### INDEX

Absorbing boundary condition:  
  - first-order, 19, 25, 55–57, 168, 170, 338, 365  
  - for Floquet modes, 325, 333  
  - for oblique incidence, 298, 306  
  - implementation of, 58  
  - reflection coefficients, 57–61  
  - second-order, 56  

Active input impedance, 301  
Active reflection coefficient, 301, 361  
Active resistance, 303  
Adaptive integral method, 91, 402  
Aggregation, fast multipole method, 402  
Anisotropic-medium PML, 64, 111  
Antenna feed modeling, 147–164  
  - current probe, 148–152  
  - voltage gap generator, 152–155  
  - waveguide feed, 155–164  

Antenna gain, 164, 259  
Antenna–platform interaction:  
  - coupled analysis, 389  
  - decoupled analysis, 405  
Antenna thickness factor, 155, 240  
AntFarm, 409  
Antipodal Vivaldi antenna, 254  
Approximate boundary condition, 19  
Archimedean spiral antenna, 207  
Array factor, 325  
Axisymmetric antenna, 264–283  

BiCGSTAB, 342, 349–355  
Bandpass filter, 195  
Basis functions:  
  - hierarchical, 50  
  - higher-order, 50  
  - interpolatory, 50  
  - vector, 22  
Biconjugate gradient method, 342  
Boundary condition, 18, 44  
Boundary integral equation, 269  
  - for periodic structures, 296  

Boundary-value problem, 18, 19  
Broadband antennas, 247  
CFIE, 82, 272, 400  
  - in time domain, 90  
CFS-PML, 74–76  
CPML, 113  
Cement element method, 352  
Central differencing, 26, 87  
Chimera grids, 126  
Conditional stability, 26, 100  
Combined field integral equation, see CFIE  
Computational electromagnetics, 1  
Conformal domain decomposition, 372  
Constitutive relation, 32, 36, 41, 310  
Convergence, numerical, 425–427  
Corrugated horn, 276  
Co-site interference, 388  
Coupling:  
  - backdoor, 188  
  - system-level, 230–234  
  - weak, 187  
Current probe, 148  
Curvilinear elements, 51  
DFD, 364  
Debye material, 33  
Degenerate finite elements, 199  
Dirichlet preconditioner, 343  
Direct solver, 49  
Disaggregation, fast multipole method, 402  
Dispersion error, 50, 168, 176, 425  
Distributed feed networks, 224–230  
  - bidirection decompositions, 225  
  - Vivaldi antenna array, 228  
  - waveguide port boundary condition, 226  
Domain-decomposition method, 336, 390, 427  
  - in time domain, 365  
  - nonconforming, 351  
  - Schwarz nonoverlapping, 351
