Index

Figures and tables are indicated by italic page numbers, boxes by bold numbers, and text in the Foreword shown as roman numbers (e.g. “xxiv”)

ABS (Anti-lock Braking System) 39, 59, 224
ACC (Adaptive Cruise Control) 208, 215
active safety systems 39
ad-hoc networking concept 40
adaptive background approach [to detection] 176
adaptive light control systems 210, 213–14
ADAPTIVE project xxviii
adaptive traffic control
with public transport priorities 284–5
cooperative approach used 285–7
adaptive traffic light control systems 264, 265
ADAS (Advanced Driver Assistance Systems) 108, 206–17
applications 211–17
classification of systems 235
control functions 207
control levels 207–8
eyear projects 208–10
future trends 226–7
legal aspects 227–37
liability issues 234–7
map-supported systems 216–17
and Vienna Convention 230
ADASE (Advanced Driver Assistance Systems in Europe), architecture compatibility 11
advanced vehicle systems 224, 225–6
AEB (Advanced Emergency Braking Systems) 224, 225
AID (Automatic Incident Detection) systems 257, 260–3
algorithms used 261–2
traffic-flow-based 263
video-based 260–1, 263
AIDE project xxvi
alarm showers [broadcast storm] 59, 60
ALINEA [ramp metering] algorithm 275
with other traffic management systems 278
AM radio [MW & LW]
antennas 132, 133, 134, 135, 145, 146
frequency bands 132
ANFIS (adaptive neural–fuzzy inference system) algorithm 277
ANN (artificial neural networks) 277
ANPR (Automatic Number Plate Recognition) systems 170, 256
antennas electronics adjacent to antenna 145–6
hidden/integrated antennas 131, 134–7, 140–1, 147
intelligent/smart antennas 145–6
locations within vehicles 107, 109, 119, 134–7, 140–1
antennas (cont’d)
EM field distribution affected by 118–22
radio antennas 132–7
roof-mounted antennas 132–3, 137–9, 145–6
Telematics antennas 137–41
Architecture and Standards Regulation [USA] 27–8, 34
ARIMA technique 191, 262
ASILs (automotive safety integrity levels) 87, 101, 240
ASV (Advanced Safety Vehicle) projects 208
ATIS (Advanced Traveller Information Systems) 316
attack potential
on ADAS 241
and attack success probability 95, 97, 103
ranking 95, 96
attack trees 90–2
risk evaluation using 97–100, 103
automatic parking systems 232
automotive cyber security vulnerabilities 84–6
electromagnetic vulnerabilities 85–6
information security 85
automotive security threats
controllability classification 95, 97
probability classification 95, 96, 97
risk classification 95, 97, 98
severity classification 93–5
autonomous driving systems
levels 208, 227, 228
liability issues 235–6
and Vienna Convention 233–4
see also ADAS
AVCS (advanced vehicle-control systems) 208
average image method [for detection] 176
AVS (advanced vehicle systems) 224, 225–6
‘backdoors’ [to computer systems] 85
bandjacking techniques 79–80
BAS (Brake Assist Systems) 223–4, 225
basic concepts, detection of 174
Basque Government, public transport data 316–17, 328
BASt, categorization of vehicle automation
levels 227, 229
billing and toll applications, video-based
systems 170
Bluetooth wireless technology
frequency bands 109
intra-car use 111, 141
Böhm, Annette 63, 64
broadcast radio
antennas 132–7
hidden glass 134–6
hidden and integrated 136–7
roof-mounted 132–3
frequency bands 132
BSW (Blind Spot Warning) system 208, 212
C2C-CC (Car-to-Car Communication Consortium) 8
reference architecture 12
CABINTEC project 291
CACC (Cooperative Adaptive Cruise Control) 215
CAM (Cooperative Awareness Messages) 62, 75
Campbell, J.L. 319
CAN (Controller Area Network) bus 108, 144, 145, 146, 207, 291
cyber security attack 84
Car2Car communications 141
antennas 141–3
standard covering 44, 49, 141
Carlink project 43
CARS 21 High Level Group 223
CAS (Collision Avoidance Systems) 225, 226
and Vienna Convention 230, 231
Castro, M. 299
CC (Cruise Control) systems 215, 230
CCW (Cooperative Collision Warning) systems 49, 60
CEIT, truck driving simulator 292
cellular communications 43
2G network, frequency bands 137
3G network 43, 45, 46
antennas 137, 138, 140, 144
frequency bands 137
4G network, antennas 137, 143
GPRS system 43, 45, 47
LTE network 43, 47, 54
