Figures, Tables, and Exhibits
Preface
The Authors

Part I  Using Data for Improvement  1

Chapter 1  Improvement Methodology  3
Fundamental Questions for Improvement
  What Are We Trying to Accomplish?  5
  How Will We Know That a Change Is an Improvement?  6
  What Changes Can We Make That Will Result in Improvement?  7
The PDSA Cycle for Improvement
  Tools and Methods to Support the Model for Improvement  11
  Analysis of Data from PDSA Cycles  18

Chapter 2  Using Data for Improvement  25
What Does the Concept of Data Mean?  25
  How Are Data Used?  26
  Types of Data  32
The Importance of Operational Definitions
  Data for Different Types of Studies  40
  Use of Sampling  42
  What About Sample Size?  45
  Stratification of Data  49
  What About Risk or Case-Mix Adjustment?  51
  Transforming Data  52
  Analysis and Presentation of Data  58
  Using a Family of Measures  61

Chapter 3  Understanding Variation Using Run Charts  67
Introduction  67
  What Is a Run Chart?  67
  Use of a Run Chart  68
Constructing a Run Chart  69
  Examples of Run Charts for Improvement Projects  70
  Probability-Based Tests to Aid in Interpreting Run Charts  76

Chapter 6  **Shewhart Chart Savvy: Dealing with Some Issues**  201

- Designing Effective Shewhart Charts 201
  - Tip 1: Type of Data and Subgroup Size 201
  - Tip 2: Rounding Data 202
  - Tip 3: Formatting Charts 202
- Typical Problems with Software for Calculating Shewhart Charts 207
- Characteristics to Consider When Purchasing SPC Software 211
- Some Cautions When Using I Charts 211

**Part II  Advanced Theory and Methods with Data**  217

Chapter 7  **More Shewhart-Type Charts**  219

- Other Shewhart-Type Charts 220
  - NP Chart 221
  - X̄ and Range (R) Chart 221
  - Median Chart 224
- Shewhart Charts for Rare Events 226
  - G Chart for Opportunities Between Rare Events 228
  - T Chart for Time Between Rare Events 229
- Some Alternatives to Shewhart-Type Charts 231
  - Moving Average Chart 233
  - Cumulative Sum (CUSUM) Chart 236
  - Exponentially Weighted Moving Average (EWMA) 242
  - Standardized Shewhart Charts 244
  - Multivariate Shewhart-Type Charts 245

Chapter 8  **Special Uses for Shewhart Charts**  253

- Shewhart Charts with a Changing Center Line 253
- Shewhart Charts with a Sloping Center Line 253
- Shewhart Charts with Seasonal Effects 255
- Transformation of Data with Shewhart Charts 258
- Shewhart Charts for Autocorrelated Data 264
- Shewhart Charts for Attribute Data with Large Subgroup Sizes (Over-Dispersion) 269
  - Prime Charts (p’ and U’) 269
  - Comparison Charts 274
  - Confidence Intervals and Confidence Limits 275
- Shewhart Charts for Case-Mix Adjustment 278
Chapter 9  
**Drilling Down into Aggregate Data for Improvement**  
What Are Aggregate Data? 281  
What Is the Challenge Presented by Aggregate Data? 282  
Introduction to the Drill Down Pathway 285  
Stratification 287  
Sequencing 288  
Rational Subgrouping 288  
An Illustration of the Drill Down Pathway: Adverse Drug Events (ADEs) 289  
Drill Down Pathway Step One 290  
Drill Down Pathway Step Two 290  
Drill Down Pathway Step Three 292  
Drill Down Pathway Step Four 297  
Drill Down Pathway Step Five 302  
Drill Down Pathway Step Six 304  

Part III  
**Applications of Shewhart Charts in Health Care** 307  

Chapter 10  
**Learning from Individual Patient Data** 309  
Examples of Shewhart Charts for Individual Patients 310  
Example 1: Temperature Readings for a Hospitalized Patient 311  
Example 2: Bone Density for a Patient Diagnosed with Osteoporosis 313  
Example 3: PSA Screening for Prostate Cancer 314  
Example 4: Shewhart Charts for Continuous Monitoring of Patients 316  
Example 5: Asthma Patient Use of Shewhart Charts 318  
Example 6: Monitoring Weight 318  
Example 7: Monitoring Blood Sugar Control for Patients with Diabetes 320  
Example 8: Monitoring Patient Measures in the Hospital 321  
Example 9: Using Shewhart Charts in Pain Management 322  

Chapter 11  
**Learning from Patient Feedback to Improve Care** 325  
Patient Surveys 326  
Summarizing Patient Feedback Data 329  
Presentation of Patient Satisfaction Data 336  
Using Patient Feedback for Improvement 337  
The Plan-Do-Study-Act Cycles (PDSA) Cycle for Testing and Implementing Changes 338  
Using Patient Satisfaction Data in Planning for Improvement 344  
Special Issues with Patient Feedback Data 346  
Are There Challenges When Summarizing and Using Patient Satisfaction Survey Data? 346  
Does Survey Scale Matter? 347
Chapter 12  **Using Shewhart Charts in Health Care Leadership**  349
A Health Care Organization’s Vector of Measures  349
Developing a Vector of Measures  350
Displaying and Learning from a Vector of Measures  351
   “So How Do We Best Display a Vector of Measures?”  358
Administrative Issues with Vector of Measures  361
Some Examples of Other Vectors of Measures  362
   Emergency Department:  363
   Primary Care Center  364
   Health Authority  364
   Large Urban Hospital  366

**Part IV  Case Studies**  369

Chapter 13  **Case Studies Using Shewhart Charts**  371
Case Study A: Improving Access to a Specialty Care Clinic  372
Case Study B: Radiology Improvement Projects  381
Case Study C: Reducing Post-CABG Infections  388
Case Study D: Drilling Down into Percentage of C-Sections  399
Case Study E: Accidental Puncture/Laceration Rate  409
Case Study F: Reducing Hospital Readmissions  418
Case Study G: Variation in Financial Data  425

**Index**  435

**Shewhart Chart Selection Guide**  446

**APPENDIX**

| Appendix 5.1 | Calculating Shewhart Limits | 192 |
In memory of Dr. Walter Shewhart,
whose theory of learning provides
the foundation for the science of improvement.
