CONTENTS

Tables and Figures xi
Preface xxi
The Authors xxxi

PART I STRATEGY 1

Chapter 1 Health Care Operations and Supply Chain Strategy 3
  Health Care Operations and Supply Chain Management 4
  Purchasing, Logistics, and Vendor-Managed Inventories 7
  Efficiency, Effectiveness, and Value 8
  Competitive Dimensions of Health Care 12
  The Bullwhip Effect in Health Care 14
  MiniCase: The Bullwhip Effect in Health Care Organizations 18

Chapter 2 Financial Aspects of Health Care Operations and Supply Chain Management 21
  Health Care Finance and Operations/Supply Chain Management 22
  Income Statement/Operating Statement 24
  Balance Sheet 27
  Statement of Cash Flows 32
  Basic Financial Ratios and Metrics 35
  Time Value of Money 47
  Break-Even Analysis 49
  Crossover Analysis 53
Chapter 3  Managerial Accounting Aspects of Health Care Operations and Supply Chain Management  
Managerial Aspects of Health Care Operations and Supply Chain Management 62  
Managerial Accounting 62  
Activity-Based Costing 65  
Supply Chain Management behind the Scenes: Cost Drivers at Hospitals 69

PART II  PROCESS DESIGN AND ANALYSIS OF HEALTH CARE OPERATIONS 75

Chapter 4  Data and Statistical Tools for Health Care Operations Improvement  
Descriptive Statistics for Describing Data Sets 78  
Graphical Methods of Data Description 78  
Numerical Methods of Data Description 81  
Hypothesis Testing: Analyzing the Difference of Two Means 101  
Pareto Analysis 116  
Box-and-Whisker Plots 117  
Tornado Diagrams and Sensitivity Analysis 129

Chapter 5  Problem Solving and Decision-Making Tools in Health Care Operations  
Health Care Operations and Supply Chain Management in Action: How Legal Decision Makers Use Decision Models 144  
Framing the Decision Problem 146  
Components of a Decision-Making Problem 146  
Payoff Tables 149  
Decision-Making Criteria without Probability Assessments 151  
Decision-Making Criteria with Probability Assessments 159  
Expected Value of Perfect Information 162
Modeling 177
Decision Trees 179

Chapter 6 Simulation 201
Introduction 202
Process Flows 202
Probability Distributions 203
Random Number Generation 210
Discrete-Event versus Continuous Simulation 211
Monte Carlo Simulation 213
Agent-Based Simulation 215
Simulation in Health Care 215
Queuing Analysis 216

Chapter 7 Process Improvement and Patient Flow 229
Introduction 230
Process Mapping 231
Value Stream Mapping 233
Use of Maps and Charts in Health Care 240
Staffing 242
Workload Management 243
Productivity and Efficiency Analysis 245
Common Health Care Productivity and Efficiency Measures 248
Improving Productivity and Efficiency 249
MiniCase: Improving Process Flow to Improve Service-Level Performance Statistics 253

Chapter 8 Facility Layout 257
Introduction 257
Layout Considerations 258
Types of Layouts 262
Muther Diagrams 264
Workload Management 266
Evaluating Different Types of Layouts 267
Basics of Optimization 270
Optimization Using Excel Solver 272
Optimizing Facility Layout and Design 280

Chapter 12  Forecasting for Health Care Management  
Analyzing Data Using Time Series and Regression Models  
  Linear and Nonlinear Trends  
  Seasonality in Data  
  Naive Forecasting  
  Moving Averages  
  Weighted Moving Averages  
  Exponential Smoothing  
  Autocorrelation  
  Regression as a Forecasting Technique  
  Multiple Regression Model  
  Measuring Accuracy  
  Measuring Forecasting Errors  

Chapter 13  Project Management  
Introduction  
  Role of Project Manager  
  Objectives and Trade-Offs  
  Planning and Control in Projects  
  Project Scheduling  
  Critical Path Method  
  Gantt Charts  
  Program Evaluation and Review Technique  
  Implementation  
  MiniCase: Implementing Electronic Medical Records at St. Hampton’s Hospital  

Chapter 14  Aggregate Planning, Scheduling, and Capacity Management in Health Care  
  Aggregate/Central Planning  
  Resource Planning and Control  
  Scheduling and Capacity Management  
  Workforce Scheduling  
  Dispatching Rules  
  Job Sequencing
CONTENTS

Chapter 15  Inventory Management 501

Introduction 502
Purpose of Inventories 502
Costs of Inventories 504
Economic Order Quantity 506
Independent versus Dependent Demand 509
Periodic Review Systems 510
Continuous Review Systems 511
ABC Inventory Management 515
Inventory Management Technology 519

Index 525
