**a**
Absorbed energy 382
Admittance matrix
  lossy, homogeneous medium 20
  lossy, inhomogeneous medium 168
Admittance parameters
  transmission-line networks 139
Adverse health effects 312, 339, 344–347, 354, 365
Aerial mode 118, 121
Ampere’s law
  frequency domain 135, 207, 225
  lossy medium 155, 168, 207, 230, 239, 288
Analytical methods 6, 33, 82, 114, 126
Antenna
  centre-fed antenna 120, 128, 139, 145, 226, 228
  dipole antenna 6, 103, 109, 110, 133, 142, 198–200, 226, 228, 229
  linear antenna 35, 43, 45, 53, 118, 138, 139, 314
  parameters of antenna 33–35, 87, 93, 139, 163, 194, 198, 212, 225, 238, 242, 253, 263, 387
BLT equations:
  chain parameter matrix:
    phasor MTL 162, 213, 261
    properties of 93, 154, 205, 206
Boundary conditions
  Dirichlet 44, 355
  Neumann 355
Boundary element method (BEM)
  computational example 35, 42, 154, 205, 238, 253, 341, 353, 365
  discretization 167, 178, 180, 322, 323, 365
Boundary elements
  constant 95, 133, 137, 395
  isoparametric 137, 139, 210, 297, 300, 314, 353
  linear 35, 43, 45, 92, 137, 139, 178, 180, 241, 258, 264, 297, 314, 395
  quadratic 138, 139
Buried cables see Transmission below ground

**b**
Bessel function 39, 65, 94, 170, 184, 220, 254, 259, 261
Biconical transmission line 133, 144

Index

Classes of transmission lines  50, 52, 57–60, 72, 74, 75
Coaxial cable
  conductance of  142, 145
Coefficients of potential  359–360
Common-impedance coupling
time-domain solution  213
Common-mode currents
  creation by asymmetries  6
Complementary error function  44, 159
Computed results, incident field illumination  372
Conductance
  coaxial cable  132, 142, 145
two-wire line  185, 230
Conductance matrix
definition of  93, 162
MTL definition of  162
Conducted emission  35, 340
  susceptibility  35
Conduction current  21, 30
Conductive loss  155
Conductivity, effective  306
Conformal mapping method  366
Conservation law  3, 20–22
Continuity equation
  incident field illumination  361
Continuous wave  34
Convolution, incident field illumination  168, 171
Convolution integral
  lossy line solution  168
Courant condition  180
Cross-sectional dimensions
  TEM restrictions  72
Current
  common mode  12, 312
differential mode  5, 10, 43, 54, 61, 74, 292, 297, 300, 301, 322
  transmission line  93, 153, 162, 182, 212, 219, 237, 253, 261, 263, 301, 304, 313, 324, 395
d
Decoupling MTL equations
Detection  198
Differential operator  5, 6, 110, 167, 322
Direct approach  35
Displacement current  10, 11, 345
Distributed parameters  34
e
Eddy currents
Electrically-short line, incident field illumination  46
Electrically-small cross section  35, 205
Electric field, sinusoidal charge expansion
Electric flux density vector  10
Electromagnetic interference (EMI)  33–35, 122, 163
  pulse (EMP)  82, 184, 185
  wave equations  19–20, 25, 29–30
Electrostatic fields  353, 354, 360, 361
Entire domain basis functions  136, 137
f
Faraday’s law
  integral form  10
Field
  approach  4, 5, 9
Finite element method (FEM)
  weak formulation 137, 356, 368
Flux density 10, 12, 19, 25, 343, 349, 381
Fourier transform 27, 72, 153, 186, 213, 219, 223, 225, 226, 288, 299
Frequency domain modeling 199, 205–215
Full-wave approach 34, 153, 205, 216, 253, 313

Gain 142, 193, 199
Galerkin Bubnov
  Indirect boundary element method
    (GB-IBEM) 42, 154, 161, 205, 238, 253, 395
  procedure 44, 242, 367
Gauss’ law
  finite difference method 110
Gauss’ laws, time domain 201
Generalized capacitance matrix
  conversion to MTL 93
  two-conductor line 184
Global nodes, finite element method 357
Grounding
  grids 17–19, 253, 297, 298, 304, 306, 307, 309, 312
  systems 15–17, 205, 230, 237, 253–331
Grounding horizontal electrode 84, 265–272, 312, 313, 315, 316, 319, 320, 328
Ground plane, incident Field illumination

h
  Hallen integral equation 167, 168, 175, 199
  Heating 340, 345–349, 365
Human body
  average value 387
  realistic model (BEM) 365
  root-mean-square value 342
  transient current 313, 341
  transient radiation 341
Human exposure
  assessment of 349, 351

i
  Impedance, internal of wires 39, 51, 65, 79
  Impedance parameters
  Incident fields 36, 350, 351
  Incident waves 109, 199
  Indirect approach 35, 153
  Induced currents 51, 153, 300, 341, 343, 345
  Inductance matrix:
    definition of 162, 182
  Input impedance 117, 122, 134, 135, 230, 284, 285, 299, 304
Integral
  equation formulation 35, 36, 226, 230, 234, 240, 253, 254, 258, 288, 321, 322
  transform 21
Interference 163, 339
Internal inductance
  surface impedance 39
Internal inductance matrix 162

k
  Kirchhoff’s laws, transmission-line networks 298, 300, 400
Lagrange’s polynomials 45
Lagrangian formulation 45
Laplace’s equation
  finite difference method 353
  finite element method 353, 354
  transverse fields 63
Laplace transform
  in lossy line solution 63, 77
Lightning
  effects 237
  protection 237, 253, 311, 312
Lightning rod, modeling of, 225, 230–237. See also Grounding
Local nodes, finite element method (FEM) 110, 137, 138, 211, 313, 341, 353, 365
Lorentz Gauge 62, 76, 155, 168, 207, 239
Loss: conduction
  polarization 342
Lossy MTLs, decoupled 182
Low frequency field, effects of 353–354

Magnetic flux density vector 10, 19, 343
Matrix
  dense 353, 366
  finite element 356–357, 381
  global system 367
  ideal system 257, 284
  symmetric 27–29, 354
Maxwell’s equations
  differential form 10, 13, 19, 26, 33, 116
  frequency domain 169, 225, 288
  integral form 10, 11, 15, 117, 238
Method of characteristics
  for lossy MTLs 182
Method of images
dielectric half space 184, 186, 199, 200
Method of Moments (MoM)
  incident field illumination 133, 227, 368
Mixed termination representation
  incident field illumination 133
terminal constraints 134
Mode voltages and currents
  frequency domain 162, 212
Modified image theory (MIT) 77, 89, 109, 110, 216, 217, 289, 320
MTL equations
  frequency domain 162, 297
  lossy lines 182
  matrix form 181
  second-order form 301
time domain 213

Nonuniform line: approximate representation of
  definition of 347
  examples of 347
Numerical recipes
  $n + 1$ wires, inductance matrix 162

Ohm’s law 361, 388
Overhead lines. see Transmission lines above

Permittivity: complex
  or free space 235
Pocklington integral equation 36, 38, 44, 54, 64–65, 156, 240
Point matching technique 139, 264
Polarization charge 342
Polarization loss 158
Potential
  electric scalar 25, 28, 37, 51, 61
  magnetic scalar 28
Index

magnetic vector 25, 26, 28, 37, 61–63, 67, 77, 169, 207
retarded 25–26
wave equation 26, 76
Power flow 21
Poynting theorem 20, 29–30
Printed circuit board (Cont.) effective
dielectric
Galerkin method potential 137
inductance matrix 162, 182
Propagation constant
of the TEM mode 72
two-conductor line 184

q
Quadratic form, finite element method 139
Quasistatic
computational sample 35
formulation 361

r
Radiated
emission 35
field 26, 117, 120, 126, 155, 160, 161, 165, 166
susceptibility 35
Radiation
efficiency 387
intensity 348
ionizing 339, 340
nonionizing 339, 349
pollution
power density 344, 349, 350
Radio base station antenna 348
Receptor circuit, three-conductor line 87, 154, 162
Reference conductor, of MTL 57
Reflection coefficients
current 253, 254, 288
two-conductor line 36, 154, 206, 253, 256, 289
voltage 253, 254, 288
Reflection coefficient matrix 154, 206
Resistance matrix, definition of 183
Resistance, wires 153, 183, 243, 315, 325

s
Scattered fields 36, 51, 87, 154
Scattered voltage, definition 39, 45
Shielded MTLs, parameters of 94, 301
Sidefire excitation, incident field
illumination 37, 61, 388
Similarity transformation, phasor MTL
equation solution 182
Singularity 110, 358
Skin depth 12
Skin effect 186
Specific absorption 342
Subdomain expansion functions 136, 137
Superposition 168
Surface impedance, conductive half
space 39, 255

T
TEM mode of propagation, properties of 72
Thin wire
frequency domain (FD) 62, 72, 77, 133, 153, 169, 187, 205
time domain (TD) 64, 65, 78, 153, 167, 168, 185, 205, 216
Thin wire-free space (FD)
coated wire
BEM solution
computational example 360
near field 360
horizontal array
BEM solution
Computational example 360
isoparametric 353
linear 35, 178, 264
loop antenna
Thin wire-free space (FD) (contd.)
  BEM solution
    computational example 360
  single wire
    BEM solution
      isoparametric 353
      linear 35, 178, 264
    computational examples 360
  vertical array
    computational examples 360
Thin wire-free space (TD)
  computational examples 360
  energy measures
    numerical solution 86, 115, 133, 136, 167
  single wire
    electric field 87, 155, 168, 238
    nonlinear loading
      numerical solution 86, 115, 133, 136, 167
    resistive loading
      numerical solution 87, 95, 175, 300
  two coupled wires
    numerical solution 86, 115, 133, 136, 167
Thin wire-lossy half space-(FD)
  multiple wire
    computational examples 360
  single wire
    BEM solution 178
    computational examples 95
    electric field 87, 155, 168, 238
    reflection coefficient 206
    Sommerfeld integral approach 238
Thin wire-lossy half-space (TD)
  array
    numerical solution 86, 115, 133, 136, 167
    computational examples 360
  single wire
    electric field 87, 155, 168, 238
    nonlinear loading 167, 168, 205
    numerical solution 86, 115, 133, 136, 167
    resistive loading 168, 205
    two coupled wires
      numerical solution 86, 115, 133, 136, 167
  Time-Shift operator 174
  Transient
    phenomena 34
    response
      computational example 83, 223, 242, 323
  Transmission coefficients, voltage 54
  Transmission-line equations,
    two-conductor line 182
  Transmission-line networks 163
  Transmission lines-above ground (FD)
    computational examples 153
    telegrapher's equations 154
  Transmission lines-above ground (TD)
    computational examples 153
  Transmission lines-below ground (FD)
    computational examples 236
    formulation 205
    numerical solution 114
  Transmission lines-below ground (TD)
    computational examples 236
    energy measures 340
    formulation 87, 205, 230, 238
    numerical solution 87
  Triangular elements 371, 379, 389, 390
  Tube, transmission-line network 163
  Two-conductor line
    equivalent circuit 41, 55, 56, 68, 82
    frequency-domain solution 63, 66
    incident field illumination 46, 342
    input impedance of 299
    lossless line equations 41, 44, 68, 71
    phasor voltage and current of 30
power flow on 21
propagation constant of 184
series solution 325
time-domain solution 154, 213

u
UHF communications 193
Uniform line Uniform plane wave:
  frequency-domain characterization 133, 162, 219
  time-domain characterization 71, 83, 103, 168, 185, 219, 223

v
Velocities of propagation, of modes 187
Visual Numerics 193
Voltage: definition of two-conductor line 40, 54, 66
Voltages, of MTL 162

w
Wave equations, frequency domain 77, 153, 219
Weighted residual approach 137, 175, 177, 180, 211, 242, 257, 322, 356, 357, 367, 379, 391
Wide-separation approximations:
  printed circuit board 13
Wire:
  antenna 34, 35, 87, 115, 120, 132, 133, 153, 163, 168, 205, 216, 242, 243, 392, 394
  electric field of 135, 136, 213
  internal inductance of 41, 55, 56, 68, 70, 82, 93, 162, 183, 325
  magnetic field of 14, 35, 36, 51, 61, 74, 86, 87, 93, 117, 153, 154, 160, 162, 165, 167, 205–223, 342
  resistance of 71, 153, 183, 186, 187, 243, 315, 325
  scatterer 78, 82, 84, 127, 168, 216, 218
  voltage of 36, 39, 40, 51, 54
Wire above ground line:
  capacitance of 42, 43
  inductance of 42, 43

y
Yagi-Uda array 190
