biodiversity patterns contd.
ecosystem consequences of change 323
Hurlbert’s index 350
known species of marine fish 319
long-term trends in abundance 319–20
species richness and sampling area (SAR) 319
state-space models (SSMs) 325
statistical tools for electronic tracking data 325
total species richness 319–21
biogeographic breaks 33
Biogeography of Deep-Water Chemosynthetic Ecosystems (ChEss)
field program 161–76
study sites 168
BIOMARE, marine biodiversity program 191
bipolar species
CAML 207
MtCOI sequences 192
pyrotags 238–9
Black Sea
biodiversity and oxygen availability 237
history 7–8
zooplankton 259
bluefin tuna see tuna species
Bosphorus Sea, biodiversity and oxygen availability 237
brachiopods 347
global/Gulf of Maine numbers 52
bromodeoxyuridine (BrdU), de novo DNA synthesis 235
bryozoans 347
global/Gulf of Maine numbers 52
California Current ecosystem (CCS) 300
CAML projects see Census of Antarctic Marine Life (CAML)
Canadian Arctic
Canada Basin, species numbers/inventories 192–4
species numbers 187
carbonate towers, hydrothermal vents 236
Caribbean Sea 14–15
history of turtle catches 6
NaGISA sites 31
Caspian Sea, zooplankton 259
CeDaMar projects see Census of Diversity of Abyssal Marine Life
Celebes Sea 255
CenSeam see Global Census of Marine Life on Seamounts
Census of Antarctic Marine Life (CAML) 206–8
Census of Coral Reef Ecosystems (CReefs) 66, 68–76
Census of Diversity of Abyssal Marine Life (CeDaMar) 139–58
Census of Marine Zooplankton (CMarZ) 247
Cephalochordata 348
cetaceans
Topp 293
see also whales; whaling
chaetognaths 348
Arctic, barcoded 193
global/Gulf of Maine numbers 52
new species (CMarZ) 254
Charlie Gibbs Fracture Zone (CGFZ) 104–12
Chelicerata (non arachnid) 347
global/Gulf of Maine numbers 52
chemosynthetic ecosystems, abyssal deep 161–82
adaptations to extreme environment 162–3
anthropogenic impact 175–6
ChEss project 161–76
larval ecology 172–3
limits to knowledge? 174–5
see also hydrothermal vents
ChEss see Biogeography of Deep-Water Chemosynthetic Ecosystems
Chile Rise, Southeast Pacific 171–3
Chlorophyta 348
global/Gulf of Maine numbers 52
Chukchi Sea
recent oil and gas lease sales 198
reduction of ice cover 197
species numbers/inventories 187, 192–4
Ciliophora 348
global/Gulf of Maine numbers 52
climate change
Arctic Ocean Diversity project (ArcOD) 194–5
El Niño Southern Oscillation (ENSO) index 317
experimental manipulations of harvesting, immigration and environmental warming 322
sea surface temperature (SST) as predictor of diversity 317
CMarZ see Census of Marine Zooplankton
cnidarians 347
Arctic, barcoded 193
global/Gulf of Maine numbers 52
new species (CMarZ) 254
cod fisheries 10–11
Baltic Sea 11–12
Grand Banks 12–14
Scotian Shelf 12–14
cold seep communities
Costa Rica margin 168–9
Gulf of Mexico 162, 164, 168, 175
New Zealand 176
Cold Temperate Waters Province (CTWP) 104
Conception, depth–diversity trends 91–2
conductivity, temperature, and depth (CTD) tags 295
Continental Margin Ecosystems on a Worldwide Scale (COMARGE) 79–82, 94–5
biota response to anthropogenic disturbances 82
COMARGE Information System (COMARGIS) 82
habitats 82
human influence 94–5
Ocean Biogeographic Information System (OBIS) 82
strategies 82
zonation patterns 82
continental margins 79–95
defined 80
depth–diversity trends 89–92
datasets used 91–2
local and global analyses 92–4
observed trends and potential drivers 91–2
regression model results 92
global maps
depth–diversity trends 90
field strategies 80
habitat heterogeneity
diagram of geological, hydrological and biological factors 83
images 84
models 86
societal value 86
species accumulation (macrofauna) 85
location map of sampling field strategy evolution 80
hot spot 81
slope complexity 79–82
spatial trends 86–94
zonation and distribution 87–9
subduction zone 171
continuous plankton recorder (CPR) 250, 339
managed by SAHFOS 339
survey, North Atlantic and North Sea 6
copepods
Antarctic 256
temporal and spatial patterns of relative changes 210
Arctic 186–8, 191
barcoded 193
comparisons for tropical, temperate, and polar regions 253
diversity and abundance 251
lipid content 194
new species (CMarZ) 254
vertical profiles of abundance 255
corals/coral reefs 65–77
autonomous reef monitoring structures (ARMS) 69–72
map of current/planned deployment sites 72
Biogeoinformatics of Hexacorals website 339
coldwater/stony corals, global map 320
estimates of biodiversity (CReefs project) 66–74
cost effective method 74
molecular analyses 68–9
results 72–3
standardized sampling 69–72
Gulf of Maine Register of Marine Species (GoMRMS) 49
risks of extinction 66
seamounts 319, 320
socioeconomic and environmental factors, effect on regional variability 322
threats 74
Costa Rica margin, methane seeps 168–9
CReefs see Census of Coral Reef Ecosystems
Crenarchaeota 235
crocodiles, decline 15
crustaceans 347
global/Gulf of Maine numbers 52
new species (CMarZ) 254
ctenophores 347
global/Gulf of Maine numbers 52
Japan 256
new species (CMarZ) 254
cumaceans 36
cyanobacteria 348
global/Gulf of Maine numbers 52
nitrogen fixation 242
picocyanobacteria 30
Cyclophora 348
cyanthocyanobacteria (COI) gene 68
see also genetic barcoding, molecular barcoding, mitochondrial cyanobacteria (MtCOI)
data sharing 334–5
decapods, Arctic, barcoded 193
deep sea
zooplankton 253
see also abyssal
deep-water trawling 176
diatom evolution, lipids 240
Diel echogram, during crossing of MAR 116
dinoflagellates
pyrotag studies 235
rRNA copies 235
Dinomastigota 348
global/Gulf of Maine numbers 52
Diversitas International of the Western Pacific Asia (DIWPA) 27
DNA barcoding see genetic barcoding, molecular barcoding
DNA barcoding, zooplankton 250–1, 256–7
East Pacific Rise 172
marine protected area (MPA) 176
Eastern Pacific (EPAC)
El Niño Southern Oscillation (ENSO) index 317
NaGISA sites 30
echinoderms 347
Arctic, barcoded 193
global/Gulf of Maine numbers 52
Ecologically and Biologically Significant Areas (EBSA) 34
ecosystem-based management (EBM) 43
El Niño Southern Oscillation (ENSO) index 317
elephant seals, migrations 304
Entoprocta 347
euphausids, Arctic, barcoded 193
Eurasian Arctic deep sea 193
European Seas (ES), NaGISA sites 30–1
European Union, marine biodiversity program BIOMARE 191
extinctions 15, 18
Faroe–Shetland, depth–diversity trends 91–2
fish
Arctic, barcoded 193
global/Gulf of Maine numbers 52
known species of marine fish 319
fish movements and survival, Pacific Ocean Shelf Tracking Project (POST) 269–90
fisheries
cod, Grand Banks 12–13
commercial fish species on seamounts 130
deep-sea, population structure and management 108
deep-water trawling 176
haddock fisheries 11
halibut fishery 13
fishing strategies
pound nets, Limfjord 10
