Altered auditory feedback (AAF), 29
advantages of, 33–4
conclusions and future directions on, 35
demonstrated value of, 32–3
positive self-report data, 33
speech naturalness improvements, 32–3
stuttered events, reduced
duration of, 32
stuttering frequency, reductions in, 32
disadvantages of, 34–5
discussion on, 35–9
forms of
delayed auditory feedback, 29
frequency altered feedback, 29
overview of, 29
theoretical basis of, 30–32
Apple iPhone, 29
Art-mediated training, 148–9. See also

Choral speech (CS), 30
Cognitive behaviour therapy (CBT), 99–100, 183
advantages of, 187
Comprehensive Stuttering Program and, 115–16
conclusions and future directions on, 188
demonstrated value of, 184–7
disadvantages of, 187–8
discussion on, 188–92
overview of, 183
principle of, 183
theoretical basis of, 183–4
Cognitive therapy, 184. See also
Cognitive behaviour therapy (CBT)
in anxiety disorders, 186
for social anxiety with stuttering, 185–6
Comprehensive Stuttering Program (CSP), 115
advantages of, 120–21
conclusions and future directions on, 122–3
demonstrated value of, 117–20
10-year follow-up results, 119–20
methods used, 117–18
previously reported outcomes, review of, 118–19
disadvantages of, 121–2
discussion on, 123–6
overview of, 115–16
phases in, 115
acquisition, 115–16
maintenance, 116
transfer, 116
theoretical basis of, 116–17
Conscious synthesis of development (CSD) treatment, 207
advantages of, 212–13
conclusions and future directions on, 213
demonstrated value of, 210–12
disadvantages of, 213
discussion on, 213–17
overview of, 207–10
assessment, 208
follow-up and maintenance, 209–10
Phase I, 208
Phase II, 209
Phase III, 209
residential therapy, 209
theoretical basis of, 210
Continuum work, 188
