Contents

List of contributors, xi
Preface, xvi

PART I: UPPER GI TRACT

1 Prokinetic agents and antiemetics, 3
   Hemangi Kale and Ronnie Fass
   Prokinetics, 3
   Antiemetic agents, 7
   Recommended reading, 14

2 Proton pump inhibitors, 15
   Wanda P. Blanton and M. Michael Wolfe
   Introduction, 15
   Mechanism of action, pharmacodynamics, kinetics, 15
   Clinical use and dosing, 18
   Adverse effects/safety, 27
   Recommended reading, 28

3 Histamine H2-receptor antagonists, 31
   Kentaro Sugano
   Introduction, 31
   Mechanism of action, 31
   Pharmacology, 33
   Clinical effectiveness, 40
   Adverse events, 41
   Recommended reading, 42
4 Prostaglandins and other mucosal protecting agents, 44
Carlos Sostres and Angel Lanas
Introduction of drug class, 44
Physicochemical properties, 45
Formulations and recommended dosages, 46
Mechanism of action, 47
Drug interactions, 48
Pharmacokinetics, 49
Clinical effectiveness, 49
Toxicity, 51
Pregnancy classes, 52
Other mucosal protecting agents, 52
Recommended reading, 54

PART II: SMALL AND LARGE INTESTINE

5 5-HT modulators and other antidiarrheal agents and cathartics, 59
Albena Halpert and Douglas Drossman
Introduction, 59
5-HT modulators used in the management of GI disorders, 59
5-HT agents approved in the US for specific GI indications, 60
Medications used for the treatment of chronic constipation, 71
Medications used for the treatment of narcotic-induced constipation, 76
Antidiarrheal agents, 76
Conclusion, 80
Recommended reading, 80

6 5-aminosalicylates, 82
Hannah L. Miller and Francis A. Farraye
Introduction, 82
Preparations, 82
Clinical use and efficacy, 84
Pharmacology: preparations and dosing, 87
Mechanism of action, 89
Bioavailability and metabolism, 89
Adverse effects and toxicity, 91
Pregnancy, 93
Drug interactions (package inserts), 94
Precautions and contraindications, 94
Special considerations: effectiveness in colorectal
cancer prevention, 96
Conclusion, 97
Recommended reading, 97

7 Imunosuppressive agents, 100
Lev Lichtenstein and Gerald M. Fraser
Introduction, 100
Thiopurines, 100
Low-dose methotrexate (MTX), 106
Calcineurin inhibitors, 111
Recommended reading, 114

8 Biological agents, 117
Gert Van Assche
Biological agents approved to treat IBD, 117
Optimal treatment strategies with anti TNF therapies in IBD, 119
Safety of biological agents in IBD, 120
Emerging biologicals, 121
Recommended reading, 121

PART III: LIVER AND PANCREAS

9 Interferons, 125
Robert C. Lowe
Introduction, 125
Mechanism of action, 125
Pharmacology, 126
Clinical effectiveness, 127
Toxicity, 128
Interferon types with generic and
brand names, 129
Pregnancy classes, 130
Initial interferon dosing regimens for chronic hepatitis C, 130
Recommended reading, 131
10 Nucleoside analogs, 133
  Uri Avissar and David P. Nunes
  Introduction, 133
  Mechanism of action, 135
  Pharmacology, 137
  Clinical effectiveness, 139
  Nucleoside analogs, 141
  Nucleotide analogs, 146
  Summary, 147
  Recommended reading, 148

11 Ursodeoxycholic acid, chelating agents, and zinc in the
treatment of metabolic liver diseases, 150
  Andrew K. Burroughs and James S. Dooley
  Ursodeoxycholic acid, 150
  Treatment of copper overload, 155
  Recommended reading, 162

12 Agents for the treatment of portal hypertension, 165
  Karen L. Krok and Andrés Cárdenas
  Introduction, 165
  Nonselective beta-blockers (NSBB), 166
  Nitrates, 169
  Vasopressin analogs, 169
  Somatostatin analog, 170
  Midodrine, 171
  Albumin, 172
  Loop diuretics, 172
  Aldosterone antagonist, 174
  Aquaretics, 174
  Disaccharides, 175
  Antibiotics, 176
  Recommended reading, 177

13 Pancreatic enzymes, 179
  Steven J. Czinn and Samra S. Blanchard
  Introduction, 179
  Mechanism of action, 180
  Dosing and schedule of administration, 180
Monitoring therapy, 183
Adverse effects, 183
Recommended reading, 184

PART IV: ANTIMICROBIALS AND VACCINES

14 Antibiotics for the therapy of gastrointestinal diseases, 187
  Melissa Osborn
  Introduction, 187
  Pharmacologic properties, 187
  Clinical uses, 195
  Recommended reading, 202

15 Antimicrobials for parasitic diseases, 204
  Joachim Richter
  5-Nitroimidazoles, 204
  Benzimidazoles, 206
  Ivermectin, 211
  Praziquantel, 212
  Treatment dosages, 214
  Recommended reading, 216

16 Vaccines for viral hepatitides, 219
  Savio John and Raymond T. Chung
  Hepatitis A vaccination, 219
  Hepatitis B vaccination, 222
  Recommended reading, 227

17 Rotavirus and other enteric vaccinations, 229
  Christopher J. Moran and Esther J. Israel
  Rotavirus vaccination, 229
  Typhoid fever vaccination, 232
  Recommended reading, 233

PART V: NUTRITION AND PROBIOTICS

18 Parenteral and enteral nutrition feeding formulas, 237
  Dominic N. Reeds and Beth Taylor
  Introduction, 237
  Indications for nutrition support, 237
  Energy and macronutrient requirements, 237
Protein, 238
Carbohydrate, 239
Lipids, 239
Enteral liquid feeding formulations, 239
Disease-specific formulas, 244
Selection of an appropriate enteral formula, 245
Implementation of enteral nutrition, 245
Parenteral nutrition, 245
Summary, 247
Recommended reading, 247

19 Probiotics, 249
Christina M. Surawicz
Introduction, 249
Pharmacology, 250
Mechanisms of action, 251
Clinical indications, 251
Safety/toxicity, 255
Summary, 255
Recommended reading, 256

Index, 259
