FOREWORD xiii
PREFACE xv

PART ONE FUNDAMENTALS OF MEDICAL AND HEALTH SCIENCES MODELING AND SIMULATION 1

1 Introduction to Modeling and Simulation in the Medical and Health Sciences 3
   Catherine M. Banks
   Introduction 3
   Modeling and Simulation in the Medical and Health Sciences 4
   Research and Development of Medical and Health Sciences M&S 8
   The Question of Ethics in Medical and Health Sciences M&S 11
   Conclusion 19
   Key Terms 20
   References 20

2 The Practice of Modeling and Simulation: Tools of the Trade 23
   John A. Sokolowski
   Introduction 23
   Modeling and Simulation Terms and Definitions 23
   Modeling and Simulation Paradigms 26
   Conclusion 32
   Key Terms 32
   References 32
CONTENTS

PART TWO MODELING FOR THE MEDICAL AND HEALTH SCIENCES 35

3 Mathematical Models of Tumor Growth and Wound Healing 37
   John A. Adam
   Introduction 37
   Other Basic Models of Tumor Cell Population Growth:
      Multicellular Spheroids 40
      Diffusion of Growth Inhibitor 41
      Time-Evolutionary Diffusion Models 43
   Tumor Angiogenesis 46
   Conclusion 59
   Key Terms 61
   References 61
   Further Reading 63

4 Physical Modeling 65
   Stacie I. Ringleb
   Introduction 65
   Tangible Physical Models 66
   Cadaver-Based Models 70
   Animal Models 73
   Computational Physical Models 74
   Conclusion 78
   Key Terms 79
   References 79

PART THREE MODELING AND SIMULATION APPLICATIONS 85

5 Humans as Models 87
   C. Donald Combs
   Introduction 87
   Cadavers and Wax Models 88
   Standardized Patients 91
   Plastination 100
   Human Data Sets 103
   Conclusion 105
CONTENTS

Key Terms 106
References 106

6 Modeling the Human System 109
Mohammed Ferdjallah and GyuTae Kim

Introduction 109
Organ Modeling 110
Modeling of Muscular Electrophysiology 111
Conclusion 118
Key Terms 119
References 119

7 Robotics 121
Richard Lee

Introduction 121
Robotics Technology 122
Using Robotics: Advantages and Disadvantages 123
Conclusion 124
Key Terms 124

8 Training 125
Paul E. Phrampus

Introduction 125
Types of Training 129
Creating Successful Simulations in Health Care 132
Training programs and student levels 136
Simulation-Based Training 139
Barriers to Simulation Training in Health Care 143
Key Terms 144
References 144
Further Reading 145

9 Patient Care 147
Eugene Santos, Jr., Joseph M. Rosen, Keum Joo Kim, Fei Yu, Deqing Li, Elizabeth A. Jacob, and Lindsay B. Katona

Introduction 147
Related Work 149
Team Performance 150
Surgical Intent Inferencing 153
Empirical Study 158
CONTENTS

Conclusion 170
Key Terms 171
References 171

10 Future of Modeling and Simulation in the Medical and Health Sciences 175
Richard M. Satava

Introduction 175
Future Processes for Modeling and Simulation 177
Future Technologies and Applications 184
Conclusion 192
Key Terms 193
References 193

Appendix Modeling Human Behavior, Modeling Human Systems: Addressing the Skepticism, Responding to the Reservations 195

INDEX 207
