List of Contributors xix
Series Preface xxi
Acknowledgments xxiii

## 1 Introduction and Overview

*Peter P. Belobaba*

1.1 Introduction: The Global Airline Industry 1
   1.1.1 Deregulation and Liberalization Worldwide 4
   1.1.2 Industry Evolution Since 2000 6
1.2 Overview of Chapters 13
References 17

## 2 The International Institutional and Regulatory Environment

*Amedeo R. Odoni*

2.1 Introduction 19
2.2 Background on the International Regulatory Environment 20
   2.2.1 The Chicago Convention 20
   2.2.2 Freedoms of the Air 21
2.3 Airline Privatization and International Economic Regulation 24
   2.3.1 Airline Privatization 24
   2.3.2 Types and Critical Aspects of Air Service Agreements 25
   2.3.3 Typical Content of Bilateral and Multilateral ASAs 26
   2.3.4 The Unified EU Market and Other Major Developments 29
   2.3.5 The Role of Airline Alliances 32
2.4 Airports 33
   2.4.1 Restrictions on Airport Access 33
   2.4.2 Airport Ownership and Management 36
2.5 Air Traffic Management 39
2.6 Key Organizations and Their Roles 41
   2.6.1 International Organizations 41
   2.6.2 Organizations in the United States 43
2.7 Summary and Conclusions
References 45

3 Overview of Airline Economics, Markets and Demand 47
Peter P. Belobaba

3.1 Airline Terminology and Definitions 47
3.1.1 Basic Airline Profit Equation 49

3.2 Air Transportation Markets 51
3.2.1 Typical Air Passenger Trip 51
3.2.2 Spatial Definitions of Airline Markets 52

3.3 Origin–Destination Market Demand 55
3.3.1 Dichotomy of Airline Demand and Supply 55
3.3.2 Factors Affecting Volume of O–D Demand 57
3.3.3 Quality of Service Factors 57
3.3.4 Total Trip Time and Frequency 58

3.4 Air Travel Demand Models 60
3.4.1 Elasticity of Air Travel Demand 60
3.4.2 Air Travel Demand Segments 62
3.4.3 O–D Market Demand Functions 64

3.5 Airline Competition and Market Share 67
3.5.1 Market Share/Frequency Share Model 67
3.5.2 “S-Curve” Model Formulation 69
3.5.3 Quality of Service Index (QSI) Models 70

3.6 Summary 71
References 72

4 Airline Pricing Theory and Practice 75
Peter P. Belobaba

4.1 Airline Prices and O-D Markets 75
4.1.1 Regulated versus Liberalized Pricing 76
4.1.2 Theoretical Pricing Strategies 77
4.1.3 Price Discrimination versus Product Differentiation 79

4.2 Differential Pricing 79
4.2.1 Market Segmentation 81
4.2.2 Fare Product Restrictions 82
4.2.3 Airline Fare Structures 83

4.3 Recent Trends in Airline Pricing 89
4.3.1 Branded Fare Families 90
4.3.2 Unbundling and Ancillary Revenues 91

4.4 Airline Pricing Strategies 93
4.4.1 Factors Affecting Fare Structure in an O-D Market 93
4.4.2 Competitive Fare Matching 96
References 98
## Airline Schedule Optimization

**Cynthia Barnhart and Vikrant Vaze**

### 8.1 Schedule Optimization Problems

### 8.2 Fleet Assignment

- **8.2.1 The Fleet Assignment Model**
- **8.2.2 Fleet Assignment Solutions/Impacts**
- **8.2.3 Extending Basic Fleet Assignment Models**

### 8.3 Schedule Design Optimization

- **8.3.1 Modeling the Optimization of Flight Retiming and Fleet Assignment Problems**
- **8.3.2 Importance of Modeling Competition in Schedule Design**

### 8.4 Crew Scheduling

### 8.5 Aircraft Maintenance Routing and Crew Pairing Optimization

- **8.5.1 Modeling and Solving the Extended Crew Pairing Problem**
- **8.5.2 Modeling and Solving the Restricted Aircraft Maintenance Routing Problem Based on the Solution to the Extended Crew Pairing Problem**

### 8.6 Future Directions for Schedule Optimization

### References

## Airline Flight Operations

**Alan H. Midkiff, R. John Hansman, Jr., and Tom G. Reynolds**

### 9.1 Introduction

### 9.2 Regulation and Scheduling

- **9.2.1 General Regulatory Requirements**
- **9.2.2 Flight Crew Regulation and Training**
- **9.2.3 Flight Crew Scheduling**

### 9.3 Flight Crew Activities during a Typical Flight

- **9.3.1 Flight Crew Sign-In**
- **9.3.2 Operations/Planning**
- **9.3.3 Preflight**
- **9.3.4 Predeparture**
- **9.3.5 Gate Departure**
- **9.3.6 Taxi-Out**
- **9.3.7 Takeoff**
- **9.3.8 Terminal Area Departure**
- **9.3.9 Climb**
- **9.3.10 Cruise**
- **9.3.11 Descent**
- **9.3.12 Terminal Area Arrival**
- **9.3.13 Final Approach**
- **9.3.14 Landing and Rollout**
- **9.3.15 Taxi-In**
10 Irregular Operations: Schedule Recovery and Robustness
Cynthia Barnhart and Vikrant Vaze

10.1 Introduction 263

10.2 Irregular Operations
10.2.1 Managing Irregular Operations: Airline Operations Control Centers 266
10.2.2 Options for Schedule Recovery from Irregular Operations 267
10.2.3 Schedule Recovery from Irregular Operations: Objectives and Process 269
10.2.4 Evaluating the Costs of Recovery Options: The Challenges Imparted by Uncertainty and Downstream Effects 278

10.3 Robust Airline Scheduling 279
10.3.1 Robust Schedule Design 280
10.3.2 Robust Fleet Assignment 281
10.3.3 Robust Aircraft Routing 281
10.3.4 Robust Crew Scheduling 283

10.4 Directions for Ongoing and Future Work on Schedule Recovery from Irregular Operations 284
References 285

11 Labor Relations and Human Resource Management in the Airline Industry
Jody Hoffer Gittell, Andrew von Nordenflycht, Thomas A. Kochan, Greg J. Bamber, and Robert B. McKersie

11.1 Alternative Strategies for the Employment Relationship 288

11.2 Labor Relations in the US Airline Industry 289
11.2.1 Regulatory Framework for US Labor Relations 291
11.2.2 US Airline Responses to Cost Pressures Postderegulation 293
11.2.3 US Labor Relations Post-September 11, 2001 299

11.3 Labor Relations in the Airline Industry in Other Countries 302
11.3.1 The International Regulatory Framework for Labor Relations 302
11.3.2 Summary of Airline Labor Relations Strategies: What Works? 310

11.4 Human Resource Management at Airlines 312
11.4.1 Hiring and Training for Relational Competence 316
11.4.2 Flexible Boundaries between Jobs 316
11.4.3 Supervisory Coaching and Feedback 317
11.4.4 Performance Measurement at the Process Level 318
11.4.5 Conflict Resolution 318
11.4.6 Boundary Spanning Roles 319
11.4.7 Partnering with Other Key Players 320
11.4.8 Leadership 321

11.5 Conclusions 322
References 323

12 Aviation Safety and Security 327
Arnold I. Barnett

12.1 Safety 328
12.1.1 Safety Is No Accident 328
12.1.2 Measuring Air Safety: Some Hazards 329
12.1.3 The Q-Statistic 331
12.1.4 Some Calculated Q-Values 332
12.1.5 Other Approaches to Safety Measurement 333
12.1.6 Are Some Airlines Safer Than Others? 334
12.1.7 The Last Century 335
12.1.8 A Collision Risk Assessment 337
12.1.9 Midair Collision Risk 340

12.2 Security 341
12.2.1 September 11 in Context 341
12.2.2 Some Costs of Aviation Security 342
12.2.3 Some Security Procedures 343
12.2.4 Is It Worth It? 349
12.2.5 Two Economic Paradigms 349
12.2.6 A European Dilemma 351
12.2.7 More Security Dilemmas 353
12.2.8 Final Remarks 358
References 359

13 Airports 361
Amedeo R. Odoni

13.1 Introduction 361
13.2 General Background 363
13.3 Physical Characteristics 366
13.3.1 Airside Design Standards 366
13.3.2 Geometric Configuration on Airside 369
13.3.3 Typology of Passenger Buildings 372
13.3.4 Assessing Passenger Building Concepts 374
13.3.5 Ground Access 376

13.4 Capacity, Delays, and Demand Management 377
13.4.1 Airside Capacity 377
13.4.2 Airside Delays and Their Mitigation 379
13.4.3 Landside Capacity and Level of Service 381

13.5 Institutional, Organizational, and Economic Characteristics 384
13.5.1 Airport Ownership and Management 384
13.5.2 Airport User Charges 385
13.5.3 Economic Regulation 389
13.5.4 Financing Capital Projects 391
References 392

14 Air Traffic Control 395
R. John Hansman, Jr. and Amedeo Odoni

14.1 Introduction 395
14.2 The Generic Elements of an ATC System 396
14.2.1 Communications Systems 397
14.2.2 Navigation Systems 397
14.2.3 Surveillance Systems 402
14.2.4 Flight and Weather Information Systems 404
14.3 Airspace and ATC Structure 405
14.4 ATC Operations 408
14.5 Standard Operating Procedures 410
14.6 Capacity Constraints 411
14.7 Congestion and Air Traffic Flow Management 417
14.8 Future ATC Systems 420
References 420

15 Air Transport and the Environment 423
Karen Marais, Philip J. Wolfe, and Ian A. Waitz

15.1 Introduction 423
15.2 Limiting Aviation’s Environmental Impact: The Role of Regulatory Bodies 425
15.3 Airport Water Quality Control 426
15.3.1 Effects of Deicing Fluids 428
15.3.2 Managing Airport Water Quality 429
15.4 Noise 430
15.4.1 Effects 432
15.4.2 Noise Measurement 433
15.4.3 Noise Trends 435
15.4.4 Noise Controls 436
15.4.5 Emerging Issues 438
15.5 Air Quality 439
15.5.1 Effects 442
15.5.2 Emissions Measurement 443
15.5.3 Emissions Trends 443
15.5.4 Emissions Control 447
15.5.5 Emerging Issues 448
15.6 Impact of Aviation on Climate 449
15.6.1 Effects 449
15.6.2 Measurement 451
15.6.3 Greenhouse Emissions Control 452
15.7 Alternative Fuels 453
