5 Preparing to measure national wellbeing 146
  5.1 Towards a user requirement for measures of national wellbeing and progress 147
  5.2 Towards a framework to measure the progress of societies 152
  5.3 Constructing measures of progress and national wellbeing: Identifying and meeting user requirements 160
  5.4 Commentary 166
References 168

6 How to measure national wellbeing? 171
  6.1 Drawing on the national economic accounts 172
  6.2 Extending the national accounts 181
    6.2.1 Consider income and consumption jointly with wealth 183
CONTENTS

6.2.2 Give more prominence to the distribution of income, consumption and wealth 185
6.2.3 Broaden income measures to nonmarket activities 187
6.3 Indicator sets describing social and environmental conditions relating to wellbeing
6.3.1 Improve measures of people’s health, education, personal activities and environmental conditions 191
6.3.2 Quality-of-life indicators in all the dimensions covered should assess inequalities in a comprehensive way 193
6.3.3 Surveys should be designed to assess the links between various quality-of-life domains for each person, and this information should be used when designing policies in various fields 193
6.3.4 Statistical offices should provide the information needed to aggregate across quality-of-life dimensions, allowing the construction of different indexes 194
6.3.5 Sustainability assessment requires a well-identified dashboard of indicators 199
6.3.6 The environmental aspects of sustainability deserve a separate follow-up based on a well-chosen set of physical indicators 203
6.4 Survey-based data on subjective wellbeing 204
6.5 Developments in measuring national wellbeing and progress around the world 205
6.6 Important issues in the measurement of national wellbeing 209
