aspect ratio, 52
astigmatism, 153
asymmetry measure, 48
Auger process, 24, 143
autocorrelation function, 175
avalanche breakdown, 116
average collision time, 99
axial mode, 157

band filling effect, 36, 159
band offset, 15, 127
bandgap energy, 3
band-structure engineering, 201

base function, 16
beam waist, 153
Bernard–Duraffourg relation, 32
BH, 154, 156
biaxial stresses, 208
Biot–Savart’s law, 8
bistable LDs, 184
blackbody radiation theory, 31
Bloch function, 4
Bloch oscillation, 21
Bloch theorem, 4
Bohr magneton, 8
Boltzmann constant, 29
bra vector, 5
Bragg wavelength, 67, 218
breakdown, 116
breakdown, avalanche, 116
breakdown, Zener, 116
Brillouin zone, bending of, 21
buffer layer, 202
built-in potential, 104
bulk, 4
buried heterostructure, 154, 156
carrier, 94
carrier concentration, intrinsic, 96
carrier concentration, threshold, 132
INDEX

carrier distribution, 28
carrier lifetime, 126, 128
carrier noise, 173
cathodoluminescence, 26
cavity, Fabry–Perot, 57
cavity, optical, 27, 57
characteristic matrix, 82
characteristic temperature, 143
chemiluminescence, 26
chirped grating, 71
chirping, 167
chromatic dispersion, 172
cladding layer, 41
cleaved facet, 59
coherent, 26, 160
complex refractive index, 40
compound semiconductor, 93
compressive strain, 203
conduction-electron, 93
conductivity effective mass, 100
confinement of resonant radiation, 227
coupled cavity, 184
coupled wave equation, 67
coupled wave theory, 67
coupling coefficient, 66
coupling rate of feedback light to an LD, 186
critical angle, 42
critical thickness, 202
current multiplication factor, 117
current versus light output, 131
cutoff condition, 49
cyclotron angular frequency, 97
cyclotron resonance, 12, 13
DBR LD, 222
decay coefficient, 166
decay rate, 186
decay time, 166
defformation potential, 206
delta function, 19, 177
density of states, 17
density of states, effective, 29, 95
density-of-states effective mass, 95
depletion layer, 103
depth layer capacitance, 108
derivative electrical resistance, 146
derivative light output, 145
derivative measurement, 144
deviation, 165
DFB LD, 71, 213
dielectric film, 59
differential gain, 165
diffracted pattern, 149
diffraction grating, 57
diffusion, 101
diffusion capacitance, 116
diffusion coefficient, 101
diffusion length, 115, 153
diffusion potential, 104
digital modulation, 169
dipole moment, 34
Dirac’s constant, 4
direct modulation, 160, 162
direct transition, 13, 24
discrete, 3
discrete approach, 82
dispersion, 77, 157
dispersion, chromatic, 172
dispersion curve, 48
dispersion, material, 172
dispersion, mode, 172
dispersion, structural, 172
distributed Bragg reflector, 57
distributed Bragg reflector LD, 222
distributed feedback, 57
donor, 97, 98
donor level, 98
dopant, 97
double heterostructure, 127
drift current, 101
effective density of states, 29, 95
effective mass, 6
effective mass approximation, 16
effective mass, conductivity, 100
effective mass, density of state, 95
effective mass, longitudinal, 95
effective mass, transverse, 95
effective refractive index, 47
effective refractive index, method, 52
eigenvale equation, 48
