algebraic system, 130
asymptotic stability, 155
autoregressive process, 312

balance law, 18
basin of attraction, 176
Bayes' theorem, 197, 198
Beddington model, 119
Bendixson–Dulac theorem, 168, 182
Beverton–Holt model, 59, 94
bifurcation, 69, 173
birth process, 325
bootstrap estimate of bias, 282
bootstrap method, 276
Brownian motion, 334
budworm model, 76

carrying capacity, 62
center, 161
Central Limit Theorem, 216
Central limit theorem, 250
chaos, 91
characteristic equation, 136, 159, 321
coefficient of variation, 41, 221
conditional probability, 195
confidence interval, 251, 257
bootstrap, 279
bootstrap t, 282
contingency table, 264
correlation coefficient, 48, 241
covariance, 238, 239
covariance matrix, 241, 242
critical point, 151
discrete models, 115
cumulative distribution, 205, 207
DeMorgan's laws, 194
density independent, 60
derivative, definition, 8
diagonalization, 138
difference of means, 292
paired data, 294
differential equation, 19, 28
diffusion equation, 333
dimensionless variables, 37
discrete nonlinear systems, 115
distribution
Bernoulli, 221
binomial, 222
chi-squared, 209, 255
exponential, 207
gamma, 208, 254, 357
geometric, 223
hypergeometric, 225
joint, 233
lognormal, 211, 219
marginal, 234
multinomial, 225
negative binomial, 223, 224
normal, 203
Poisson, 117, 224
Rayleigh, 220
t, 255
uniform, 208
eigenvalue

discrete model, 90
dominant, 104
eigenvalue problem, 135, 159
eigenvector
left, 108
elasticity, 110
elasticity matrix, 110
epidemic model, discrete, 120
equilibrium, 62, 88
stable, 63
unstable, 63
equilibrium solution, 151
erf function, 337
Euler algorithm, 30, 186
Euler–Maruyama method, 338, 411
event, 189
expected value, 210, 220, 236
falling fruit model, 183
Fokker–Planck equation, 352, 354
functional response, 73

gambler's ruin, 319
gamma function, 255, 357
Gauss model, 184
genotype, 199
Gompertz model, 72

Hardy–Weinberg law, 202
hazard rate, 216
heat flux, 26
Heaviside function, 237
homeothermic, 25
Hopf bifurcation, 176
hypothesis
alternative, 268
null, 268
one-tailed, 269
two-tailed, 269

independent events, 195, 236
independent random variables, 236
independent sets of vectors, 135
initial value problem, 28, 151
interevent time, 329
isolated equilibrium, 155
Itô differential equation, 338
Itô stochastic integral, 340
Itô's identity, 347
Jacobian model, 76

Jury matrix, 116, 157
Jury condition, 111
Jury conditions, 117, 119
Kolmogorov equations, 327
Kolmogorov theorem, 181

Langevin equation, 337
least squares, 45
Leifkovitch matrix, 106
left eigenvector, 108
Leslie diagram, 106
Leslie matrix, 106
level of significance, 270
likelihood, 227
fitting data, 229
limit cycle, 175
Lincoln index, 227
linear orbits, 160
linearization, 68, 157, 165
discrete models, 90
logistic model, 57
Malthus model, 60
marginal density, 235
mark and recapture, 226
mathematical model, 1
matrix
augmented, 132
coefficient, 130
determinant of, 128
identity, 127
inverse, 128
main diagonal, 125
singular, 128
square root, 345
mean, 41, 248
mean-square convergence, 340
metapopulations, 81
metered model, 59
Milstein's method, 341, 409
moment, 210
moment-generating function, 218
mutually exclusive events, 194

Newton's law of cooling, 28
Nicholson–Bailey model, 117, 214
node, 160
noise, 332
nonparametric bootstrap, 277
nullcline, 146
nullclines, 154
orbit, 115, 151
