Preface ix

Introduction xi

COMPOSITES: FIBERS, MATRICES, INTERFACES, AND APPLICATIONS

Oxide Fiber Coatings for Silicon Carbide Ceramic Matrix Composites 3
Emmanuel E. Boakye, Pavel S. Mogilevsky, T. A. Parthasarathy, Randall S. Hay,
Michael K. Cinibulk, and M. Ahrens

Transmission Electron Microscopy of Rare-Earth Orthophosphate 15
Fiber-Matrix Interphases that Deform by Transformation Plasticity
During Fiber Push-Out
R. S. Hay, G. E. Fair, E. E. Boakye, P. Mogilevsky, T. A. Parthasarathy,
M. Ahrens, and T. J. Godar

Processing of Oxide/Oxide Composites for Gas Turbine 23
Applications Based on Braiding Technique (OXITEX®)
Christian Wilhelm, Thays Machry, Ralf Knoche, and Dietmar Koch

ENVIRONMENTAL EFFECTS OF CERAMICS AND COMPOSITES

Relationships Between Fiber Strength, Passive Oxidation and Scale 39
Crystallization Kinetics of Hi-Nicalon®-S SiC Fibers

FRACTURE MECHANICS, MODELING, AND MECHANICAL TESTING

Specimen Stress Equilibrium in Split Hopkinson Pressure Bar Tests 55
of Ceramics at High Strain Rate
Jianming Yuan, Jan Ma, and Geoffrey E.B. Tan
Residual Stress in Ceramic Zirconia-Porcelain Crowns by Nanoindentation
Y. Zhang and J. C. Hanan

Design and Development Approach for Gas Turbine Combustion Chambers Made of Oxide Ceramic Matrix Composites
Ralf Knoche, Erich Werth, Markus Weth, Jesus Gómez García, Christian Wilhelmi, and Miklós Gerendás

Effects of Preloading on Foreign Object Damage in an N720/Alumina Oxide/Oxide Ceramic Matrix Composite
D. Calvin Faucett and Sung R. Choi

Frequency and Hold-Time Effects on Durability of Melt-Infiltrated SiC/SiC
G. Ojar, Y. Gowayed, G. Morscher, U. Santhosh, J. Ahmad, R. Miller, and R. John

Mechanical and Microstructural Characterization of Reaction Bonded Silicon Carbide Processed with Petroleum Coke
Rodrigo P. Silva and Celio A. Costa

NONDESTRUCTIVE EVALUATION

Identification of Damage Modes in Ceramic Matrix Composites by Acoustic Emission Signal Pattern Recognition
N. Godin, M. R'Mill, P. Reynaud, G. Fartozi, and J. Lamon

An Indentation Based Non-Destructive Evaluation Technique for Thermal Barrier Coating Spallation Prediction
J. M. Tannenbaum, K. Lee, B. S.-J. Kang, and M. A. Alvin

Determination of Apparent Porosity Level of Refractory Concrete Using Ultrasonic Pulse Velocity Technique and Image Analysis
Anja Terzic, Ljubica Pavlovic, and Vojislav Mitic

PROCESSING-MICROSTRUCTURE-PROPERTIES CORRELATIONS

Sintering Behavior of Lithium-Titanate Pebbles: Modifications of Microstructure and Pore Morphology
D. Mandal, D. Sen, S. Mazumder, M R K Shenol, S. Ramnathan, and D. Sathiyamoorthy

Silicon Carbide Based Sandwich Structures: Processing and Properties
Alberto Ortona, Claudio D'Angelo, Simone Pusterla, and Sandro Gianella

Chemically Bonded Phosphate Ceramics with Different Fiber Reinforcements
H. A. Colorado, C. Hiel, and H. T. Hahn
Preceramic-Polymer-Bonded SiC Preforms for High Volume Fraction SiCp/Al Composites
Kuliraj Sujirakot, Kanthikar Dateraks, Sukunthakan Ngarmarmun, Ryan McQuiston, Trimet Sungkapan, and Jessada Wannasin

Novel High Temperature Wound Oxide Ceramic Matrix Composites Manufactured via Freeze Gelation
Thays Machry, Christian Wilhelmi, and Dietmar Koch

Effect of Reaction Time on Composition and Properties of SiC-Diamond Ceramic Composites
S. Salamone, and O. Spriggs

Pressureless Sintering of Boron Carbide Using Amorphous Boron and SiC as Additives
Célio A. Costa, Victor Manuel, José Brant de Campos, and Pedro Augusto de S.L. Cosentino

Effect of Reactive Heat Treatment on Properties of Al-Mg-B₄C Composites
M. K. Aghajarian, A. L. McCormick, and W. M. Waggoner

Cohesive Strength of Dry Powders Using Rheology
Nicholas Ku, Sara Reynaud, Chuck Rohn, and Rich Haber

Effect of Heat Treatment on Thermal Properties of Pitch-Based Carbon Fiber and Pan-Based Carbon Fiber Carbon-Carbon Composites
Sardar S. Iqbal, Ralph Dinwiddie, Wallace Porter, Michael Lance, and Peter Filip

TRIBOLOGICAL PROPERTIES OF CERAMICS AND COMPOSITES

Ceramic Foam/Aluminium Alloy Interpenetrating Composites for Wear Resistance Applications
J. Liu, J. Binner, R. Higginson, and C. Munnings

An Experimental Study on the Effects of SiC on the Sintering and Mechanical Properties of Cr₃C₂-NiCr Cermets
Ali Czer, Waltraud M. Kriven, and Yehya Kamal Tur

Increasing the Operating Pressure of Gasoline Injection Pumps via Ceramic Sliding Systems
C. Pfister, H. Kubach, and U. Spicher

Property and Microstructural Correlations to Wear on Reaction Bonded Materials
A. L. Marshall and S. Salamone
