Preface ix
Introduction xi

GEOPOLYMERS AND CHEMICALLY BONDED CERAMICS

Importance of Metakaolin Impurities for Geopolymer Based Synthesis
A. Autef, E. Joussein, G. Gasgnier, and S. Rossignol 3

Mechanical Strength Development of Geopolymer Binder and the Effect of Quartz Content
C. H. Rüschert, A. Schulz, M. H. Gougazeh, and A. Ritzmann 13

The Role of SiO2 and Al2O3 on the Properties of Geopolymers with and without Calcium
P. De Silva, S. Hanjitsuwan, and P. Chindprasirt 25

Synthesis of Thermostable Geopolymer-Type Material from Waste Glass
Qin Li, Zengqiong Sun, Dejing Tao, Hao Cui, and Jianping Zhai 37

The Effect of Curing Conditions on Compression Strength and Porosity of Metakaolin-Based Geopolymers
Bing Cai, Torbjorn Mellgren, Susanne Bredenberg, and Hakan Engqvist 49

Chemically Bonded Phosphate Ceramics Subject to Temperatures Up to 1000°C
H. A. Colorado, C. Hiel, and J. M. Yang 57

Mechanical Properties of Geopolymer Composite Reinforced by Organic or Inorganic Additives
E. Prud’homme, P. Michaud, S. Rossignol, and E. Joussein 67
Evaluation of Geopolymer Concretes at Elevated Temperature
Kunal Kupwade-Patil, Md. Sufian Badar, Milap Dhakal, and Erez N. Allouche

Basic Research on Geopolymer Gels for Production of Green Binders and Hydrogen Storage
C. H. Rüschter, L. Schomborg, A. Schulz, and J. C. Buhl

Mechanical Characteristics of Cotton Fibre Reinforced Geopolymer Composites
T. Alomayri and I. M. Low

Green Composite: Sodium-Based Geopolymer Reinforced with Chemically Extracted Corn Husk Fibers
Sean S. Musil, P. F. Keane, and W. M. Kriven

Optimization and Characterization of Geopolymer Mortars using Response Surface Methodology
Milap Dhakal, Kunal Kupwade-Patil, Erez N. Allouche, Charles Conner, K. Baume Johnson, and Kyungmin Ham

Evaluation of Graphitic Foam in Thermal Energy Storage Applications
Peter G. Stansberry and Edwin Pancost

THERMAL MANAGEMENT MATERIALS AND TECHNOLOGIES

Q-State Monte Carlo Simulations of Anisotropic Grain Growth in Single Phase Materials
J. B. Allen, C. F. Cornwell, B. D. Devine, and C. P. Welch

VIRTUAL MATERIALS (COMPUTATIONAL) DESIGN AND CERAMIC GENOME

Numerical Calculations of Dynamic Behavior of a Rotating Ceramic Composite with a Self-Healing Fluid
Louiza Benazzouk, Eric Arquis, Nathalie Bertrand, Cédric Descamps, and Marc Valat

Explicit Modeling of Crack Initiation and Propagation in the Microstructure of a Ceramic Material Generated with Voronoi Tessellation
S. Falco, N. A. Yahya, R. I. Todd, and N. Petrinic

Kinetic Monte Carlo Simulation of Cation Diffusion in Low-K Ceramics
Brian Good
Effective Thermoelastic Properties of C/C Composites Calculated using 3D Unit Cell Presentation of the Microstructure
Galyna Stasliuk, Romana Piat, Vinit V. Deshpande, and Puneet Mahajan

Inelastic Design of MMCS with Lamellar Microstructure
Yuriy Sinchuk and Romana Piat

Multi-Scale Modeling of Textile Reinforced Ceramic Composites
J. Vorel, S. Urbanová, E. Grippon, I. Jandejsek, M. Maršáliková, M. Šejnoha

Numerical Estimation of the Infiltrability of Woven CMC Preforms
G. L. Vignoles, W. Ros, and C. Germain

Multiscale Extraction of Morphological Features in Woven CMCs
C. Chapouillé, C. Germain, J-P. De Costa, G. L. Vignoles, and M. Catsidí

MATERIALS FOR EXTREME ENVIRONMENTS: ULTRAHIGH TEMPERATURE CERAMICS AND NANOLAMINATED TERNARY CARBIDES AND NITRIDES

Influence of Precursors Stolchiometry on SHS Synthesis of Ti$_2$AlC Powders
L. Chlubny, J. Lis, and M.M. Bučko

XRD and TG-DSC Analysis of the Silicon Carbide-Palladium Reaction
M. Gentile, P. Xiao, and T. Abram

Modelling Damage and Failure in Structural Ceramics at Ultra-High Temperatures

Influence of Precursor Zirconium Carbide Powders on the Properties of the Spark Plasma Sintered Ceramic Composite Materials
Nikolai Voitsihtin, Irina Hussainova, Simo-Pekka Hannula, and Mart Viljus

SECOND ANNUAL GLOBAL YOUNG INVESTIGATOR FORUM

Dielectric and Piezoelectric Properties of Sr and La CO-Doped PZT Ceramics
Volkan Kalem and Muharrem Timuçin

Author Index
