Action learning sets (ALS), 7, 12, 36, 65, 78
Active learners
characteristics of, 237–238
work-based learning and, 12–13
Active learning facilitation process, 239
Advanced nursing roles, patient
outcomes/cost-effectiveness in, 133–134
Aesthetics, nursing, 68
Analysis of evidence, 150, 180, 245, 253–254, 264–265
Articulating nursing practice, 28–29, 150–162
Artistic intelligence, 230–231
Attributes of expertise, 6, 8, 77, 83, 131, 144, 159, 195
Benner, P., 5, 56–62, 64, 97, 102, 117, 121, 129, 130, 137, 152, 156, 181, 220, 223, 225, 251, 252, 261, 262
Caplan’s consultancy model
activity using, 19–20
process consultancy and, 21
Care delivery, management of, 134
Care of older people, long-term settings
attributes of specialist nursing practice in, 131
decision-making, expert nurse, 130
CINHAL: Cumulative Index for Nursing and Allied Health Literature, 56
Clinical career framework
clinical chairs, 24
consultant nurses, 23
of executive clinical leads/directors, 24
generalists and specialists, 22
parameters, 22–23
practice-based framework, 21
practitioner at pinnacle of, 15
of senior clinical posts, 17
Clinical Deans, 24
Clinical leadership strategies, 18
Clinical nurse specialist (CNS), 23
effectiveness in nursing interventions, for RA, 176–177
evaluating impact of, 208–212
theories and philosophies used in, 199
workshop in, 200
nursing expertise of, 208
Clinical observations (nursing practice)
background structure for, 251
benefits for undertaking, 253–254
challenges associated with, 252–253
development strategy of, 250
ethical implications for, 251
facilitation issues around, 254
practical, ethical and conceptual barriers to achieving, 254
questions and probes for, 252
Clinical Supervision Development Programme, 88
Cognitive knowing, 225–226
Communities of practice, 189–190
Consultancy approaches, clinical practice
Caplan’s model. See Caplan’s consultancy model
developing expertise in, 21
process consultancy, 19, 21
Consultant nurses
authority and autonomy possessed by, 153
consultancy function of, 23
holistic nursing practice, 157–160
pathways, 23–24
role of, 150, 154
## Index

| Creative and challenging behaviour, attribute of, 222–223 |
| Creativity (elaboration of Fay’s sub-theory 10) practical activity, 47 praxis spiral, 48 sub-theory of, 48 |
| Critical care, nursing practice, 155 |
| Critical companions articulating their professional artistry, 106 feedback from, 254–255 feedback on performance, 104 identifying and securing, 77 nurses, 220 practitioners, relationship between, 96, 113 |
| Critical companionship articulation of professional craft knowledge in, 103–104 challenge emerging perspectives of, 121–122 as conceptual framework for facilitating experiential learning, 95 definition of, 93 degree of person-centredness required within facilitation process, 116–119 evidence-gathering activities, 103 exploratory strategies in work, 251 facilitation domain of consciousness raising process of, 101, 102 definition of, 112 problematisation, 118–119 professional craft knowledge obtained by, 101–102 facilitative use of self as overarching domain of, 105 framework action learning sets, 96 diagrammatic representation, 94 differences and similarities with other helping roles, 96–97 exposure to, 93 initial thoughts on critical companionship, 94 person-centred approach, 97 high challenge/high support strategy, 105 impact on improving patients’ experience of care, 104 insider–outsider perspective of, 119–120 and fitness for health care, 123–124 matrix for, 80 person centeredness within, 113 in practice culture that value reciprocity and mutuality between professionals, 123 rationality-intuitive domain of intentionality process of, 99–100 temporality and saliency process of, 100–101 reciprocation of power, 113 graceful care, 115–116 partnership working, 115 practitioner and facilitator, relationship between, 114 relationship domain of approach to facilitation within, 114 definition of, 112 graceful care, 98–99 nursing care, 98 other helping roles and, 96–97 person-centred approach, 97 processes of, 96 skilled reflection enabled by, 141 sustained, 124 theoretical perspectives of, 94 using narratives, 102 |
| Critical creativity, 47, 276 basic concepts of human flourishing, 197 praxis and professional artistry, 196 facilitator reflection linked with, 207 enhancing motivation, 204 painful growth, 206 researchers for, 50 |
| Critical inquiry, 32 |
| Critical questioning, 189 |
| Critical social science, 39, 195 practitioner research from perspective of, 40 theories and sub-theories of, 41, 196 |
| Critical theory, 39–40 |
| Critical thinking, 188–189 |
| Cultural leadership, dimensions of, 17–18 |
| Culture of effectiveness attributes of, 15–16 creating transformational, 236 |
