Index

Abelian groups  50
Absorption
  infrared (IR)  5, 165, 173–7, 187, 336, 337
    in Raman spectroscopy  180–1
    Stokes/anti-Stokes  180–1, 343–44
Absorption bands  5, 167, 169
Alkenes, epoxidation of  53
Allene  61
Allred and Rochow scale  246
‘All space’ integration  231
Amines  49
Ammonia
  bending mode  126
  bond order for  267
  degenerate irreducible representations  98–100
  as Lewis base  267–8
  ‘lone pair’ electrons in  267
  matrix representations  85–8
  multiplication table  29–31, 39, 43
  N–H bonds  98–100, 126, 198, 199, 318
  N–H stretching modes  195, 198–200, 213
  reflection operation  87
  structure of  7
  symmetry elements  7, 29
  symmetry operations  7
  vibrational stretching modes  126
Angular equation  348–56, 368–9, 373
Angular frequency  327
Angular functions  368
Angular integrals  364–7
Angular momentum  356–9, 362
  defining units of  345–6
  higher  239
  quantum number  349, 352, 361
Angular velocity  355, 356, 357
Anharmonic corrections  167
Anion and cation pair  239
Antibonding orbitals  225, 237–9, 249, 251
Anti-Stokes absorption  181, 182, 343–4
Anti-Stokes bands  181, 183
Anti-Stokes radiation  344
AOs see Atomic orbitals
Arbitrary states  336
Arbitrary transitions  336–7
Aromatic molecules  221, 222, 224
Asymmetric molecules  46
Atmospheric pollutants  277
Atomic displacements  334, 338
Atomic orbitals
  comparison with water waves  221
  functions  129, 160, 224
  in heteronuclear diatomics  276–8
  higher angular momentum  239
  in homonuclear diatomics  270–6
  of hydrogen  345–73
  hydrogen-like  233, 239–51
  linear combination model  228
  molecular orbital energy and  225, 239–42, 248, 251, 295
  in molecular orbital theory  219, 221, 295
  nonbonding by symmetry  250, 296
  out of phase  221, 222
  in phase  221
  radial behaviour of  239–42
  reducible representations for  161
  relative energies of  242–51
  rigid  393–95
  see also d–orbitals, p–orbitals, s–orbitals
Atomic unit system  241, 372, 375
Atoms
  chemical bond strengths  204
  chemically equivalent  19
  degrees of freedom  110, 112, 122, 123, 125
  heavy  278–84, 367
  hydrogen-like  345, 354, 361, 365
  masses of  193, 204, 326–8, 331, 334
  neutral gas-phase  248
  properties  364

Molecular Symmetry  David J. Willock
