Part One Theory and Background

Chapter 1 Professionalism in paramedic practice 3
Netta Lloyd-Jones
Introduction 4
Professionalism in paramedic practice 4
Defining professionalism 5
Professionalism as ethical practice 6
Professional identity, socialisation and culture 6
How do students learn professionalism? 7
Assessment and standards of professionalism 9
Regulatory areas, fitness to practise processes and outcomes 9
Conclusion 10
Activities 11
Glossary 11
References 12

Chapter 2 Human factors of paramedic practice 14
Sam Willis
Introduction 15
Background 16
Defining human factors 16
Human factors of paramedic practice 16
Hazardous attitudes 21
Crew resource management (CRM) 23
Conclusion 24
Activities 25
Glossary 27
References 28

Chapter 7  The role of leadership in paramedic practice
Roger Dalrymple

Introduction 86
Theories of leadership: a brief overview 88
Definitions of leadership 88
From leaders to leadership behaviours 88
Leadership styles and approaches 89
Leadership at the individual level 91
Leadership and the mentoring or supervisory role 92
Leadership and teamwork 93
Conclusion 95
Activities 95
Glossary 96
References 97

Chapter 8  Safeguarding vulnerable people
Rozz McDonald

Introduction 99
Background 99
Legislation and Policy 100
Types of abuse and neglect 101
Recognising abuse and neglect 103
How do you assess seriousness? 109
Practice principles of safeguarding 109
Paramedic responsibilities 109
Responding to abuse and neglect 111
Conclusion 112
Activities 112
Glossary 113
References 114

Chapter 9  Introduction to medicines in pre-hospital care
Edward England

Theories and principles 117
Cardiovascular system 121
Parasympathetic nervous system 122
Sympathetic nervous system 122
Antiarrhythmics 124
Angina and hypertension 124
Left ventricular failure (LVF) 125
Respiratory system 125
## Contents

- Endocrine system 126
- Pain 128
- Nausea and vomiting 131
- Conclusion 133
- Activities 133
- Glossary 133
- References 134

### Chapter 10  The role of reflection in paramedic practice

*Sally Markwell, Andrew Kerry*

- Introduction 137
- ‘Reflection’: what are we talking about? 138
- Models and methods of reflection 139
- From models to methods and skills 143
- Becoming a reflective practitioner in paramedic practice 145
- Conclusion 146
- Activities 146
- Glossary 148
- References 148

### Chapter 11  Research methods and paramedic practice

*Jan Davison-Fischer, Catherine J. Davison-Fischer*

- Introduction 151
- Qualitative and quantitative research 151
- Ethics 152
- Literature reviews 154
- Case reports 155
- Case control studies 155
- Questionnaire studies 155
- Interview studies 158
- Focus group studies 158
- Observational and participatory studies 159
- Before-and-after studies and routinely collected data 159
- Randomised controlled trials 159
- Longitudinal cohort and panel studies 160
- Conclusion 160
- Activities 160
- Glossary 161
- References 162

### Chapter 12  Using simulation to educate the pre-hospital healthcare professional

*Clair Merrimen*

- Introduction 164
- Definition of simulation 164
- History of simulation 165
- Simulation and paramedic practice 166
### Contents

- The simulated learning environment 166
- Pedagogic principles of simulation 167
- Types of simulation and equipment 170
- Getting the most out of simulated sessions 172
- Conclusion 175
- Activities 175
- Glossary 176
- References 177

### Part Two  Assessment and Application

#### Chapter 13  Trauma  181

*Charlie McGurk, Sam Willis*

- Introduction 182
- Head injuries 182
- Facial injuries 185
- Neck and back injuries 186
- Chest injuries 187
- Abdominal injuries 188
- Pelvic injuries 190
- Limb injuries 190
- Upper limb injuries 191
- Conclusion 192
- Activities 192
- Glossary 193
- References 194

#### Chapter 14  Pre-hospital electrocardiography  195

*Nathan Puckeridge*

- Introduction 196
- What is an ECG? 196
- The P, Q, R, S and T waves 197
- Evaluating the ECG 198
- Heart rate 198
- Heart rhythm 198
- The ‘P’-wave 198
- The ‘QRS’ complex 199
- The ‘T’-wave 200
- The ‘PR’ interval 200
- Atrioventricular (AV) heart blocks 200
- Performing and reviewing a 12-lead ECG 201
- Acute coronary syndromes and the ECG 203
- Idioventricular rhythm 204
- Bundle branch blocks 204
- Conclusion 205
Chapter 15  Assessing the cardiac system
Mark Ives, Sam Willis

Introduction 209
The heart 209
Common cardiac conditions 211
Patient assessment 215
Conclusion 220
Activities 221
Glossary 221
References 222

Chapter 16  Assessing the nervous system
Clair Merriman

Introduction 224
The nervous system: structure and function 224
Central nervous system 225
Peripheral nervous system 228
Upper and lower motor neurones 230
The history and physical examination 231
Detecting increased in intracranial pressure (ICP) 239
Conclusion 240
Activities 240
Glossary 240
References 241

Chapter 17  Assessing the abdomen
Matthew Faulkner

Introduction 243
Abdominal anatomy and physiology 243
History-taking 247
Abdominal physical assessment 251
The nature of abdominal pain 253
The acute abdomen 256
Important abdominal pathologies 256
Conclusion 258
Activities 259
Glossary 260
References 261

Chapter 18  Respiratory assessment
Dan Staines

Introduction 263
Anatomy of the respiratory system 263
Lungs and pleural membranes 265
Mechanism of breathing 265
Pathophysiology of respiratory conditions 266
Respiratory system assessment 266
‘Eyeballing’ the scene (also known as a global overview) 267
‘Eyeballing’ the patient (patient assessment triangle) 267
Primary survey 269
Subjective history 269
Secondary survey 270
Chest examination 273
Conclusion 279
Activities 279
Glossary 280
References 280

Chapter 19  Paramedic skills 281
Roshan Raja
Introduction 282
Airway 282
Ventilation 291
Circulation 292
Conclusion 296
Activities 296
Glossary 298
References 298

Chapter 20  Pre-hospital obstetrics 300
Robb Kightley
Introduction 301
Normal (physiological) birth 301
Birth phases 302
Preparing for the birth 304
Paramedic intervention following normal childbirth 306
Birth complications 307
Conclusion 311
Activities 311
Glossary 312
References 313

Chapter 21  Paediatrics 314
Sam Whitby
Introduction 315
Paediatric anatomy and physiology 315
Pediatric examination 317
Paediatric assessment triangle (PAT) 318
Paediatric emergencies 320
### Chapter 22  Managing medical emergencies  
**Bonita Baber, Sam Willis**
