INDEX

A
Aboriginal. See Indigenous
Accountability
for compliance, 111, 427–428
focus on in the 1980s, 20
limits of, 194, 223–224, 428–430
need for buy-in, 100
using performance indicators, 55, 76, 417, 428–430
Activities
change mechanisms and, 303–305
comparing activities with what is needed, 43, 62, 232, 303–305
complicated and complex aspects and, 9, 72–74, 77, 79, 81, 82–83, 266, 271
definitions, 27–30
identification of, 230–231
levels of, 76–77
mature workers employment program, example of, 233–235
outcomes matched to, 16, 43, 79, 179–180, 194, 231–232, 298, 301–305
relevancy of, 9, 43, 176, 181
Activity traps, 42–43, 180
Adaptation
of programs, 10, 64–65, 83, 112–113, 192, 266, 270, 316, 443
Advisory program archetype. See Information program archetype
Ajzen, I., xxiv, 320, 324
Alternatives
complex representations, 265
explanations, 496–498
outcomes chains, 17, 19–21, 32, 38, 42, 192–195, 236
review-based, 313–314
stakeholders’ input, 145
success measures, 104–105
theories as, 130, 133–134
Amalgamated theories, 132–133, 302–303
Appraisal of programs, 10, 64–65, 83, 112–113, 192, 266, 270, 316, 443
Advisory program archetype. See Information program archetype
Articulating mental models
nonstaff partners, 106–107
partner inclusions in, 107–108
processes for eliciting, 120–127
program participants, 105–107
stakeholders and, 102–105, 116, 313
Aspen Institute Community Builders Theory of Change, 20, 26, 398, 400–401
Assumptions
activities-factors comparison, 232–233
challenging of, 62, 83, 99, 106, 108, 123, 125, 162, 188, 190
identification of, 236
incorporation of, 223
in logic models, 17, 22
mature workers program, example of, 222
program factors, 217–219
testable, 218
Attributes
identification of
documentation review, 214
outcome definitions, 211–212
possible features, 213–214
realistic expectations, 216
relevant literature, 216
social justice considerations, 214–216
stakeholder consultations, 214
term definitions, 211
use for choosing what to measure, 209, 423–424, 429–431
use for program design, 209
ways to identify, 211–216
mature workers program, example of, 206–207
outcomes and, 204–208
selection of, 207–208
stipulation of, 209–210
use for program design and choosing what to measure 209, 423–424, 429–431
use of evaluation within an organization, example of, 212
Baseline data, 150
Because statements, 303, 307
Behavior motivation
  application of, 359
  carrot approach to, 359
  stick approach to, 363
Behaviors
  information program archetype for, 356
  intentions and, 324
  partners, 106–107
  stages (See Stages of change theory)
Bennett, C. F., 19, 353, 394
Bennett’s hierarchy, 19, 22, 353, 391, 393–395, 398, 502
Beyond-focus outcomes, 172–173, 184, 224–225
Black box, 4–6, 51
Broad strategy, 60–61
Bronfenbrenner, U., xxiv, 322, 339–341
Busyness measures, 42–43, 179–180

C
Carrots and sticks programs
  carrot approach, 359, 361–363
  generic outcomes chain for, 358–359, 364
  overview of, 357–358
  performance pay system, example of, 360
  stick approach, 363, 365, 367
Case management archetype
  application of, 369
  characterization of, 368–369
  evaluation of, 369
  function of, 367–368
  generic outcomes chain for, 368
  independent living skills, example of, 368
  mature workers, example of, 235
  problem gambling, example of, 368
  rehabilitation program, example of, 368
  requirements of, 370
  stages of change theory for, 329
  theories of change and, 370
  types of, 368–369
Causal analysis. See Causal inference
Causal attribution, 41, 470–471. See also Causal inference
Causal contribution, 223, 470–471, 472. See also Causal inference
Causal factors, 157–158
Causal inference
  application of, 469
  assumptions of, 41
  checking for congruence in approaches, 477–479
  comparisons of, 476–477
  defined, 473
  outcomes and, 479–482
  participant input, 487–488
  Rural Health Promotion project, example of, 482–485
  statistical model vs. actual results, 486–487
  counterfactual comparisons
    comparison groups for, 490–492
    control groups for, 488–489
    methods, 488–489
    in econometrics, 471–472
    evaluation plans and, 464
    framework for, 473–477
    myths about, 470
    overview of, 469–470
    pragmatic approach to, 472–473
    scientific approach to, 471–472
    terminology, 470–471
Causal mechanism
  apple consumption, example of, 11–12
  articulation of, 7
  identification of, 12
  pipeline models and, 247
  realist matrices and, 242–243, 248–249
  sufficiency of, 305
Causal pathways. See Causal strands
Causal strands
  dead-end, 280–381
  logic model, 388
  representation of, 259–264
Causation. See Causal inference
Chain of objectives, 16–17
Change trajectory
  complex interventions, 89
  complicated interventions, 89
  simple interventions, 88–89
Charities evaluation planning triangle, 391
Chen, H., 19–20, 24, 312
Child development, 339–341
CIPP model, 17
Clark, H., 26
Clients. See Program participants
Closed system, 170
Cognitive dissonance theory, 324
Collaborative approach, 97–98, 120, 188, 294, 410, 411, 518
Collaborative outcomes reporting technique (CORT), 503
Communication
  effective, 232, 257
  intent, 62
  knowledge pattern in, 336
  by opinion leaders, 336
  outcomes chains and, 223
  public
    campaigns, 173, 225
    objectives of, 172
    resources for, 158–159
    review of, 162
    theory of change and, 169
  rationale, 62
  simplicity in, 186, 192
  support for, 286–287, 300
  tools, 62, 96
  two-way, 338
Communication channels, 356
Community capacity-building programs application of, 373
  defined, 370
  empowerment theory for, 334–335
  generic outcomes chain for, 371–372
  logic model for, 271–272
  Stronger Families and Communities Strategy, example of, 371
  theories of change and, 374
Community-level change, theories of, 322
Comparisons
  activities with factors that affect success, 232–233
  availability of, 207
  causal inference congruence, 476–477
  common types of, 434–437
  counterfactual, 488–492
  groups, creation of, 490–492
  identification of, 207–208
  mature workers program, examples of, 206–207, 437–438
outcomes, 205, 232
as part of a performance information system, 434–438
performance, 434–437
pipeline logic models outcomes, 243–245
program participants, 488
resources, 232
success criteria, 205
trajectory, 492
Competing imperatives, 75–76, 90, 456, 457, 461
Competing program theories, 131–134
Competitive programs, 377
Complex adaptive systems (CAS) analysis, 343
Complex interventions
assessment of, 162–163
change trajectory of, 89
characterization of, 76–77
conceptualizing, 70–72
consistency in, 83–84
emergent outcomes in, 77
governance of, 81–82
Apollo 11 moon mission, example of, 81–82
objectives of, 77–78
program evolution in, 78–80
type of program theory required, 79–80
Complex program theory
counterfactuals and, 495
evaluation of
characteristics overview for, 456–459
implications for, 455, 460
stronger families/communities example, 461–462
representations
network theory for, 346
options for, 264–265
outcome chains, 273
overview of, 264
systems theory and, 273–277
Complexity. See also Complex interventions; Complex program theory
complexity theory, 70–72
need for agile heuristic, 79–80
need for multiple program theories, 96
and wicked problems, 162–163
Complicated interventions
assessment of, 162–163
change trajectory of, 89
characterization of, 75–76
conceptualizing, 70–72
consistency in, 82–83
disaggregating results for, 484–488
governance of, 81
implementation context, 88
necessariness of, 84
participant characteristics, 88
success of, 87–88
sufficiency of, 85–88
Complicated program theory
evaluation of
characteristics overview for, 456–459
implications for, 455, 460
stronger families/communities example, 461–462
representation of
causal strands in interventions, 259–261
context-dependent interventions, 261
organizations working in parallel, 254
overview, 251
sequential interventions, 254, 258, 260
Complications, 493–495

Confrontational, 71–72
Conflicting program theories, 131–134
Congruence, 473–479
Consequential progression, 285–286
Consistency
complex interventions, 83–84
complicated interventions, 82–83
defined, 82
simple interventions, 82
Context
adapting program theory to suit different, 6, 9, 145–146, 223
CIPP model, 17
correlation of, 307–308
cultural, 97, 320
differential results in different, 6, 8, 12, 88
influence of
implementation environment, 88, 261–264
other interventions, 85–88, 254–259
participant characteristics, 88
realist matrices, 248–249
realist synthesis, 515
reasoned action and, 323
socioecology theory, 339, 341
stages of change theory, 331
unpredictability of, 49
Contracted programs, 62
Contribution analysis, 171, 472
Control groups
Comprehensive Child Development Program, example of, 493–494
counterfactual comparisons, 489–490
creation of, 489–490
identification of, 491
use of, 490–492
CORT. See Collaborative outcomes reporting technique (CORT)
Cost-benefit analysis, 33, 63, 84, 126, 300, 311, 326, 353, 380, 449, 455, 494
Costs of developing program theory, 141–144
Counterfactuals
comparisons of, 488–492
complexity and, 495
complications, 493–494
defined, 49
trajectory changes in, 492–493
Creative tensions, 117
Critical reviews. See also Desk reviews
causal inference, 474
defined, 495
documentation, 114–115
general literature, 115
methods for, 495–496
program theory development, 99–100
Critiques. See Desk reviews
Culture
focus on individual or community, 320
influence on processes, to develop program theory, 97
in socioecological model, 339–340
of success, 277
D
Data collection
baselines, 150
design and methods, 211, 411, 451–455
Davidson, E. J., 21, 59, 470, 472–473, 501
Dead-end causal strands, 280–381
Deductive approach
documentation and, 108, 111
domestic violence program application, 108–111
outcomes chain, 188
priorities identification and, 176
source information for, 114–115
stakeholders and, 161
Dependent variables, 327, 343–344
Desk reviews. See also
Critical reviews
alternative solutions based on, 313–314
causal inference, 477
documentation, 114–115
external validity criteria
accepted theories and, 306–307
context considerations, 307–308
ethical base for, 309–310
evidence base for, 306
intended use, 310
mechanisms, 308–309
products’ value and, 311
risks of, 311–312
function of, 294–295
general literature, 115
internal validity criteria
activities and, 301–305
change mechanisms, 303–305
description clarity, 296–297
outcomes chain, 298
outcomes’ relationships, 301–305
program components, 302–301
program examples, 297
responding to, 314–315
stakeholders’ role in, 312–314
theory of reasoned action, 324
timing of, 293–294
Deterrence, defined, 365
Deterrence programs
antilittering, example of, 383–384
application of, 36, 365
development of, 363
generic outcomes chain for, 363
random breath-testing, example of, 364
Developing program theory
approach selection, 113–114
articulating stakeholder mental models, 105–108
domestic violence program, example of, 104, 105–106, 107
substance abuse treatment and prevention, example of, 116
associated challenges, 128–130
combined approach, 114
drug treatment and prevention program, example of, 114–116
extension program for farmers, example of, 114
deductive development, 108–114
domestic violence program, example of, 108
substance abuse treatment and prevention, example of, 114–115
inductive development, 111–114
substance abuse treatment and prevention, example of, 115
involving critics, 101
evicting antisocial public housing tenants, example of, 101
iterative process in, 114
selecting approach, 101–102, 114, 120
Development
emergent program theory, 267–269
evaluation framework, 63–64
logic models, 40
outcomes chain approaches to, 181
clustering, 184
feedback loops, 186–187
if-then statements, 184–186
list preparation, 182–184
validation, 187–189
program theory
absence of evidence, 134–135
conflicting theories, 131
critics’ role in, 99–100
deductive approach, 108
divergent perspectives, 128–130
empowerment theory and, 334–335
engagement issues, 139–141
evaluators’ role in, 99–100
mental models approach, 102–108
methods documentation, 146–147
network theory, 344
nondisclosure, 135–139
ongoing aspects, 144–145
options for, 95–97
planned development theory and, 325–326
process of, 96
reasoned action theory and, 325–326
relevancy, 145–146
staff role in, 98–99
stages of development and, 329–334
stakeholders’ role in, 100–101
theorists’ role in, 99–100
time and resource investment in, 141–144
unintended outcomes, 131–134
technology, 411, 413–414
Differential effects, 6, 8, 12, 88, 156
Diffusion theory
communication channels in, 336
curve for, 338
defined, 322
information program archetype and, 357
key concepts of, 335–338
limitations of, 338–339
outcomes measurement and, 339
overview of, 335
related theories of, 335–338
social systems members, 336
time dimensions, 337–338
use for developing program theory, 339
Direct service delivery programs
approaches to, 381–382
art gallery, example of, 375
avoiding prejudice in, 215
characterization of, 374
electricity subsidy, example of, 375
avoiding prejudice in, 215
characterization of, 374
generic outcomes chain, 376–377
essential or non-essential, 379
generic outcomes chain, 376–377
monopolistic or competitive, 377–378
principles for, 235
subsidized or self-sufficient, 378–379
theories of change and, 380
universal or assessed eligibility, 379–380
Disadvantaged groups, services for
equity of access in, 215–216
realistic expectations, 217
relevancy of, 215
self-respect/dignity in, 216
Divergent perspectives, 128–130
Documentation
assumptions, 40–41
deductive approach to, 108, 111
domestic violence program, 109–110
methods, 146–147
partnership programs, 114–115
review of, 114–115, 214
Domestic violence cash payment program
logical analysis applied to
deductive approach, 108–111
inductive approach, 111–113
review-based alternative solutions for, 313–314
stakeholders’ perspective, 104
theory in action, 111–112
workshop processes, 123–124
