Street Level Bureaucracy (Lipsky), 40
Street-level bureaucrats, 40, 165, 168, 172–173, 175. See also Front lines
Sunstein, C., 60

Systems: aligning coordination, 243–245, 284; changes in operations of, 14–15; disconnect between target group behavior and operations of, 10; levels within policy implementation, 16–17; understanding multilevel implementation, 100–101

Target experiences analysis, 186–188, 275–277

Target groups: about, 169–171; analyzing experiences of, 186–188, 275–277; analyzing for organization-program integration audit, 267–269; applying behavioral economics to, 63; changes in, 14–15; choice architecture for, 238–239, 242–243; customer-centric service for, 169–170, 188; disconnect between system operation and behavior of, 10; engagement continuum of activities for, 176–178; failing to consider needs or interests of, 236–237; finding consensus of views on implementation effectiveness, 13–14; frontline workers allegiance to, 172; homeowners as HHF, 207; policy analyses focus on, 56; uncovering assumptions about behavior of, 239; understanding perspectives and behaviors of, 23

Technical challenges: adaptive versus, 226–227; confronting, 25, 27; coordinating performance information, 245; creating choice architectures, 238–239, 242–243; evaluating public value failure, 235–237; exposing assumptions about behavioral change, 237–238; implementation improvement blueprint for, 283–284; practices for improving effectiveness,
Technical challenges (continued)
227; recognizing and applying behavioral biases, 62–63, 240–242, 284; tactics and tools to address, 230, 231–232
Technology: analyzing for organization-program integration audit, 268; asset specificity and program, 80; change dependent on, 74; confronting challenges in implementing, 25, 27; defined, 17; influence of IT staff on organizations, 146; required for behavioral change and people processing, 77–78; suggested by implementation resources, 124–125. See also Technical challenges
