b
Cambridge University Engineering Department 230
Caterpillar Inc. 50, 108
Central tyre inflation system (CTIS) 129
Challenger hydrogas unit,
  characteristics  8–18
  damper characteristics  11–13
  spring stiffness characteristics  9–11
  temperature effects  13–18
Coil springs
  nested  7
  presetting or ‘scragging’  6
  tracked
    in bogie  7
    in trailing arm  6, 8
  Wahl factor  6
  wheeled, with
    axles  105
    McPherson struts  107, 113
    swing axles  105
    trailing arms  112, 113
    twin wishbones  107, 115
Cone penetrometer 180
Controllable suspensions
  active  91–100
  adaptive damping  91
  height and attitude control  89–91
  semi-active (controllable damping)  91

d
Dampers
  friction  1, 19, 20, 94, 117, 131
  hydraulic  1, 20, 129
DERA Suspension Performance Test
Courses 65
ramps 62
random 62
sinewaves 62

Differentials
double 90, 133–137, 167, 173, 174
free 166, 188, 211
limited slip 196, 203–208, 214, 215
lockable 133, 203, 204, 210, 211, 214, 215

Double differential types 133–137
Dowty Rotol 103, 110, 193

Driver control arrangements for skid steering 146
DROPS (demountable rack offload and pickup system) 103, 125, 127, 230

Electronic stability program (ESP) 168, 230

Human response to vibration and shock absorbed power 61, 63, 229
BS 6841:1987 59–64, 70, 71, 78
exposure action values 64
exposure limit values 64
ISO 2631–1 (1987) 63
root mean quad weighted 61
root mean square weighted 60
vibration dose value 61
vibration response weighting filters 59, 60

Hydrogas springs 6, 8–18, 85, 89, 90, 95, 108, 113, 116, 118, 121
with external telescopic unit 19
in-arm units 18, 19
twin cylinder units 18

Infantry Fighting Vehicle 1, 20, 115

Interconnected suspensions 116–122
methods of interconnection 116–118
in pitch 117–119
in pitch Citroen 2CV 117–119
in roll 117
in roll and pitch 118
six wheel interconnection 121, 122
in warp 119–122

K
Kegresse flexible track 49
Citroen half-track truck with Kegresse flexible track 49
Krauss Maffei Wegmann (KMW) 44

Leaf springs 103, 104, 217, 227
bogie with swing axles 105
bogie with twin axles 103
equivalent viscous damping 131
friction 131
with swing axles 103

Limited slip differentials 113, 196, 203–205
ADM (Automatic Drive-Train Management System) 203
frictional, load dependant 205–215
NoSpin 108, 166, 167
velocity dependant 204

Lotus Engineering 97

Magic Formula 139–143, 158, 159, 170, 198–201, 209
track longitudinal force/slip characteristics on roads 139–143
tyre combined force/slip characteristics on roads (Sharp) 158, 159
tyre longitudinal force/slip characteristics in cohesive soils 198–201

Main battle tanks (MBTs)
Abrams 20, 31, 36, 89
Centurion 7
Challenger 8–18, 26, 31, 32, 66, 76–79, 83–86
Chieftain 7, 34, 37, 39, 193, 194
Cromwell 6
K2 Black Panther 19
Khalid 7, 26, 27, 32
Leclerc 18
Leopard 2 1, 20, 21, 31, 33, 135
M 60 33
MBT-70 89
Merkava 8, 26
Panther 4
S-tank 89, 90
MAN trucks 105
Mars rover ‘Curiosity’ 120–122
Mean maximum pressure (MMP) 182, 183, 187, 188
Merritt steering model 136, 146, 159
Mobile tester (DERA) 183, 188, 196–199, 209
Mobility numbers
  $N_C$ (WES cohesive soil) 182
  NM (DERA cohesive soil) 185, 225
  NMS (DERA cohesive soil small tyre deflection) 186
  NSN (NRMM frictional soil) 189
  NS (WES frictional soil) 189, 192
  $N_T$ (DERA cohesive soil track systems) 188
  NTP (Tyre peak coefficient traction) 199

n
Nexter Systems 18, 91, 113, 156
NRMM (NATO Reference Mobility Model) 61–63, 177, 180, 182, 190, 193, 195, 199

q
QinetiQ tracked vehicle electric drive steering system 154
Quarter car model 68, 92, 123, 129
damping 69
natural frequency 69, 124
RMS dynamic suspension displacement 123
RMS dynamic tyre load 123
sprung/unsprung weight 125
tyre pressure 125
weighted RMS body acceleration 70, 124
  with wheelbase filter tracked 70
  with wheelbase filter wheeled 126

r
Radial ply tyres
  rolling radius 199, 200
  rolling stiffness and damping 131, 132
  soft soil performance (DERA mobile tester) 185
Reconnaissance Vehicle 115–117
Renk MBT transmission 135
Rollover 227–233
  active anti-roll bars 230, 232
  electronic Stability Programs 230
  static Rollover Threshold (SRT) 227
tilt table 228
  truck rollover; a case study 230
s
SITV (Sprung idler test vehicle) 85–87
Soils and surfaces 177, 178
  cohesive (wet clays) 177, 178
  frictional (dry sands) 178
  organic 177
  road (dry, wet, slippery, icy, split $\mu$) 209
  snow 178
Soil strength measurement methods
  Bekker, M.G. 180
  cone index 180
  cone index gradient 189, 192
  cone penetrometer 180
  Coulomb 177
  rating cone index 180
  shear vane (shear strength) 192, 200
  Terzaghi (civil engineering) 178
  triaxial test (laboratory method) 200
  Wong, J.Y. 180, 197
Soil/vehicle models
  Bekker, M.G. 180
  FEM 180
  MMP (Rowland) 182, 183
  VCI (WES) 180–183
  VLCI (DERA) 183–188
  Wong, J.Y. 180, 197
Space efficiency, tracks v wheels 194, 195
Sprung cab 129
t
Torque vectoring 166, 167, 169, 205
Torsion bars springs
  presetting 2
  stresses 3
  tracked
    transverse with trailing arms 2
    wheeled
      transverse with trailing arms 113
twin wishbones 108
Track loadings
  cross bending 29
tensile
  centrifugal 34
duty cycle 34
  vehicle drive 29, 30, 36
Track pads 31–32
Track performance
  noise and vibration 43–48
  rolling resistance, analytical 36–38
  rolling resistance, experimental 38–43
Tracks, flexible
  continuous, friction drive 50
  continuous, sprocket drive 53–58
  segmented 51, 52
  wrapped with single connector 50
Tracks, link tracks
  double pin 28
  double bodies and three connectors 29
  single body and three connectors 29, 30
  single body and two connectors 28
  weight 31
  single pin 23
  needle bearings 26
  plain pivot (dry pin) 26, 27
  rubber bushed 27, 28
Tracks, soucy flexible
  DERA performance trials 53–56
  performance and durability with standard road and cross country duty cycle 57
Track wheels 32, 33
Tractive efficiency 50, 196, 208, 210
