Subject Index

A
Abstract, defined, 199
Academic institutions, Persuader’s affiliations with, 171
Accelerated Reader program, 197
Accuracy, and beliefs, 50–51
Alabama, University of (Huntsville), business relationship with Dohrmann, 168–169
American Educational Research Association (AERA), 181
American Physical Society, 104
Analysis, levels of, 120–126
Analyze it process, 183–205;
Brain Gym, 183–185, 200;
breakthroughs, 190–191;
double-checking experience, 188–190; evidence, evaluation of, 191–196; misremembering experiences, 186–187; research studies, finding/interpreting, 196–205; testimonials, 194–196; use of term, 26–27; using experience, 185–191
Applied research, 109–110
Applied science: artifacts, 112; goal of, 114; relationship between basic science and, 109–112
Architects, multiple goals of, 221
Astrological theory, failings of, 95
Attractive people, and unconscious persuasion, 38–39
Authority: believing someone based on, 170; conflicting authorities, 176–178; failure of, 169–171; marginally useful guides, 171–173; misapplied scientific expertise, 175–176; misunderstood claims, 174–175; situations in which arguments can go wrong, 178; useless guides, 173–174; What Works Clearinghouse (WWC), 181; work in educational research, 178–182
Autism spectrum disorder (ASD), 17–21; behavioral therapy for, 17, 17–18; fringe treatments, 18–19; immunoglobulin, 18
Autopilot, 42–43; and engagement in complex behaviors, 32–33

B
Background, judging, 176
Basic mental process, using Latin to train with content-free exercises, 160–161
Basic research, 109–110

Basic science: artifacts, 112; how to use/respond to facts from, 115; levels of analysis, 120–126; outer environment, 119–120; relationship between applied science and, 109–112

Basic scientific knowledge, drawing on, 113–127

Belief: and emotions, 54–56; fuel for, 1–2; motivation for, 50–51; and science, 57–79; and self-identity, 51–52; and social ties, 53–54; and values, 52–53; as a web, 50

Benefit vs. belief, 194–195

Best Evidence Encyclopedia, 181

Bias, 57–58; confirmation, 46–49, 102; in messages, 2

Birth order, impact of, 91–92

Body Heat (movie), 100

Brain, and TV watching, 73–74

Brain-based education products, 73

Brain games software packages, 160

Brain Gym, 183–185; adoption of, 185; Brain Gym Journal, 184; support of effectiveness of, 200; training, 200; unsubstantiated scientific claims, 184–185; Web searches, 184; Web site, 183–184, 200

Breakthroughs, 190–191

Bright Beginnings, 199

Change, See also Persuader: amounting to classroom micro-management, 157; breakthroughs, 190–191; chain of influence, 156; defined, 136; effectiveness of, 207; evaluating, 158; extravagant claims about, 159–160; failure of, 210; lacking evidence to support it, 168–169; of placing an interactive whiteboard in a classroom, 156; promising to improve a skill, 163; promising to remediate a problem, 163–164; research based, 196; urging project learning/group learning, 156–157; using your experience, 185–191; without scientific backing, 212

Charter schools, public schools compared to, 94

Christian scriptures, and wisdom, 60–61

Cluster sampling, 98

Coca-Cola: New Coke, 41; taste-test experiments, 41

Cognitive dissonance theory, 82–83, 159; core of, 82; criticism of, 85

Comparison groups, 200–201

Complex behaviors, and consciousness, 33

Confirmation bias, 46–49, 102

Convenience sampling, 98

Core Knowledge Foundation, 126

Correlation vs. causation, 98

Credibility, and familiarity, 36

Critical thinking: applying a strategy, 162–163; and factual knowledge or information, 221–222; and subject matter, 161–162
D
Decision maker: acting as, 27–28; posing questions to, 27
Deism, 68
Differential attrition rates between groups, 97
Disputations, 61
Dissonance, and conflict, 85–86
Do-it-yourself School mission statement, 116
Dore Program, 197; logic behind, 193–194
Doubt, 62
Dr. Laura Program, 175–176

E
Education: and advances in science, 218; chain of influence in, 155–156; comparison to architecture, 221; comparison to medicine, 220–221; decisions, 207; and delivery of information, 145; and government regulations, 94–95; and scientific advances, 218, 222
Education decisions, 207
Education Resources Information Center, 197
Education system, levels of, 23
Educational research: basing policy on, 219; criticism of, 172–173; personal Web sites for download of articles written, 199; settled truth, 180; skill of, 180; suggestions, interpretation by parents/teachers, 180; suspicion of, 177
Educational research study problems: carryover effects in repeated testing, 99; cluster sampling, 98; convenience sampling, 98; correlation vs. causation, 98; differential attrition rates between groups, 97; experimenter expectancy effects, 97; haphazard sampling, 98; non-representative volunteers, 98; purposive sampling, 98; quota sampling, 98; random sampling, 98; regression toward the mean, 99; Simpson’s paradox, 97; stratified sampling, 98
Educational researchers, compared to fields of trustworthy experts, 178–179
Educational programs, with Romantic sensibility and Enlightenment-style scientific proof, 78–79
Edwards’ syndrome, 16
Emile (Rousseau), 75
Emotional conditioning, 39–41
Emotions, and beliefs, 50, 54–56
Empirical nature of good science, 216
Enlightenment: and the intellectual elite, 67; peripheral cues, 78
Enlightenment thinking: divine nature, 68; and first meta-belief, 58–59; on knowledge, 62; meta-beliefs, 71–72; nature as a mechanism, 67–68; nature’s closeness to the divine, 68; pervasiveness of, 67–68; Voltaire on, 65
Epic skyscraper (Miami FL), 128–129
ERIC, 198–199; downloading articles from, 199
Ethicology, 88–89
Evaluation of research, See Research-based studies: attention, 43–44; bias, 45–50;
confirmation bias, 46–49; stereotypes, 47; strength of an argument, 45–50; stumbling blocks, 43–50
Evidence: evaluation of, 191–196; scientific, 12, 24–25; in sixteenth-century European culture, 59–60; testimonials, 194–196
Expectations, 159
Experience: being misled by, 186–187; breakthroughs, 190–191; double-checking, 188–190; misremembering, 186–187; using, 185–191
Experiment on a Bird in the Air Pump (Wright), 67
Experimenter expectancy effects, 97

F
Factcheck.org, 55
Factual knowledge, and critical thinking, 221–222
False beliefs, protecting ourselves from, 57–58
Falsifiable nature, of good science, 217
Familiarity, 36–37; and credibility, 36
Feedback, 117–119, 126, 164; and complex actions, 118; in education research, 118–119; functions of, 117; providing information for ongoing correction, 117–118
Fibonacci arc, 6–8
Fibonacci sequence, 6–7
Flashpoint blog Web site, 168
Flip it process: combining framing effects, 149–152; common
neuroscientific claims stripped, 154; old/familiar claims, 153; outcomes, 146–148; suggested steps, 164–165; use of term, 26; vague claims, 153–166; what you’re to do, 148–149; writing down thoughts about action steps, 165–166
freechecklists.net, 214
Fusion vs. fission, at nuclear power plants, 100–102

G
Galileo Gambit, 173–174
Golden Ratio, 2–11; in classical architecture, 3; dimensions of books/magazines corresponding to, 9–10; interpretation of the aesthetic value of, 8; invalidity of, 11; observed in nature as a spiral, 6; persuasion, connection to, 8, 11; and ratios of body parts, 5–6; rectangles, 11; in Western art, 4
Good observation in science, 89–91
Good science, 88; cumulative nature of, 95; empirical nature of, 216; falsifiable nature of, 217; measurability of, 216; principles of, 103–104, 208–209
Google, 197–198; searching for author name on, 199
Government agencies, affiliations with, and Persuaders, 171

H
Haphazard sampling, 98
healthfinder.gov, 104
Heaven’s Gate religious cult, 194
Herbal remedies, 74
Hidden persuaders, identification of, 2–11
Hidden potential/power, and the Romantic period, 69–70, 76
Homeopathy, 72–73
Homosexuality, beliefs about (example), 55–56
Honda, dating-investment strategy in advertisement, 38–39

I
Ignored messages, influence of, 2
Imaginary Invalid, The (Molière), 192
Imitation of behaviors, and social interactions, 33–34
Impromptu, in music, 69
Inner environment, 120, 126, 127
Interactive whiteboard, defined, 156
Intuition, 69

J
Johns Hopkins University School of Education, Best Evidence Encyclopedia, 181
Just-world belief, 49

K
Kindred Spirits (Durand), 69

L
Language Experience technique, 157
Latin, difficulty in learning, 160–161
Learning styles: child vs. adult reading styles, 13–14; main cost of, 13; theories of, 12–13

M
Math curricula, factors to equate when comparing, 163
Measurability: of good science, 216; and scientific investigation, 91
Measurement, importance of, 89–91
Medical News Today, 139
Medieval thought, 62
Memorization, and reading, 14
Meta-analyses, and homeopathic remedies, 72
Meta-beliefs, 49–50, 58–59, 65–66; and catchphrases, 59; “natural is good,” 74–75; personal experience, 58; reasoned thought and scientific method, 58; in today’s education, 71–79; and worldview, 59
Mimicking of behaviors, and social interactions, 33–34
Mixed data, 94
Multiple intelligences theory (Gardner), 115, 174–175
Music Man, The (musical), 159

Left Back (Ravitch), 16
Leonard and Gertrude (Pestalozzi), 75
Levels of analysis, 120–126; content knowledge, 125–126; and educational psychology, 125; evaluating an education product claim, 125–126; false claims, 126; practice, importance to learning, 125
Life Adjusting Movement, 96
Life Success Academy, Super Teaching program, 168–169
N
National Academy of Sciences, 107
National Center for Education Statistics, 46, 149
National Council of Teachers of Mathematics, 219
National Institute of Child Health and Human Development, 40
National Institutes of Health, 46, 197
National Mathematics Advisory Panel, 180–181
National Science Board, 107, 108
Neptune, discovery of planet, 94
Neuroimmunopathology Laboratory, 45
Neurophilia, 73
New Organon, The (Jardine/Silverthorne), 61
No Child Left Behind Act (2002), 71
Nonrepresentative volunteers, 98

Pegboard experiment (Festinger), 84–85, 159
Penicillin, 108–109
Peripheral cues, 43, 45, 57, 146; to boost credibility of education programs, 57–59, 75, 78–79
Personal experience, understanding the world through, 58
Persuader, See also Change: asking to explaining a Change, 192; citation of research papers, 193; confusion of label with proof, 192–193; credentials, trustworthiness of, 170, 173–174; defined, 136; degrees, 171–172; desire to appear authoritative, 146; in education, 140–141; experience of, 169; flipping claims of, 149; framing by, 148; Galileo Gambit, 173–174; pressing to explain a Change, 192; promises regarding Change, 158–159, 164; requesting report data from, 196; and risks, 152; targeting of teachers, 141–142; ways sought to establish authority, 171
Persuasion: connection to Golden Ratio, 8, 11; and educational intervention, 23–24; and similarity, 34; unconscious, 34–43
Phonics, 16
Placebos: effect, 194–195; and improved symptoms of ADHD/autism, 195
Poetry, 68–69
Policy, basing on research, 219
Politifact, 55
Ponte Fabricio, 130

O
Obsolete industries, 145
“Ode on a Grecian Urn” (Keats), 8
Old Faithful geyser (Yellowstone National Park), 64
Orton-Gillingham, 199
Outer environment, 119–120, 126, 127
Owl of Minerva, 213–215
Oxford University, decree regarding Aristotle, 61

P
Pavlov’s conditioning experiments, 39–40
Peer review, 101, 198; and science, 102
Popular media, and Persuaders, 171
Principia (Newton), 65
Problem solving: deep structure of problem, making apparent, 162; and subject matter, 161–162
Prominent companies, affiliations with, and Persuaders, 171
Publications/public speaking, and Persuaders, 171
PubMed, 105, 197–199; downloading articles from, 199; peer review, 198–199
Purposive sampling, 98

Q
Questions, for decision making, 28
Quota sampling, 98

R
Race to the Top initiative (2009), 155
Random sampling, 98
Reason, understanding the world through, 58
Regression toward the mean, 99
Report data, requesting from a Persuader, 196
Research-based studies, 19–27; car purchase process (example), 21–23; evaluation of an idea’s scientific merit, 25–27; and previous research results, 21; quality of research, evaluation of, 20–21; shortcuts to getting the job done, 21–23; subject distinctions, 21; weaknesses/strengths in, 100
Research findings: comparison groups, 200–201; experiment participants, number of, 201–203; nuanced view of, 200–203; simplest view of, 199; statistical vs. practical significance, 203–205
Research shortcut, 25
Research studies, finding/interpreting, 196–205
Research, where to find, 197
Romantic period, 58, 67–71, 75; children’s natural propensity to learn, 75–76; child’s propensity to learn crushed by school routine (meta-belief), 75–76; differences in motivation while, 77; emotion, 68–69; emphasis on the individual, 76–77; hidden potential/power, 69–70, 76; mechanistic view of the universe, 68; meta-beliefs, 73–75; “natural is good” meta-belief, 74–75; nature, 73–74; negative side of schooling, 75; peripheral cues, 78; and reason, 68; reverence for nature, 75; romantic impulse, 67–71; spontaneity in, 69–70; view of nature, 68
Royal Society of London motto, 167, 177–178

S
Sampling, types of, 98
Schooling: goals of, 113–117, 119, 126; unfounded beliefs related to, 12; and values, 119
Science, See also Applied science; Basic science; Good science; Science Cycle: Americans’ view
of, 107–108; and belief, 57–79; and education goals, 116–117; how it works, 83–88; how to use, 107–132; and peer review, 102; safeguarding, 102–105
Science Cycle, 83–88, 92–93; Test phase, 127–128
Scientific consensus views, 104
Scientific evidence, 212; absence of, 12; laypeople’s view of, 24–25
Scientific expertise, misapplied, 175–176
Scientific findings, and the classroom, 25
Scientific knowledge, 212; drawing on, 113–127; static view of, 220; using to improved education, 86
Scientific method: as a cycle, 85–86; cyclical nature of, 86–87; ethicology, 88–89; inappropriate areas for, 89; and objectivity, 216; putting human experience into an experimental context, 186; testing a theory, 96–102
Scientific research: Americans’ view of, 107–109; federal expenditures on, 108
Scientific theory: provisional nature of, 86; and use of scientific knowledge to improve education, 86
Secretary’s Commission on Achieving Necessary Skills (SCANS), 96
Secretin, defined, 20
Self-actualization, 115
Self-concept, and beliefs, 51–52
Semiotics, 9
Similar-to-me effect, 42
Similarity, and persuasion, 34
Simon the Scientist/Billy the Believer, 170, 174, 176, 182
Simpson’s paradox, 97
Singapore Math, 197–198
Social interactions, and thought, 31–32
Social pleasantries, 34
Social proof, 37–38
Social ties, and beliefs, 53–54
Society for Human Resource Management, 118
Society of Clinical Psychology, 104
Spiral curriculum, 124–125
Spirals in plants, 8–9
Spontaneity, 69–70
Stratified sampling, 98
Strip it process: analogies, creating, 143–146; claims the Persuader is “like you,” 142–143; emotion, 139–142; suggested steps, 164–165; use of term, 25–26; writing down thoughts about action steps, 165–166
Subliminal persuasion, 34–35
Success, defining signs of, 158–159
Summa Theologia (Aquinas), 61
Summary volumes of research, 105
Summerhill: A Radical Approach to Child Rearing (Neill), 75
Super Teaching program, Life Success Academy, 168–169
Supernatural, use of term, 88–89
Surgeon’s checklist (Gawande), 214
Systematic manipulation, outside of our control, 2

T
“Tables Turned” (Wordsworth), 70
Teach Your Own: A Hopeful Path for Education (Neill), 75
Teachers, nonnegotiable goals for, 221
Technical jargon, 72
Temperature, significance of red and blue to, 9
Testimonials, 194–196
Theory, discarding of, 210
Trace it process, 167–182; authority, failure of, 169–178; conflicting authorities, 176–177; educational research and authority, 178–182; marginally useful guides, 171–173; misapplied scientific expertise, 175–176; misunderstood claims, 174–175; Super Teaching program, 168–169; use of term, 26; useless guides, 173–174; What Works Clearinghouse (WWC), 181
Treatise of Human Nature (Hume), 65
Trisomy 18, 16
Trust, similar-to-me effect, 42
Trustworthiness, of messages, 2
Twenty-first-century skills movement, 95

V
Vague claims, 153–166
Values, and beliefs, 51–53

W
Wayback Machine, 183
What Works Clearinghouse (WWC), 181
Whole-language reading, 15–16, 95
Whole-word reading, 15
“Why Chinese Mothers Are Superior” (Chua), 113–114
Why Johnny Can’t Read, 15
Wisdom, and Christian scriptures, 60–61
Working memory: inability to train, 161; large, and tests of reasoning, 160–161

U
Unconscious persuasion, 34–43, 41; and attractive people, 38–39; emotional conditioning, 39–41; familiarity, 36; meta-beliefs, 49–50; and people we perceive to be similar to us, 42; social proof, 37
Underpants Gnomes (South Park), 110–111, 113, 120
Uranus, irregularities in orbit of, 94
U.S. Department of Education, What Works Clearinghouse (WWC), 181
U.S. National Library of Medicine, 197
U.S. Office of Scientific Research and Development, 108

Y
Yahoo, 197; searching for author name on, 199
