Index

Page numbers in *italics* represent figures, those in **bold** represent tables

**a**
- acute chest pain 129
- adenosine triphosphate (ATP) 28
- adrenal insufficiency 41
- adrenal shock 128
- age see patient age
- airway management 115–17
  - independent oxygen supply 115
  - intermittent positive pressure device 116–17, 116
- nasopharyngeal airways 115–16, 116
- oral airways 115, 115
- suction equipment 117
- airway obstruction 122–3
- anaemia 41
- analgesia, planes of 72–4, 72
- anaphylaxis 127–8
- anatomy 13–32
- angina 129
- antecubital fossa 21
- anxiety 2
  - aetiology 2–4, 4
    - dental treatment factors 4
    - family/peer group influences 4
    - gender 3
    - psychological development 3
    - traumatic dental experience 3
  - measurement 4–5, 5
  - nature of 36
  - physiological responses 2
  - psychological responses 2
- anxiety management 1–12
- anxiety scales 5, 5
- arteries 13, 14
- aspirin 118, 119
- asthma 39, 129
- atrioventricular node 16
- attention deficit hyperactivity disorder (ADHD) 137
- autism 137
- automated external defibrillator 114

**b**
- baroreceptors 19
- basic life support 125
- behavior 6
  - nature of 6, 6
- behaviour management 6–10
  - hypnosis 10
  - permissible deception 7–9
  - positive distraction 6, 8
  - relaxation techniques 9
  - systematic desensitisation 9
  - tell, show, do 7, 8
- benzodiazepines 58–61
  - clinical effects 59
  - inappropriate administration 60–1
  - pharmacokinetics 58–9
  - side effects 60
