal lavage, 229–232
  nasopharyngeal swab, 226–227
  purpose, 225
  restraint and positioning, 226
nasotracheal intubation, 233–236
  complications, 233
  equipment for, 233–234
  procedure, 234–235
  purpose, 233
  restraint and positioning, 234
  supplies for tubes placement, 234
tube sizes, 233
navicular bursa, 283, 287, 289
N-butylscopolammonium bromide
  anti-spasmodic drug, 343
  injectable tocolytic agents, 385
neck roll, 10–11
  application of, 10, 11
  purpose of, 10
neonatal foal, see also specific procedures
ophthalmic (continued)
subpalpebral lavage system placement, 544–549
complications, 544
equipment required, 544
purpose, 544
restraint and positioning, 545
opioids, administration of, 114, 117–119
oral and dental examination, 129–144
complications, 129
dental chart, 130
dental eruption schedule, 137, 138
endodontic status, 135, 143–144
equipment for, 129–131
extraoral examination, 132–133, 139
five-component oral examination, 132
medical and dental history, 132
occlusion evaluation, 133–134, 140
oral soft tissues, 134, 141–142
periodontal status, 134, 142
purpose, 129
restraint and positioning, 131
terminology of, 136–137
triadan tooth numbering system, 136
oral medication administration, 88–92
complications, 88
contraindications to, 88
dosing syringe for, making of, 89, 90
equipment for, 88
medication preparation, 89, 91
procedure, 89–92
purpose, 88
restraint and positioning, 88
oral soft tissues, examination of, 134, 141–142
over-the-needle catheter, 100, 467
insertion of, 100–102
neonatal foal, 466–467
over-the-wire catheter, 469
insertion of, 102–105
oxygen delivery intranasal, 476–479
oxygen saturation, in pulse oxymetry, 436
oxytocin, 403
P
palpate limbs of neonatal foal, 419
paranal sinuses, features of, 205
paranasal sinocentesis, see sinocentesis
parturition, monitoring and preparing mare for, 385–388, see also impending parturition/delivery
patent infundibulum, 135, 144
PD, see periodontal disease
pectoral muscles, for IM injection, 80, 82
pelvic brim, vulva anatomical relation, 352
penis glans, cleaning of, 503
penis washes, fully erected, 341
percutaneous cecal trocharization, 190–194
catheter insertion, 191, 194
complications, 190
equipment for, 190
evacuation of gas, 192, 194
percussion of right flank area, 191, 193
procedure, 191–194
purpose, 190
site location for, 191, 192
percutaneous sinocentesis, see sinocentesis
perineal laceration, 402–403
on day of foaling, 406
perineural anesthesia, for dental procedures, 146–151
complications, 146
equipment for, 146, 147
inferior alveolar nerve block, 146, 150–151
infraorbital nerve block, 146, 148
local anesthetic solution, 147
maxillary nerve block, 146, 149
mental nerve block, 146, 150
purpose, 146
restraint and positioning, 147
syringe and needle size for, 147
perineum, cleaning of, 363
perineural anesthesia of limbs, 273–281
complications, 274
equipment for, 274
nerve blocks and areas/structures desensitized, 273–274
procedure, abaxial sesamoid, 276
high four-point nerve block, 277–278
low four-point nerve block, 277
median nerve block, 279
calmar/plantar digital, 275–276
superficial and deep peroneal nerve block, 280–281
tibial nerve block, 280
ulnar nerve block, 278–279
purpose, 273
restraint and positioning, 274
skin preparation with disinfectant, 275
periodontal disease (PD), 165
flowchart, 166
management of, 165–168
staging of, 165, 168
stage 1, 165, 167
stage 2, 166, 167
stage 3, 166, 167
stage 4, 166, 167
tooth mobility, evaluation of, 168
periodontal pockets, 134
periodontal status, examination of, 134, 142
periodontitis, 165, see also periodontal disease (PD)
petechiation, evaluation of neonatal foal, 424
phthisis bulbi, 32, 45, 46, 516
physical examination, adult horse 27
in emergency case, 29
equipment required, 27
general overview, 29–31
animal’s mental attitude, 30
approaching the horse, 31, 44
body condition score, estimation of, 31, 41, 42, 43
body weight, estimation of, 30, 40, 41
general inspection, 29, 39
neck circumference, morphometric evaluation of, 31, 43
regional adiposity, estimation of, 31, 44
respiration and breathing pattern, 30, 40
goals of, 27
procedure, 29–38
recording of findings, 29
regional examination, 31–38
abdomen, auscultation of, 37, 53–54
apex beat, feeling of, 35, 50
auscultation of heart, 36, 50
breathing pattern and respiratory rate (RR), 37
cranial cervical area, 35, 48
eyes, examination of, 32–33, 46
frontal and maxillary sinuses, percussion of, 35, 48
front foot inspection and hoof testers, 38, 55–56
head, nose, eyes, ears, and throat symmetry/deviation, 32, 45
heart sounds, 36, 50
hind foot, 38, 57
horse’s vision, evaluation of, 32, 46
intensity of murmurs, 36, 51
jugular vein, evaluation and palpation of, 34, 47
lungs, auscultation of, 37, 53
male external genitalia, 37
mare’s external genitalia, 38
neck, evaluation of, 35, 49
nostrils, 32, 45
oral mucous membrane, 34, 48
pelvic limbs, 38, 57
peripheral arterial pulse, evaluation of, 33, 47
rectal temperature, 38, 55
skin turgor, evaluation of, 33, 47
submandibular area, palpation of, 32, 45
thoracic limbs, evaluation of, 49, 55
timing of murmurs, 36, 51
trachea, auscultation of, 37, 53
types of murmurs, 36, 52
upper lid, lifting of, 33, 47
ventral thoracic and abdominal wall, 37, 54
Viborg’s triangle, 35, 48
physical restraint, 3, 5
guidelines for approaching horse, 5
methods of, 5
ear hold, 12
halter placement, 5–8
lifting and holding front foot, 21–22
lifting and holding hind foot, 23–24
lifting front leg to prevent horse from kicking, 24–25
lip chain, 12–14
lip rope, 15–16
modified lip rope, 17
neck roll, 10–11
nose or lip twitch, 18–21
restraining horse in stocks, 25–26
tyling lead rope, 8–10
purpose of, 5
placenta
abnormal echographic appearance of, 374
affected by placentitis, 399
assessment of mare, 396
chorionic side of, 399
examination, 397–402
F shape, 398
normal echographic appearance, 381
pneumovagina, 365
posterior presentation, dorso sacral position, fetus, 393
post-parturient mare, evaluation/monitoring complications, 395
equipment required
rectal examination, 395
speculum examination, 395
mare at foal heat, 407–408
mare in immediate postpartum, 401
placenta, 397–402
purpose, 395
pregnancy, mares
equipment required, 370
culture, 371
rectal examination, 370
speculum examination, 371
tansabdominal examination, 370
evaluation/monitoring, 370
fetal-placental evaluation, 371–382
late pregnancy
pre-pubic tendon rupture, 388
ventral edema, 387
normal allantoic/amniotic fluid echogenicities, 4 months of, 376
procedure
tansabdominal ultrasoundographic examination, 377–382
tansrectal ultrasoundographic examination, 372–377
vaginal examination, 383
twin ultrasoundography, 363
pre-purchase examination, 647–648
pertinent points, 644
procedure, 645–646
purpose, 644
proximal interphalangeal joint, 283, 287, 290
Pseudomonas aeruginosa, placentitis 397
psychological restraint, 3
pulse oximetry, in neonatal foal, 436–437
complications, 436
equipment required, 436
probe
on prepuce in colt, 437
on upper lip, 437
procedure, oxygen saturation determination, 436–437
Index

R
rectal examination, 182–189, 395
complications, 182
equipment for, 182
localization of palpable structures during, 186

treatment, 402
RFM, see retained fetal membranes
romifidine, 113, 116
rose bengal stain strip, 534
S
saddle evaluation and fitting equipment required, 632–633
procedure, 635–643
purpose, 632
Salmonella abortus equi, placentitis, 397
sedatives, 112, see also chemical restraint
sedative/spasmolytic drugs, 346
seidel test – fluorescein dry, 534
semen collection, 337
using artificial vagina, 335
semen densimeter, uses, 337
semen, volume of, 339
semitendinosus muscles, for IM injection, 80, 82
septic arthritis, 488
shear mouth, 133, 140
sinocentesis, 203–209
anatomical landmarks, 206
complications, 203
equipment for, 203
Jacobs chuck and set of Steinmann pins, 203, 208
local anesthesia, 206
procedure, 206–209
purpose, 203
restraint and positioning, 203
sample collection, 206
Steinmann pin, insertion of, 203, 208
skeletal malocclusions, 133, 140
skin biopsy
complications, 570
equipment required, 570
procedure, 571–574
purpose, 570
skin scraping technique, 558–561
complications, 559
equipment required, 559
procedure, 559
purpose, 558
skin turgor, 33, 47
small foals, lifted, 415
sodium bicarbonate, resuscitation drugs, 439
spavin test, 266, 272
speculum examination, vaginal, 395
sperm concentration, 339
sperm membrane integrity, 339
sperm morphology, 339
sperm motility, 339
splenic puncture/laceration, 177
splints, application of, see limb bandages and splints
stallion semen analysis, 337
stallion sex accessory glands, ultrasonography of, 335
stallion's internal genitalia, examination of, 335
stallion's penis, washing, 336
stallions, reproductive evaluation of complications, 335
equipment required, 335–337
purpose, 335
restraint/positioning, 337–342
staples, placement of, Caslick’s suture 369
stocks, restraining horse in, 25–26
Streptococcus equi subspecies equi, 226, 237
subcutaneous (SC) injection, 85–86, see also injection
superficial fungal skin lesions complications, 566
equipment required, 566
procedure, 566–569
purpose, 566
superficial thoracic vein, for IV injection, 77
supernumerary tooth, 133, 141
systolic murmur in neonatal foal, 426

T
tail
  bandage using brown gauze, 355, 361, 368, 501, 506
  neoprene wrap, 355, 367, 368, 506
  tarsocrural joint, 284, 288, 291
  tarsometatarsal joint, 284
  neoprene wrap, 355, 367, 368, 506

Taylorla equigenitalis, 347
tearer mare
  breeding phantom, 341
  stallion by exposing, 340, 341
  teat cannula, use of, 178–179
testicle, ultrasonographic evaluation of, 342
through-the-needle intravenous catheter, insertion of, 105–106
tolazoline, 114
tooth avulsion, 169
tourniquet, 293, 493
tracheostomy, 216–224
  complications, 216
  cuffless, fenestrated silicone tracheostomy tube, 218
  elective, 216
  emergency, 216
  equipment for, 216
  J-type cuffed, silicone tracheostomy tube, 217
  palpating site for, 221
  preparing site for, 221
  procedure, 219–224
  purpose, 216
  restraint and positioning, 219
  self-retaining metal tracheostomy tube, 223
  surgical approach, 222
  types of tracheostomy tubes, 218–219
tranquilization, 366
tranquilizers, 112, see also chemical restraint
transrectal palpation, 404
transrectal ultrasonography, of mare, 345, 354, 372–375, 407
transtracheal aspiration, 255–259
  complications, 255
  equipment for, 255
  procedure, 256–257
  purpose, 255
  restraint and positioning, 255
transverse facial artery, 67, 68
transverse facial vein/venous sinus, 59, 60
  blood collection from, 65–66
