Preface xv
List of Contributors xix

1 The Rising Prominence of College and University Mental Health Issues 1
Jerald Kay
1.1 Introduction 1
1.2 How prevalent are emotional disturbances and mental disorders? 1
   1.2.1 Student surveys 3
   1.2.2 Counseling director surveys 7
   1.2.3 Toward a more rigorous assessment of the mental health of college students 8
   1.2.4 Alcohol and substance use 10
1.3 Study limitations 11
1.4 A developmental approach to college mental health 12
   1.4.1 Psychosocial developmental considerations 12
   1.4.2 Biological developmental considerations 13
   1.4.3 Toward an integrative approach 15
1.5 Ethical and legal issues 17
1.6 Conclusion 17
References 17

2 History of College Counseling and Mental Health Services and Role of the Community Mental Health Model 21
Paul Barreira and Malorie Snider
2.1 Introduction 21
2.2 Early development of college and university counseling centers and mental hygiene programs: pre-1945 22
2.3 Professionalism and response to increase in student enrolment 23
2.4 Formalization of roles and attention to developmental issues and prevention 25
2.5 Community Mental Health Movement 25
2.6 An example of the early application of community mental health at colleges and universities: Dana Farnsworth 27
2.7 Potential modern applications of the CHM model to educational settings 29
7 Legal and Ethical Issues in College Mental Health
Karen Bower and Victor Schwartz

7.1 Introduction 113
7.2 Conceptual framework 113
   7.2.1 Privacy/autonomy 113
   7.2.2 Campus safety/parental involvement 114
   7.2.3 Conflicting incentives and players 114
7.3 Legal framework 115
   7.3.1 Confidentiality 115
   7.3.2 Liability for suicide 123
   7.3.3 Discrimination 127
7.4 Application 129
   7.4.1 Dismissals/involuntary leaves of absence 129
   7.4.2 Reasonable accommodations 132
   7.4.3 Mandatory assessments and treatment 133
   7.4.4 Discipline/safety 134
   7.4.5 Student support committees/threat assessment 135
   7.4.6 Parental communication/notification 135
   7.4.7 Screening 136
7.5 Conclusion 138
References 138

8 Working with the Campus Community
Lorraine D. Siggins

8.1 Introduction 143
8.2 Some developmental considerations 143
8.3 The evolution of the college mental health service mission 144
8.4 The college mental health service and the university community 146
8.5 Outreach educational and consultative services to students 147
8.6 Relationship of college mental health service to the faculty, university administration and deans of student life 148
   8.6.1 Relationship with faculty 148
   8.6.2 Relationship with campus security department 149
   8.6.3 Responding to campus crises 150
   8.6.4 Relationship to other resources on campus 150
8.7 Confidentiality 151
8.8 Conclusion 151
8.9 Appendix A: A model “at risk/student support program” in a small residential campus 152
   8.9.1 Student services component 152
   8.9.2 Academic component 153
   8.9.3 Conclusions 154
References 154

9 Crisis and Crisis Intervention on College Campuses
Morton M. Silverman and Rachel Lipson Glick

9.1 What is a crisis? 157
9.2 Crisis intervention 159
9.3 Common crises and suggested responses 162
   9.3.1 Response to traumatic events 165
   9.3.2 The suicidal student 167
9.4 When does a crisis become a psychiatric emergency? 169
10 Working with Parents and Families of Young Adults

Kristine A. Girard

10.1 Introduction

10.2 Young adult development

10.3 Generational effects

10.4 The baby boomers

10.5 Generation X

10.6 The millennial generation

10.7 Privacy standards in higher education

10.8 Influence of case law on privacy

10.9 Privacy meets generational attitudes

10.10 Privacy in the transition from secondary schools to higher education

10.11 The risk management team

10.12 Health insurance

10.13 Family therapy in the university health service

10.14 Required medical withdrawal

10.15 Behavioral problems in the residential community

10.16 Mental health prevention

10.17 Crisis management

10.18 Conclusion

References

11 Psychiatry Residency Training in College Mental Health Services

Jerald Kay and Victor Schwartz

11.1 Introduction

11.2 Benefits to services

11.3 Benefits to trainees

11.4 Benefits to training programs

11.5 Characteristics of a rotation

11.6 Centrality of supervision

11.7 Didactic curriculum

11.8 Developmental psychopathology

11.9 Psychopharmacology

11.10 The resident’s clinical theoretical framework

11.11 Increasing visibility of social media

11.12 Fellowships in CMH

11.13 Conclusion

Appendix A: Helpful hints for supervisors
Appendix B: PGY IV (Post Graduate Year Four) psychiatric resident rotation, student mental health rotations, Wright State University, University of Dayton

12 Psychology and Social Work Training in University Mental Health

David A. Davar

12.1 Introduction
12.2 Administrative matters
12.3 Ethical and legal considerations
12.4 Recruitment and selection of trainees
12.5 Running a successful training program
12.6 From theory to college counseling practice: CAPS orientation for new trainees
  12.6.1 Orientation: knowing the history, mission, setting, and population
  12.6.2 Knowing the history and sociocultural shifts
  12.6.3 Knowing the mission: the importance of outreach and prevention
  12.6.4 Knowing the setting and the population
12.7 From theory to college counseling practice
  12.7.1 The seminar and case conference
  12.7.2 Seminar dynamics and motivations
  12.7.3 Sexual attraction to clients
12.8 Experiential learning: trainee epistemology
  12.8.1 Understanding today’s student
12.9 Organization of training
  12.9.1 Principles of experiential learning
  12.9.2 The developmental stages of internship
  12.9.3 Sequencing and pacing of training
  12.9.4 Demystifying psychotherapy in the CAPS setting
12.10 Teaching the intake interview in the college setting
  12.10.1 The student
  12.10.2 The trainee
  12.10.3 Teaching the initial intake
  12.10.4 Obtaining a complete initial diagnostic impression
12.11 Nurturing competency, addressing deficiency
  12.11.1 Nurturing competence: the supervisory relationship
  12.11.2 Nurturing competence: trainees expectations of treatment and of themselves
12.12 Recognizing and addressing deficiencies
12.13 Social work and psychology therapists-in-training
12.14 Conclusion

Appendix A: Sample syllabus for counseling center trainees

13 Special Populations

Beverly J. Fauman and Marta J. Hopkinson

13.1 Introduction
13.2 Athletes
13.3 International students
13.4 Returning students
14 Using A Public Health Approach to Address Student Mental Health

Laurie Davidson and Joanna H. Locke

14.1 Introduction 267
14.2 A public health approach to campus mental health 268
  14.2.1 Risk and protective factors for college students 269
14.3 Building momentum and infrastructure 271
14.4 Thinking and planning strategically 273
  14.4.1 Describe the problem and its context 273
  14.4.2 Identify priorities and set long-range goals 274
  14.4.3 Consult the literature to identify relevant research, theory, and best practices that address the targeted problem 274
  14.4.4 Select or develop programs 275
  14.4.5 Develop an evaluation plan 276
  14.4.6 Create an action plan 276
  14.4.7 Implement programs, evaluate, and make improvements 277
14.5 Strategies for promoting mental health and preventing suicide among college students 277
  14.5.1 Promote social networks that reinforce a sense of community on campus and strengthen social relationships among students, faculty, and staff 278
  14.5.2 Help students develop skills to face life challenges in college and beyond 279
  14.5.3 Identify students who may be at risk for suicide, have untreated mental health problems, or exhibit early signs of mental health problems 280
  14.5.4 Increase the number of students who seek help for emotional distress 281
  14.5.5 Restrict access to potentially lethal means of self-harm and suicide 282
  14.5.6 Develop policies and procedures that promote the safety of all students on campus and guide the response to campus crises 283
  14.5.7 Increase student access to effective mental health and other support services 284
14.6 Conclusion 285

15 Magnitude and Prevention of College Alcohol and Drug Misuse: US College Students Aged 18–24

Ralph W. Hingson and Aaron M. White

15.1 Introduction 289
15.2 Methods: calculating changes in alcohol-related mortality 289
CONTENTS

15.3 Study results
15.3.1 Heavy episodic drinking and driving under the influence of alcohol 290
15.3.2 Alcohol-related traffic deaths 291
15.3.3 Alcohol-related unintentional non-traffic deaths 292
15.3.4 Total alcohol-related unintentional injury deaths 293
15.3.5 Other alcohol-related health problems 293

15.4 Discussion: estimates of the magnitude of college drinking problems 294

15.5 Implications 295

15.6 Interventions to reduce college drinking
15.6.1 Individually-oriented interventions 296

15.7 Conclusions 313
References 314

16 Conducting Research in College and University Counseling Centers 325
Chris Brownson

16.1 Introduction 325
16.1.1 Research and professional development 326
16.1.2 Challenges to conducting research 326

16.2 Types of research in university and college counseling centers
16.2.1 Data collected from counseling center clients 327
16.2.2 Center-specific data and intake instruments 328
16.2.3 General intake instruments 328
16.2.4 University and college student specific intake instruments 329
16.2.5 Outcome-based research 331
16.2.6 Multi-center outcome research 331
16.2.7 Topic-specific research 333
16.2.8 Broad surveys of non-clinical student populations 335
16.2.9 Surveys of mental health providers 336

16.3 Practical aspects of conducting research in counseling centers
16.3.1 Campus collaborations 338
16.3.2 Ethical considerations for research at counseling centers 339

16.4 Future directions and conclusion 339
References 340

17 International Perspectives: College Mental Health in the United Kingdom 343
Mark Phippen

17.1 Introduction 343
17.1.1 A brief ‘US–UK dictionary’ 343

17.2 Setting the scene 343
17.2.1 A brief history 344
17.2.2 Counsellor training and professional bodies 345
17.2.3 Setting standards for professional counselling practice 346
17.2.4 Organizational equivalents 347

17.3 Support systems in UK universities – Student Services 347
17.3.1 Brief outline of common support services 347
17.3.2 Counselling services 348
17.3.3 Liaison between services 349
17.4 Student mental health – a growing issue 349
  17.4.1 The evidence and universities’ response 351
  17.4.2 UK disability legislation and mental health 354
  17.4.3 The impact of the NHS on university counselling services 355
17.5 The experience of international students in the United Kingdom 358
  17.5.1 Culture shock applies 358
  17.5.2 Accessing support 359
  17.5.3 For students with mental health problems 360
  17.5.4 Access to NHS medical and mental health services 360
  17.5.5 So, is it worth coming? 362
17.6 Conclusion – where does this leave university counselling? 362
