Cardiovascular Hemodynamics for the Clinician, Second Edition. Edited by George A. Stouffer. © 2017 John Wiley & Sons Ltd. Published 2017 by John Wiley & Sons Ltd.
hemodynamic avoidance of common pitfalls 121–124
long-term follow-up after valve replacement 127
low flow–low-gradient aortic stenosis 120–121
patient selection 120
rapid ventricular pacing 123
surgical aortic valve replacement 119, 125–127
transcatheter aortic valve replacement 119, 121–124
AR see aortic regurgitation
ARDS see acute respiratory distress syndrome
arrhythmias 321–340
atrial fibrillation and atrial flutter 69, 85, 138, 328–330, 351
atrial waveform 80
atrioventricular synchrony 332–336
cannon A waves 324, 326, 328, 330
cardiomyopathy 337–339
concepts and definitions 321
dilated cardiomyopathy 337–339
electrocardiography and waveform analysis 321–331, 333, 337–339
heart block 323–324, 325
heart failure 337–339
hypertrophic obstructive cardiomyopathy 321–323, 336–337
junctional rhythm 324, 328, 333
pacemakers 323–324, 326, 331–339
physiology and pathophysicsiology of AV synchrony 333–335
premature atrial and ventricular contractions 321–323
pressure–volume loops 338–339
pulmonary artery catheter 32
sinus bradycardia or tachycardia 321, 330–331
ventricular tachycardia 324, 326–327
arterial pressure 56–68
aortic pressure 58, 61–62, 66
augmentation index 61–62, 65
concepts and definitions 56–58
ejection phase 56, 61
mean arterial pressure 58–59, 67–68
noninvasive measurement of blood pressure 65–67
oscillometric blood pressure devices 67–68
peripheral amplification 65, 67
pressure waveform 59–62
pressure wave reflection 56–57
pulse wave velocity 56–57
respiration and aortic pressure 62, 66
Wiggers diagram 60
AS see aortic stenosis
ASD see atrial septal defects
assumed Fick method 28–29
atherosclerosis 284
atrial fibrillation 328–330, 351
atrial waveform 69
cardiac output 85
mitral stenosis 138
atrial flutter 328–330
atrial septal defects (ASD) 91–93, 97–98
atrial systole 40
atrial waveform (A wave) 69–81
abnormalities in atrial pressures 71–77
arrhythmias 80, 324, 326, 328, 330–331
cannon A waves 324, 326, 328, 330
components of the atrial wave 69–71
concepts and definitions 69
conditions associated with RA pressure tracings 71–74
hypertrophic cardiomyopathy 189–192
jugular venous pulse 77, 80
mitral stenosis 131, 133
myocardial infarction 304–305
normal hemodynamics 40–42, 44, 46–48
physical examination 77–80
prominent V waves 73–75, 76, 77
pulmonary hypertension 312–313, 318
systematic evaluation of hemodynamic tracings 341–343
tricuspid valve 164
atrioventricular (AV) synchrony 332–336
atrioventricular (AV) valve 39–40
augmentation index (Alx) 61–62, 65
Austin Flint murmur 146
autoregulation of coronary hemodynamics 283, 284, 289
AV see atrioventricular
AVA see aortic valve area
AVR see aortic valve replacement
A wave see atrial waveform
balloon aortic valvuloplasty 122–123
balloon pulmonary valvuloplasty (BPV) 173, 176
Bayliss phenomenon 282
Beck’s triad 243
Bernoulli equation 3–4, 12–13, 106–107, 139
bifurcation lesions and measurement of FFR 294
bioimpedance systems 89
bisferiens pulse 63, 145, 190
blood flow see hemodynamic principles; normal hemodynamics
bradycardia
arterial pressure 63
atrial waveform 71
junctional rhythm 333
sinus bradycardia 321, 330–331
CABG see coronary artery bypass grafting
CAD see coronary artery disease
cannon A waves 324, 326
cardiac catheterization
aortic stenosis 110
aortic regurgitation 144
cardiac tamponade 237
constrictive pericarditis 227–228
coronary hemodynamics 283–286
effusive–constrictive pericarditis 250–251
heart failure 202
hypertrophic cardiomyopathy 189
left heart catheterization 109–117
mitral regurgitation 158
mitral stenosis 131
see also pulmonary artery catheter
pulmonic valve disease 173
right heart catheterization 17–36
right ventricular myocardial infarction 305–307
tricuspid regurgitation 165
tricuspid stenosis 168
cardiac index (CI) 206–207, 308
cardiac output (CO) 82–90
aortic stenosis 115
aortic valve replacement 122–123
bioimpedance systems 89
cardiac tamponade 235, 240
concepts and definitions 82–83
Doppler echocardiography 87–88
Fick method 83, 84–85, 95
heart failure 206–207
hemodynamic principles 3–5, 11–12
important formulas 83
intensive care units 88–89
intracardiac shunts 95
mitral stenosis 134
pulmonary artery catheter 17, 28–29
pulmonary hypertension 314–315
pulmonic valve disease 177
pulse contour analysis 88–89
thermodilution method 83, 85–87
cardiac resynchronization therapy (CRT) 338–339
cardiac sarcoidosis 215–216
cardiac tamponade 234–247
aortic valve replacement 122
atrial waveform 79
Beck’s triad 243
cardiac catheterization 237
case study 244–246
clinical progression 234, 235
compliance of the pericardium 235
concepts and definitions 234
differential diagnosis 230–231, 248–249
echocardiography 243–245
electrocardiography and waveform analysis 237–242, 246
elevated pericardial pressure 235–236, 237
hemodynamic findings 237–241
hemodynamic pathophysiology 234–237
jugular venous distension 243
Korotkoff sounds 241
Kussmaul’s sign 243
left ventricular assist devices 273
physical examination 241–243
pulsus paradoxus 238–242
right atrial pressure 237–241, 243–246
cardiac transplantation 315–317
cardiogenic shock 257–259
CardioMEMS 209
cardiomyopathies
arterial pressure 63
heart failure 200–211
hypertrophic cardiomyopathy 185–199
restrictive cardiomyopathy 212–217
cardiovascular magnetic resonance (CMR) 180
Carrabello's sign 114, 117
central venous pressure (CVP)
constrictive pericarditis 223, 226
hemodynamic principles 5
left ventricular assist devices 270
normal hemodynamics 41
CF see continuous-flow
CFR see coronary flow reserve
chest X-ray 227, 250
chronic thromboembolic pulmonary hypertension (CTEPH) 311–312
CI see cardiac index
CMR see cardiovascular magnetic resonance
CO see cardiac output
computed tomography (CT) 173, 227
congestive heart failure 37, 348–349, 351
constrictive pericarditis 49, 78, 221–233
acute pericarditis 221–222
cardiac catheterization 227–228
case study 231–232
central venous pressure 223, 226
clinical presentation and progression 221
concepts and definitions 221–222
differential diagnosis 213–215, 224, 230–231
echocardiography 229
electrocardiography and waveform analysis 222, 223–225, 348
etiology 221–222
hemodynamics 222–226
imaging techniques 227
intracardial pressure 224
physical examination 226
pseudoconstriction 224
respiration and blood flow 223, 226
right atrial pressure 223, 225, 227, 231–232
sensitivity and specificity of hemodynamic findings 229
systolic concordance and discordance 227–228
continuity equation 13–14, 106–108, 139
continuous-flow (CF) ventricular support pumps 270
continuous-wave Doppler echocardiography
aortic regurgitation 147
aortic stenosis 106
hypertrophic cardiomyopathy 195–196
mitral stenosis 139–140
tricuspid valve 164
contractility
aortic valve replacement 121
indices of contractility 50–52
mitral regurgitation 157
myocardial infarction 304
coronary artery bypass grafting (CABG) 288, 292–293
coronary artery disease (CAD) 292
coronary flow reserve (CFR) 281, 283, 284–287, 288
coronary hemodynamics 279–287
autoregulation 282, 283, 289
cardiac catheterization 283–287
clinical studies of FFR 292–294
coronary flow reserve 281, 282, 284–287, 288–289
Doppler wires 283, 284–286
electrocardiography and waveform analysis 289–291
fractional flow reserve 283, 286–287, 288–297
garden hose analogy 283
instantaneous wave-free ratio 295
limitations of FFR measurement 294–295
measurement of coronary blood flow 284, 287
microvascular dysfunction 281
myocardial oxygen extraction/demand 279, 280
pressure wires 283, 286, 288
principles of coronary blood flow 279–281
regulation of coronary blood flow 281–282
resistance 279–280, 289
coronary stenosis 289, 291–293
CRT see cardiac resynchronization therapy
CT see computed tomography
CTEPH see chronic thromboembolic pulmonary hypertension
CVP see central venous pressure
C wave
arrhythmias 328
atrial waveform 72
normal hemodynamics 41–42
tricuspid valve 164–166
DBP see diastolic blood pressure
DEFER trials 293
diabetes mellitus 354
Index

diastole 19–20, 37–40, 43–50
diastolic augmentation 255, 257–263
diastolic blood pressure (DBP)
  aortic valve replacement 121–125
  arterial pressure 58, 68
  pulmonic valve disease 177–178
diastolic dysfunction 188
diastolic filling
  cardiac tamponade 234–235, 237–240
  constrictive pericarditis 222–223, 229
  systematic evaluation of hemodynamic tracings 343
diastolic murmur 139, 145–146
diastolic pressure 302–304, 306–307, 310
diastolic rumble 138–139, 146
dicrotic notch (DN) 260–262
dilated cardiomyopathy 337–339
DN see dicrotic notch
dobutamine 114–115, 121, 308
Doppler echocardiography
  aortic regurgitation 147
  aortic stenosis 106, 109–110
  aortic valve replacement 120
  cardiac output 87–88
  cardiac tamponade 243–245
  hypertrophic cardiomyopathy 195–196
  left ventricular assist devices 272
  mitral stenosis 139–140
  pulmonary hypertension 318–319
  pulmonic valve disease 173
  restrictive cardiomyopathy 215
  tricuspid valve 164, 168–170
Doppler wires 283, 284–286
dynamic subvalvular stenosis 117–118

ECG see electrocardiography

electrocardiography (ECG) and waveform analysis (cont’d)

intra-aortic balloon counterpulsation 259–264

left ventricular assist devices 270

mitral regurgitation 155, 158, 160

mitral stenosis 131–132, 133, 134–136

RV myocardial infarction 302, 304–307

normal hemodynamics 37, 40–47, 54–55

pulmonary artery catheter 19, 22–24, 26

pulmonary hypertension 312–316, 318

restrictive cardiomyopathy 214, 215–216

systematic evaluation of hemodynamic tracings 341–356

tricuspid valve 164–166

unknowns 344–356

end-diastolic pressure (EDP)

aortic regurgitation 144, 145, 151

aortic valve replacement 121–122, 124–125

atrial waveform 75–77

cardiac tamponade 237

heart failure 200–201, 203–204

hypertrophic cardiomyopathy 189–191

intra-aortic balloon counterpulsation 258–263

mitral stenosis 134

normal hemodynamics 45, 47–50

pulmonary hypertension 312–313

right ventricular myocardial infarction 307

tricuspid valve 170

endocarditis 32, 347

end-systolic diameter (ESV) 157

EOA see effective orifice area

ESCAPE study 202

ESV see end-systolic diameter

exercise echocardiography 147

exercise hemodynamics 136

exertional dyspnea 157, 346, 352

extracorporeal membrane oxygenation (ECMO) 258

FAME studies 292–293

femoral artery pressure 111–112, 116

FFR see fractional flow reserve

Fick method

cardiac output 83, 84–85, 95

intracardiac shunts 95

pulmonary artery catheter 28–29

flowmeter techniques 284

fluid resuscitation 308

fractional flow reserve (FFR) 288–297

case study 295–296

clinical measurement 283, 286–287

clinical studies 292–294

concepts and definitions 288–291

electrocardiography and waveform analysis 289–291

instantaneous wave-free radio 295

limitations of FFR measurement 294–295

revascularization 288, 292–295

Frank–Starling law 9–10, 47, 202–203

Gorlin formula 110–111, 137–138

Graham Steell murmur 318

Harvey’s sign 146

HCM see hypertrophic cardiomyopathy

heart block 323–324, 325

heart failure (HF) 200–211

ambulatory monitoring of pulmonary artery pressure 209

aortic pressure and pulsus alternans 207–208

arrhythmias 337–339

cardiac output and cardiac index 206–207

congestive heart failure 37, 348–349, 351

derived parameters from measured intracardiac pressures 206–209

directly measured intracardiac pressures 203–205

electrocardiography and waveform analysis 348–349, 351

etiology 200, 201

Frank–Starling relationship 202–203

hemodynamic findings 202, 210

left ventricular end-diastolic pressure 200–204

mixed venous oxygen saturation 206

physical examination 202

preserved ejection fraction 200–202, 204, 206

pressure–volume loops 200–201, 203–204

pulmonary artery catheter 202–203

pulmonary artery pressure 204–205

pulmonary capillary wedge pressures 202, 204–205
reduced ejection fraction 200–202, 206
right atrial pressure 205
right ventricular pressure 205
right ventricular stroke work index 207
transpulmonary gradient and pulmonary vascular resistance 207
HeartMate 3 device 267–268
HeartWare ventricular assist device (HVAD) 267–268
hemodynamic principles 3–16
Bernoulli/modified Bernoulli equation 3–4, 12–13
cardiac output and vascular resistance 3–5, 11–12, 14–16
continuity equation 13–14
cross-sectional area of blood vessel 13–14
hydrostatic pressure 3–4
interchangeable forms of energy in blood stream 3–4
kinetic energy of blood flow 3–4
laminar and turbulent flow: Reynold’s number 7–9
preload: Frank–Starling law 9–10
pressure and fluid velocity relation 12–14
pressure gradient and resistance 4–6
pressure–volume relationship 11–12
rapid increases in cardiac output 11–12
resistance in series/parallel blood vessels 14–16
resistance to flow: Poiseuille’s law 6–7
wall tension: Laplace relationship 10–11

ventilation
arterial pressure 62
cardiac output 86–87
pulmonary artery catheter 26–28
ventricular bigeminy 85
ventricular ejection 20–21
ventricular filling 223
ventricular function curve 50, 53
ventricular septal defects (VSD) 91–93, 97
ventricular tachycardia 324, 326–327
viscosity 6
VSD see ventricular septal defects
VTI see velocity time integral
V wave
  arrhythmias 330–331
  atrial waveform 70–77, 80
  heart failure 205
hypertrophic cardiomyopathy 189–190
mitral regurgitation 155, 158, 160
normal hemodynamics 41–43, 46
pulmonary hypertension 318
systematic evaluation of hemodynamic tracings 341–343
tricuspid valve 164–166
wall tension 10–11
waveform analysis see electrocardiography and waveform analysis
WHO see World Health Organization
Wiggers diagram 37, 38, 60
World Health Organization (WHO) classification scheme 310–312
X descent
  atrial waveform 69–73, 77, 80
  cardiac tamponade 237–238
  Constrictive pericarditis 223
  effusive–constrictive pericarditis 249
  myocardial infarction 304–305
  normal hemodynamics 41–42, 43
  Restrictive cardiomyopathy 213
  systematic evaluation of hemodynamic tracings 341–343
Y descent
  arrhythmias 330–331
  atrial waveform 70, 73, 77, 80
  cardiac tamponade 237–238
  Constrictive pericarditis 223
  effusive–constrictive pericarditis 249
  mitral stenosis 131
  myocardial infarction 304–305
  normal hemodynamics 41–42, 43
  Restrictive cardiomyopathy 213
  systematic evaluation of hemodynamic tracings 341–343
