## Contents

Foreword \( ix \)
Preface \( xiii \)

1 Introduction 1

2 Concerning Certainty and Uncertainty 21

3 Prevision and Probability 59

4 Conditional Prevision and Probability 113

5 The Evaluation of Probabilities 153

6 Distributions 187

7 A Preliminary Survey 251

8 Random Processes with Independent Increments 311

9 An Introduction to Other Types of Stochastic Process 393

10 Problems in Higher Dimensions 401

11 Inductive Reasoning; Statistical Inference 421

12 Mathematical Statistics 447

Appendix 475
Index 571
