amniotic fluid volume (AFV) 147
aneurysm, defined 72
fusiform 72
saccular 73, 80
thoracic aorta 32
ankle 211
anterior cerebral artery (ACA) 233, 235
anterior inferior iliac spine (AIS) 205
anterior superior iliac spine (ASIS) 327
anterior talofibular ligament (ATFL) 211
anticoagulation 230, 231
aortic dilation 35–36
aortic dissection 32, 36, 55, 57, 65, 360, 374
aortic regurgitation (AR) 57, 62, 67
aortic stenosis (AS) 57, 62
appendicitis 283–285
see also acute appendicitis
appendix 102
see also acute appendicitis; appendicitis
AR see aortic regurgitation
ARDS see acute respiratory distress syndrome
Armenia 433
atherosclerotic disease 35
ATLS see Advanced Trauma Life Support
atrial myxoma 64
atrial septal defects (ASDs) 65
attenuation 9–10
augmentation 224
axillary artery (AA) 319
b
back pain 400
Baker’s cyst 209, 211, 212, 229
basilar artery (BA) 235
Bernoulli equation 380
β-hCG 139–141, 148
biceps tendon 215, 218
biliary duct obstruction 171–173
bladder,
dysfunction 184
FAST technique 92, 94
masses and foreign bodies 186
neoplasms 186
scanning, –176–178
stones 184, 186
suprapubic aspiration 302–306
Blue Protocol 429
body mass index 353
bone, fractures 307–309, 432–433
obtaining images 307–309
bowel, gas 395–397
herniation of 200
neonatal obstruction 275
brain, death 239
injury 238, 248, 390, 426, 431, 431
parenchyma 275
brachial plexus (BP) 317–319
bronchiolitis 406–407
bronchopulmonary dysplasia (BPD) 276, 404–405
bursitis 209
calcaneofibular ligament (CFL) 211
calcaneofibular ligament (CFL) 211
calif 211–212
capnography 429
cardiac arrest 45
bedside ultrasound 367–368
FEEL protocol 371–374
protocols for evaluation of 450, 452, 453
cardiac dysfunction 360–363
cardiac massage 45
cardiac output (CO) 356
cardiac tumours 64
cardiopulmonary arrest (CPA) 355, 449
cardiopulmonary resuscitation (CPR) 372
CBF see cerebral blood flow
cellulitis 211, 212, 253, 302, 331, 421
in children 262, 263
orbital 249
central venous pressure (CVP) 53, 57, 359
cerebral blood flow (CBF) 238, 239
cervix 143, 147, 152
CFV see common femoral vein
chest trauma 15–31
wall 15–17
see also chest pain
chest pain 349
acute coronary syndrome 350
non-ischaemia-related 350–352
chest X-ray radiography (CXR) 351–354, 418–419
CHF see congestive heart failure (CHF)
China 433
cholecystitis 171
cholelithiasis 166–168
chronic obstructive pulmonary disease (COPD) 21, 23, 54, 352
coagulopathy 302
collateral ligaments 209
colon 109, 110, 111, 282, 284
common femoral vein (CFV) 222, 223, 224
common peroneal nerve (CP) 323, 325
computed tomography (CT) 83, 163, 261, 351
abdominal/pelvic 175
acute appendicitis 102
biliary pathology 163
chest 32
DVT 231
PTA 252
pulmonary embolism 26
TOA 158
concentric hypertrophy 59
congestive heart failure (CHF) 352–354
COPD see chronic obstructive pulmonary disease
cordis 200
CPR see cardiopulmonary resuscitation
cranial ultrasound 431
critically ill, the 355–368
CT see computed tomography
CVP see central venous pressure
CXR see chest X-ray radiography
cysts, Baker’s 209, 211, 212, 229
branchial cleft 255
epididymal 200
ovarian 152–156
renal, –183–184
thyroglossal 255
d
D-dimer 230
DDS see double-decidual sign
deep femoral vein (DFV) 222
depth-vein thrombosis (DVT) 211, 212, 221–231
bilateral studies 231
clinical indications 222
compression 226
distal calf 229–230
experience of scanner 230
incidental findings 229
necessary views 222
normal findings 222–224
pathology 224
scanning techniques 222–226
scanning tips 226–231
secondary findings 224–226
DEFG protocol 440–441
diagnostic peritoneal lavage (DPL) 83
diaphragm 19, 272, 341
digital tendon rapture 220
dislocation 248, 264
dissection 73–75
diverticulitis 110–113
Doppler ultrasonography, assessment of haemodynamics 382–385
continuous-wave (CWD) 382
flow measurements 381–382
flow volumes 381
LVEDD 383–384
principles 379–380
pulsed-wave (PWD) 382
qualitative (colour) 380
quantitative 380–381
’double lung point’ 276
double-decidual sign (DDS) 140–141
DPL see diagnostic peritoneal lavage
DVT see deep-vein thrombosis
dysphagia 252–253
dyspnoea 24, 54, 349, 352–354, 429
in pregnancy 401
e
ear, nose and throat (ENT) sonography 251–257
scanning technique 251–252
earthquakes 433
echo texture 9
echocardiography 47
advanced 53–67
aortic pathology 65–67
chest trauma 67
in the critically ill 50–53
normal findings 50
pericardial effusion 61–62, 67
transthoracic (TTE) 32, 36, 38, 56–57, 61, 62, 65, 67, 420
transoesophageal (TOE) 32, 36, 56–57, 61, 62, 64, 65, 67, 420
transthoracic (TTE) 32, 36, 38, 56–57, 61, 62, 65, 67, 420
ultrasound examination 47–49
valvular pathology 62–65
ventricular assessment 57–58
volume status 59–61, 427
see also Focus-Assessed Transthoracic Echocardiography (FATE);
Focused Echocardiography Examination in Life (FEEL)
echogenicity 9
EDA see end-diastolic area
EDD see end-diastolic diameter
EF see ejection fraction
ejection fraction (EF) 270
elbow 218–219
‘pulled’ 264
USG block of peripheral nerves 320–321
electromechanical dissociation (EMD) 367, 371

pulmonary fibrosis 23, 24
pulmonary function tests (PFTs) 352–353
pulmonary infarction 24
pulmonary metastases 27
pulmonary oedema 401
pulsatile flow 381–382
pulsatility index (PI) 236, 237
pulseless electrical activity (PEA) 361, 367, 371, 373, 374, 427
pyelonephritis 183
pylorospasm 282
q
quadriiceps 207
qualitative visual inspection 47, 50
r
radial head 264
radial nerve (RN) 319, 321
rectus femoris 205, 207
red blood cells (RBC) 379
reflection 9
regional anaesthesia 315–317
renal cancer, 183–184
renal cysts 183
renal failure 24, 27, 175, 183, 187, 356
renal infection 184
renal ultrasound 175–193
pathologies 180–193
scanning technique 178–180
respiratory variation 224–226
respiratory distress syndrome (RDS) 404
resuscitation 371–374
retained products of conception (RPOC) 149–150
retinal detachment 245
retrobulbar haemorrhage 249
return of spontaneous circulation (ROSC) 371
rib fractures 17
ROSC see return of spontaneous circulation
RPOC see retained products of conception
RUSH (Rapid Ultrasound for Shock and Hypotension) examination 448

s
sacral plexus (SP) 323–324
‘salami slicing’ 79
saphenous nerve (SAN) 323
sartorius muscle (SM) 325
scattering 9, 10
sciatic nerve (SN) 323–325
‘scissors manoeuvre’ 108
scrotum 194–202
SDP see single deepest pocket
sepsis 50, 57, 352, 361, 373
shoulder 213–218
dislocation 264
see also ‘shoulder sign’
‘shoulder sign’ 280
sialolithiasis 254–255
sialoadenitis 254–255
single deepest pocket (SDP) 147
skin infections 262–263
sliding lung sign (SLS) 341
SMA see superior mesenteric artery
Smith–Madigan Inotropy Index (SMII) 383, 384
SMV see superior mesenteric vein
SOAP see Sonographic Outcomes Assessment Program Trial
soft tissue, foreign body and abscess identification 331–332
infections in children 262–263
Sonographic Outcomes Assessment Program Trial (SOAP) 98
sonologists 2–3
sonology 1–3
South Africa 411, 415
splenic abscess 419
splenic infarct 419
sternum fractures 17
stroke, pre-hospital ultrasound 432
transcranial Doppler ultrasound (TCD) 237–238
stroke volume (SV) 358–359, 381
subarachnoid haemorrhage (SAH) 238
subcutaneous haematoma 211, 212
subluxation, in children 264
lens 248
radial head 264
superficial femoral vein (SFV) 222
superior mesenteric artery (SMA) 72, 77, 275, 283
superior mesenteric vein (SMV) 275, 283
suprapubic bladder aspiration 302–306
suprapubic catheterisation 302–306
suprapubic drainage 272
supraventricular 216–217, 320
surface anatomy guide (SAG) 314–315
SV see stroke volume
SVR see systemic vascular resistance
syndromic ultrasound 2
systemic vascular resistance (SVR) 382

t
tachypnoea 404
tamponade, bedside ultrasound evaluation 351, 359–360
FAST 94
TAP (Transversus Abdominis Plane) blocks 327–329
TAU see transabdominal ultrasound
TBI see traumatic brain injury
tendon injury 206, 265
tenosynovitis 220
terminal internal carotid artery (TICA) 234
testicles, injury 200
neoplasm 202
see also testicular torsion; testicular ultrasound
testicular torsion 197
testicular ultrasound 194–202
TGC see Time Gain Compensation
thigh 206–207
thoracentesis 18, 19, 299–300
thoracic aorta 32–38
anatomy 32–33
aneurysm 32, 35–36
aortic dilation 35–36
aortic dissection 36
sonographic technique 33–35
thrombophlebitis 421
thyroglossal cysts 255
tibial nerve (TN) 323, 325
Time Gain Compensation (TGC) 10
TIMI score 350
TOA see tubo-ovarian abscess
TOE see transoesophageal echocardiography
Index

torso, penetrating injury 388–390
transabdominal ultrasound (TAU), flank and back pain 400
ovarian cysts 154
pregnancy 126–129, 140–141, 143
vaginal bleeding 402
transcranial colour-coded duplex sonography (TCCS) 238
transcranial Doppler ultrasound (TCD) 233–239, 432
clinical applications 237–239
interpretation 236–237
principles of pathological findings 237
technique 233–236
transformal window 235–236
transtemporal window 233–235
trans‐hepatic catheter placement 272
transient tachypnoea of the newborn (TTN) 276, 404
transoesophageal echocardiography (TOE) 32, 36, 56–57, 61, 62, 64, 65, 67, 420
transthoracic echocardiography (TTE) 32, 36, 38, 56–57, 61, 62, 65, 67, 420
see also Focus‐Assessed Transthoracic Echocardiography (FATE)
transvaginal ultrasound (TVU) 126–127, 129, 140–141, 143
transverse scapular ligament (TSL) 320
trauma,
abdominal 386–388
chest 15–31, 67, 427
emerging roles for ultrasound 429–430
face 255–257
lungs 428–429
major 386–390
in pregnancy 401–402
traumatic brain injury (TBI) 238
TTE see transthoracic echocardiography
TTN see transient tachypnoea of the newborn
tuberculosis (TB), extrapulmonary (EPTB) 410–411
FASH scan 411–416
and HIV 410–411
tubo‐ovarian abscess (TOA) 158–161
tumours,
bladder 186
cardiac 64
eye 242, 245
lung 28
prostate 186
Turkey 433
TVU see transvaginal ultrasound
UL
ulnar nerve (UN) 319, 320
ultrasound,
definition 7
syndromic 2
see also ultrasound imaging
ultrasound‐guided (USG) peripheral nerve block (PNB) 314–329
elbow level 320–321
lower‐extremity 321–325
trunical level 325–329
upper‐extremity 317–321
ultrasound‐guided vascular access 289–295
catheter selection 294
personnel requirements 291
procedural set‐up 289–290
sterility 294
transducer selection and orientation 290–294
vessel selection 291–292
ultrasound imaging 7–10
absorption 10
attenuation 9–10
beginnings 1
‘brightness mode’ 8
depth 8
echo texture 9
field of view 8
frequency 10
reflection 9
scattering 9, 10
United Kingdom 415, 432
UPJ see ureteropelvic junction
upper limb 213–220
ureteral stones 180
ureterolithiasis 175, 178–183
ureteropelvic junction (UPJ) 175
ureterovesicle junctions (UVJs) 176, 180
USG block,
axillary (AX) 319–320
bilateral dual Transversus Abdominis Plane (BD‐TAP) 327–329
at the elbow level 320–321
femoral nerve (FN) 321
ilioinguinal/iliohypogastric (II/IH) nerve 326
intercostal nerve (ICN) 327
interscalene (ISC) 318
lateral femoral cutaneous nerve (LFCN) 322
lateral infraclavicular (LIC) 319
obturator nerve (ON) 322
rectus sheath (RS) 326–327
sacral plexus (SP) 323–324
saphenous nerve (SAN) 323
sciatic nerve (SN) 323–325
suprascapular nerve (SSN) 320
uterus 149, 152
UVJs see ureterovesicle junctions
V
vaginal bleeding 402
vascular access,
in paediatrics 272–273
pre-hospital ultrasound 430–431
ultrasound-guided 289–295
velocity-time integral (VTI) 358–359, 381
vertebral arteries (VAs) 235
visual pattern recognition skills 2–3
vitreous haemorrhage 243–244
vocal cords 272
volume status 59–61, 271, 427
volvulus 283
vomiting 401
VTI see velocity-time integral

W
wall-echo shadow (WES) 166, 169
wall motion abnormalities (WMAs) 58
World Health Organization (WHO) 410
wrist 219–220
