Index

Page numbers in *italics* denote figures, those in **bold** denote tables.

achondroplasia 125, 125
adopted children, bone age determination 11, 12
anamnesis 20
ankle bone ossification 24
anorexia nervosa 94–6, 95, 114
anthropometric measures 124
anti-deamidated gliadin peptide IgA 99
anti-endomysium (EMA) autoantibodies 99
anti-tissue transglutaminase (tTG) 99
arthritis 145, 146, 147
athletes 77–84
bone mineral content 78
bone mineral density 78
delayed bone aging 79–80
overuse trauma 83
premature bone aging 80–3
sport morphological optimization 78
see also individual sports
autoimmune hemolytic anemia 91

Beckwith-Wiedemann syndrome 127, 127
body mass index 95
bone age
athletes 79–80
genetic disease 124
healthy children 23–55
ankle and foot ossification 24
clavicle ossification 24
dental age estimation 23–4
knee ossification 24
wrist and hand ossification 24, 25–54, 26–54
medico-legal issues 7–15
adoptions 11, 12
criminal law 10–11
ethical issues 11–13
unaccompanied children 8–10
wrist MRI 8
skeletal estimation 57–60, 58–60, 58
see also specific conditions
bone densitometry see DXA
bone disease, childhood-onset 109–15
imaging 114–15
see also specific diseases
bone growth, longitudinal 2–3, 3
bone marrow 3, 4, 85
disorders 87–92, 89–91, 92
depletion/failure 90–1, 91, 92
infiltration/replacement/deposition 89–90, 92
reconversion 88, 89, 90, 92
gelatinous transformation 94
healthy 85–7, 88
maturity 85–92
MR imaging 85–7
red-yellow conversion 85, 86
bone maturation 57–76, 62–76
athletes 81, 82
MR imaging 60
MRI scoring system 60–1, 61
see also individual bones
bone mineral content (BMC) 115
athletes 78
celiac disease 110
inflammatory bowel disease 137, 139, 140
phenylketonuria 118
bone mineral density (BMD)
anorexia nervosa 114
athletes 78
cancer patients 133, 134, 135
celiac disease 110
Duchenne muscular dystrophy 111
DXA 137–42
inflammatory bowel disease 137–42
thalassemia 112
bone ossification see endochondral ossification
bone rim 58
bull’s eye sign 88
cancer, childhood 133–6, 134, 135
capitate bone maturation 74
carpal bones
age estimation 12
cartilage maturation 58
maturity 57, 60, 61
ossification 5, 5
cartilage 57
epiphyseal 3–4, 3, 4
maturity 57–8, 58
cartilage rim 58
cavernous hemangioma 148
celiac disease 99–104, 100, 101, 112–13
clinical features 99
 gluten-free diet 99, 100, 101–2
imaging 102, 103
and obesity 100–1
CHARGE syndrome 125–6, 125
childhood cancer 133–6, 134, 135
childhood-onset adult bone disease 109–15
imaging 114–15
see also specific diseases
children
bone age determination 8–10
ankle and foot ossification 24
clavicle ossification 24
dental age 23–4
knee ossification 24
unaccompanied children 8–10
wrist and hand ossification 24, 25–54, 26–54
inflammatory bowel disease 105–8, 137–42
nutrition and growth 93–7
puberty see puberty
chondrocytes 1
chondrosarcoma 148
clavicle ossification 24
collagen 57
Committee on the Rights of the Child 14
Computer-Assisted Skeletal Age Scores (CASAS) system 54
Convention on the Rights of the Child 11, 13, 14
Cornelia de Lange syndrome 125, 126
corticosteroid therapy 106–7, 107, 112, 138
craniofacial dysmorphia 134
criminal law 10–11
Crohn’s disease see inflammatory bowel disease
cystic fibrosis 110–11
delayed bone aging in athletes 79–80, 81
delayed puberty 20–1, 21
causes 22
clinical and diagnostic evaluation 21
imaging 22
treatment 22

dental age estimation 23–4
diabetes mellitus 113–14
disharmonious short growth syndromes 125–7, 125
down syndrome 125, 126
dual-energy X-ray absorptiometry see DXA
Duchenne muscular dystrophy 111
DXA 137–42, 138–41
early puberty 18, 135
endochondral ossification 1–6, 2
   growth plate 1
   imaging 3–5, 5, 4
   longitudinal growth 2–3, 3
   primary center 1
   secondary centers 1–2
   wrist and carpal bones 5, 5
epiphyseal cartilage 3–4, 3, 4
epiphyseal plate 2–3, 3
Europe, unaccompanied children 8–10
Ewing sarcoma 89
Fancconi anemia 91
fetal alcohol syndrome 125, 126
Flores Settlement Agreement 10
follicle-stimulating hormone (FSH) 17
foot bone ossification 24
gelatinous bone marrow transformation (GMT) 94
genetic disease 123–31
anthropometric measures 124
bone age 124
growth assessment 123–5
   growth disorders 125–127, 128–30
   gluten-free diet 99, 100, 101–2
   glycosaminoglycans 57
   gonadotropin-releasing hormone (GnRH) 17
   Greulich and Pyle atlas 23, 24
   growth disorders 125–31, 125, 127, 128–30
   disharmonious short growth syndromes 125–7, 125
   imaging 130–1
   overgrowth syndromes 127–31, 127
   see also individual disorders
   growth hormone 78
deficiency 21, 90, 113–14
   growth hormone-IGF-1 axis, in inflammatory bowel disease 105–6
   growth plate 1, 58, 60
   fusion
   metacarpals 60–6, 68–9
   phalanges 70–1, 72–3
   radius 62–3
   ulna 64–5
   imaging 3, 4–5
   stippling 60
   gymnasts 79–80
haematopoiesis 85, 87
   see also bone marrow
hamate bone maturation 75
hand bones
   maturation 57–76, 62–76
   ossification 24, 25–44, 26–54
   see also individual bones
