SPFile object, SharePoint document library, 380
splatting
  creating AD users and groups, 240
  defined, 273–274
  overview of, 56
  using Active Directory provider, 232
SPList object
  accessing views, 377
  adding items to SharePoint list, 376
  creating SharePoint libraries, 379–380
  managing permissions, 378–379
  modifying settings, 378
SPListTemplateType, SharePoint libraries, 379–381
split operator, 15
SPRoleAssignment object, SharePoint list permissions, 378
SPWeb object, SharePoint lists, 375–381
SPWorkflowObjects, SharePoint, 382–383
SQL Agent
  job steps, 357
  scheduling tasks, 362–363
SQL Authentication, Registered Servers, 366
SQL Management Object (SMO), 342, 344, 365–366
SQL PowerShell (SQLPS), 341, 356–357
SQL Server 2008 R2
  assemblies, 345–346
  changing service account, 346
  getting information, 351–353
  loading data, 350–351
  loading non-SQL Server data, 351
  management basics, 341–343
  performance counters, 354–357
  querying, 347–349
  registrations in SSMS, 366–369
  scheduling tasks to run in SQL Agent, 362–363
  scripting objects, 357–362
  services, 343–344
  snap-ins, 344–345
  space usage information, 363–366
SQL Server Configuration Manager, 346
SQL Server Management Studio (SSMS), 342, 366–369
SQL statements, XenDesktop, 483–484
SQLBulkCopy class, 348, 351
SQLParameters variable, 482–485
SQLPS (SQL PowerShell), 341, 356–357
SQLPSX, 342
SQLSERVER\Provider, 345
sqlserver_start_time column, instance uptime information, 352
SqlServerCmdletSnapin100 snap-in, 344–345, 347
SSL, configuring for IIS, 398–399
SslBindings, IIS, 393–394
SSMS (SQL Server Management Studio), 342, 366–369
StandardProfile key, firewalls, 143–144
start iisreset, Windows 7, 404
Start() method, application pools and sites, 404
Start-AppPool cmdlet, IIS, 404
Start-Discovery cmdlet, OpsMgr, 421
Start-Job cmdlet, 51
Start-OnDemandTransfer cmdlet, WASM, 553
StartService() method, service management, 206
Start-SPAssignment cmdlet, SharePoint, 373
Start-VM function, 518–519
Start-WBBackup cmdlet, Windows Backup, 178
Start-WebItem cmdlet, IIS, 404
Start-Website cmdlet, IIS, 404
StartWorkflow() method, SharePoint, 382
static methods, 9
static properties, 9
Stop() method
application pools and sites, 404
running tasks, 193
Stop-ActivateTransfer cmdlet, WASM, 553
Stop-AppPool cmdlet, IIS, 404
StopMaintenanceMode() method, remote servers, 208
Stop-SPAssignment cmdlet, SharePoint, 373
Stop-VM function, Hyper-V, 518–519
Stop-WebItem cmdlet, IIS, 404
Stop-Website cmdlet, IIS, 404
storage
adding to VM, 534–535
configuring host in PowerCLI, 562–563
transferring logs in Windows Azure to, 553–554
VMM libraries, 537–539
Windows Azure cmdlets, 551
StorageGroup parameter, New-MailboxDatabase, 310
streamed catalogs, XenDesktop, 488, 495–496
StrictMode, debugging in, 65–66
strings, text mode UI, 583
style sets, Word, 104
styles
applying to range of cells, 110–111
applying to Word document, 104
SubFeatures property, Get-WindowsFeature, 168
subfolders, Outlook, 115
subscribing to event, 47–48
Suspend-PublicFolderReplication cmdlet, Exchange, 307
Suspend-VM function, Hyper-V, 518–519
switch statement, alternation in scripts, 25–26
taxonomy errors, 30–31
System Center Central website, OpsMgr, 438
System Center Configuration Manager, 4–5
System Center Operations Manager. See OpsMgr (System Center Operations Manager) 2007 R2
System Central Virtual Machine Manager. See VMM (Virtual Machine Manager) 2008 R2
System Restore, 157–158
system time, 198–201
Systems Management Server (SMS), 4–5
FileSystemAccessRule class, 85–86
T
tab completion, AD, 234
tab-expansion, SQL Server, 367
table space usage, SQL Server, 365–367
tables, adding to Word documents, 101–102
TargetDatabase parameter
Move-Mailbox, 286–287
New-MoveRequest, 287–288
Task Sequences, MDT, 449–451
TaskItem, Outlook, 119
tasks
in Active Directory, 244–246
on servers, 191–194
Windows PowerShell automating, 5–6
$TaskService variable, 192–193
TCP protocol, firewall ports, 144–145
TCP/IP, remoting architecture, 47
TechNet Script Center Repository, 343
Technet Forums, OpsMgr, 438
templates
creating Active Directory users, 240–241
Task Sequence, 450–451
using group policy for execution, 39
using OUs from, 249
temporary sessions, 48
terminating errors, 33–34
Test-AppLockerPolicy cmdlet, AppLocker, 187
Test-VMHostProfileCompliance cmdlet, PowerCLI, 565
text
adding to Word, 98–99
converting numbers and dates into, 22
formatting in Word document, 103–105
searching in Word document, 102
text mode UI, 581–584
Text property, Word, 98–99
textbox control, 589–590
third-party alternatives
ISE, 620–621
PowerShell user forums, 13
time, using system, 198–201
toolbar, ISE, 599, 603–605, 607
transaction support, V2, 63–64
trap statement, runtime errors, 32–33
trap-forwarding, SNMP, 429–431
Tree parameter, Remove-VMSnapshot, 520
troubleshooting, Windows 7, 71–76
Try/Catch block, text mode UI, 583
Try/Catch/Finally, 32–33, 66
TryParse() method, text mode UI, 584
T-SQL (Transact SQL), 347–349, 352
Twitter, PowerShell blogs on, 13
two-state unit monitor, OpsMgr, 437
type accelerators, 209, 302
type operators, 15
Type parameter, Exchange, 296, 303
TypeBackspace() method, Word documents, 99

U
UDP protocol, firewall ports for, 144–146
UI (user interface)
overview of, 581
PrimalForms, 593–595
text mode, 581–584
Windows Forms, 584–585
Windows Forms button control, 588–589
Windows Forms label control, 586–587
Windows Forms textbox control, 589–593
Windows Presentation Foundation, 595–596
UNC (Universal Naming Convention), VMM library, 538
Uninstall key, Windows Registry, 154
Uninstall method, wmiclass, 159–161
Uninstall-SPSolution cmdlet, SharePoint, 382
unique file extensions, 87–88
Universal Naming Convention (UNC), VMM library, 538
Universal parameter, Set-Group cmdlet, 296
Universal Time Coordinate format, 200
Unix/Linux pipelines, 10
Unlock-ADAccount cmdlet, AD, 244
Update() method, SharePoint lists, 376–379
Update-EmailAddressPolicy cmdlet, Exchange, 323
Update-MDTDeploymentShare cmdlet, MDT, 452
Update-MDTMedia cmdlet, MDT, 453–454
Update-PublicFolder cmdlet, Exchange Server, 307
updates
custom fields in alert properties, 413–415
Deployment Share, 452
e-mail address policy, 323–324
primary and failover settings for OpsMgr
agents, 421
public folders, 307
SharePoint list data, 376
VMM host agents, 527
VMWare tools on VM, 571
Update-Tools cmdlet, VMware, 571
uploading, to SharePoint document library, 381
URLs, indexed folders and, 78
user flags, 220
user input validation, scripts, 24
user interface. See UI (user interface)
User parameter
Connect-Mailbox, 284
Connect-VIServer, 559–560
Set-SharePermissionScript, 135
UserAuthentication, Remote Desktop, 147–148
UserPrincipalName parameter,
New-Mailbox, 281
users, Active Directory
Active Roles Management Shell, 253–255
adding and removing groups, 243–244
automating tasks, 244–246
creating, 240–241
managed service accounts, 246–247
modifying properties, 242–243
password policies, 250–251
querying, 234–238
users, mail
administering, 292–295
moving mailboxes interrupting, 286
upgrading Exchange 2007, 326
upgrading Exchange 2010, 328
users, managing local accounts, 219–221
Users filter, XenApp, 474–475
UseSqlSnapshot parameter, Backup-SPSite, 385–386
Use-TroubleshootingPack function, 75–76

V

ValidateOnly parameter, Connect-Mailbox, 284
validating input, text mode UI, 583–584
Value parameter, Get-FirewallSetting, 143
Value2 property, cells, 108–110
variable breakpoints, ISE, 609
variable expansion, SQL Server, 347–348
variables
  email address policy, 323
  language constructs, 13–14
vCenter
  clusters, 573–574
  connecting to instance of, 558–559
  log data, 575–576
  managing folders, resource pools and
datacenters, 575
  migrating VMs, 574
  performance data, 576
verb-noun syntax, of cmdlets, 8–9
$VerbosePreference variable, 66
verbs, for Exchange Server recipient types, 278
version support
  SQL Server, 352
  Windows PowerShell for downlevel OSs, 37
  Windows PowerShell installation, 37
View menu, ISE, 599, 601–602
ViewEntireForest parameter, AD, 331, 332
ViewOnly administrators, 456–457
views
  SharePoint list, 377
  SharePoint list data, 376
Views property, SPList object, 377
virtual directories, 396
virtual hardware, PowerCLI, 569–571
Virtual Machine Manager. See VMM (Virtual Machine
Manager) 2008 R2
virtual machines. See VMs (virtual machines)
virtual port groups, 564
Virtual Server hosts, adding to VMM, 526–527
virtual switch configuration, 563–564
VM Hosted Groups, 499
VM resource configuration, 571

VMHost, 563
$vmhost variable, 563
VMM (Virtual Machine Manager) 2008 R2
  backing up database, 524
  checkpoints, 536–537
  clusters, 528–530
  connecting to, 525–526
  controlling virtual machines, 535–536
  creating and modifying virtual machines, 531–535
  host servers, 526–528
  installing and loading cmdlets, 523
  libraries, 537–539
  maintenance on host servers, 530–531
  removing virtual machines, 535
  using VMM Administrator Console to write scripts,
  524–525
VMM Administrator Console, 524–525
VMs (virtual machines)
  checkpoints, 536–538
  controlling, 535–536
  creating and modifying, 517–518, 531–535
  gathering performance data with Get-Stat, 567
  power state management, 518–519
  removing, 535
  snapshots, 519–520
VMs (virtual machines), in PowerCLI
  deploying new, 568–569
  invoking scripts, 573
  removing, 569
  resource configuration, 571
  retrieving, 559
  snapshots, 572–573
  starting and stopping, 572
  updating tools, 571
  working with virtual hardware, 569–571
VMware
  ESX and ESXi hosts. See ESX and ESXi hosts
  updating tools on VM, 571
vSphere PowerCLI. See vSphere PowerCLI
volume space usage, SQL Server, 363
vSphere PowerCLI
  deploying new VMs, 568–569
  ESX and ESXi hosts. See ESX and ESXi hosts
  installing and using cmdlets, 557–558
  invoking scripts, 573
  other features, 576–577
  overview of, 557
  removing VMs, 569
  retrieving hosts and VMs, 559
snapshots, 572–573
starting and stopping VMs, 572
suppressing prompts, 566
updating VMware tools, 571
vCenter management, 573–576
virtual hardware, 569–571
VM resource configuration, 571

W
W32Time Time Service tool, 198
Wait parameter
New-VMSnapshot, 519
Remove-VMSnapshot, 520
Start-Vm, 518
Wait-Event cmdlet, 62
WaitForPendingFinalizers() method, Office, 97
WaitToComplete parameter, Get-Operation Status, 546
WASM (Windows Azure Service Manager)
certificates, 542–544, 548–549
cmdlets, 541–542
diagnostic logging, 549–551
forcing logs to transfer to storage, 553–554
hosted services, 544–548
logging, 551–553
WdBuiltInStyle enumeration, Word documents, 104
WDS (Windows Deployment Services), 445
web applications
IIS, 397–398
SharePoint, 381
Web Server Role, IIS 7, 390–391
Web Service Management For Vista (MS-WSMV), 47–48
Web Services Management layer (WS-MAN), 47–48, 373–374
WebAdministration module. See IIS (Internet Information Services) 7
WebAdministration provider
application pools, 398
IIS 7, 391–392
New-Item cmdlet, 394–395
not working with SMTP, 392
virtual directories, 396
web applications, 397
WebConfiguration cmdlets, IIS 7, 400–403
WebDAV, 335
Where-Object cmdlet
filters, 328–330
finding empty folders, 89
listing Exchange Organization Administrators, 274–275
NTFS permissions, 126–127
overrides in OspMgr, 432
running services on multiple servers, 204
server features and roles, 167
unique file extensions, 87–88
Windows Search, 78–79
while loop, iteration, 28
white space, mailbox, 311–313
wildcards
ActiveRoles Management Shell, 254
alternation in scripts, 26–27
in parameter value globbing, 9
regular expressions and, 16–17
Win32_ComputerSystem class, 199–200
Win32_LogicalShareSecuritySetting, 127–131, 132–133
Win32_NetworkAdapterConfiguration, 213–217
Win32_OperatingSystem class, 198
Win32_Process class, 158–159, 208
Win32_Product class, 152–153
Win32_SecurityDescriptorHelper class, 222–223
Win32_SecurityDescriptorHelper class, 222–223
Win32_Service class, 205–206
Windows
management in early days, 3–5
PowerShell version support, 37
Windows PowerShell not available for 2000, 37
Windows 7
ActiveDirectory module, 230–232
hotfix status, 84
IISReset issue, 404
security of files and folders. See files and folders, Windows 7
troubleshooting, 71–76
V2 features, 44–45
WebAdministration module, 391
Windows PowerShell for, 37
Windows Search. See Windows Search
Windows Azure. See WASM (Windows Azure Service Manager)
Windows Backup
configuring backup jobs, 174–176
deleting backup jobs, 177
installing cmdlets, 174
limitations of cmdlets, 179–180
overview of, 174
scheduling backup jobs, 178–179
starting and stopping backup jobs, 178
status of backup jobs, 176–177
Windows Deployment Services (WDS), 445
Windows Embedded, 37
Windows Firewall
  checking status locally, 140–143
  checking status overview, 139–140
  checking status remotely, 143–144
  opening and closing ports, 144–146
Windows Forms
  building GUIs with, 585–586
  button control, 588–589
  label control, 586–587
  overview of, 584–585
  textbox control, 589–593
  working with, 585
Windows Installer Provider, 152
Windows Management Framework Core (WMFC), 37
Windows Management Instrumentation. See WMI
  (Windows Management Instrumentation)
Windows NT, 4
Windows PowerShell
cmdlets, 8–9
  command notification channel in OpsMgr and, 426–431
  community, 12–13
  development of, 5
  discovery-related cmdlets, 10–12
  formatting output, 18–23
  installing, 36–39
ISE. See ISE (Integrated Scripting Environment)
  language constructs, 13–18
  modules, 36
  monitoring scripts in OpsMgr, 436–437
  objects, 9–10
  overview of, 3
  pipeline, 10
  in production scripts and admin GUIs, 7–8
  profiles, 39–41
  scripting. See scripts
  scripting language, 6–7
  snap-ins, 34–36
  as task automation platform, 5–6
Windows PowerShell Management Library, Hyper-V, 515–516
Windows PowerShell provider
  MDT, 442–444
  XenDesktop, 505–506
Windows PowerShell Remoting protocol (MS-PSRP), 47–48
Windows PowerShell tab, XenDesktop, 480
Windows PowerShell V2, new features
  advanced functions, 52–56
  debugging from command line, 65–66
  development of, 43–45
  eventing, 61–62
  handling errors with Try/Catch/Finally, 66–67
  Integrated Scripting Environment, 63
  jobs, 50–52
  modules, 57–61
  new cmdlets, 67
  remoting, 45–50
  serialization, 50
  transaction support, 63–64
Windows Presentation Foundation (WPF), 595–596
Windows Registry
  listing software, 153–154
  listing software not installed with .msi, 152–153
  removing software, 159–161
Windows Remote Management. See remoting
Windows Search
  adding folders to index, 79–81
  discovering which folders are indexes, 77–79
  managing, 77
  re-indexing search catalog, 82–84
  removing folders from index, 81–82
  searching with, 89–91
Windows Search SQL syntax, 89–91
Windows Server 2003
  ActiveDirectory module, 230
  management with, 4–5
Windows Server 2008 R2
  ActiveDirectory module, 230–232
  AppLocker, 186–187
  Best Practice Analyzer scans, 169–173
  enabling remoting, 173–174
  features and roles, 167–169
  GroupPolicy module, 257
  server migration, 180–186
  V2 features for, 44–45
  web server role for IIS 7, 390–391
Windows Backup. See Windows Backup
Windows PowerShell in, 37, 165–166
XenApp 6 only available for, 456
Windows Vista, 37
Windows XP, 37
WinRM service, 47–48
WMFC (Windows Management Framework Core), 37
WMI (Windows Management Instrumentation)
defined, 151
discovering server configuration, 189–191
Hyper-V classes, 513–515
listing software, 152–153
managing IIS, 392
provider for IIS 7, 392
remote DCOM access for domain users, 226–227
software installation, 158–159
Windows Server 2003 and, 5
WMI Query Language (WQL), 151, 190
Word, automating
bullets, 99–100
content, 98–99
creating or opening document, 98
formatting text, 103–105
headers and footers, 102
hyperlinks, 100
inserting images, 101
overview of, 98
printing, 106
saving document, 106–107
searching for text, 102–103
spell checking, 105–106
tables, 101–102
workbooks, Excel, 107–111
worker groups, XenApp 6, 461, 475–477
WorkerGroupPreferences parameter, Set-XALoadBalancingPolicyConfiguration, 474
WorkflowManager object, SharePoint, 382
workflows
administering SharePoint, 382–383
defining in OpsMgr with modules, 436
modifying in OpsMgr with overrides. See overrides
worksheets, Excel, 107–111
workstation, Exchange Server, 271–273
WPF (Windows Presentation Foundation), 595–596
WPK toolkit, 595–596
WQL (WMI Query Language), 151, 190
Write-DataTable function, SQL Server, 356
Write-Debug cmdlet, 32, 66
Write-Verbose cmdlet, 66
WS-MAN (Web Services Management layer), 47–48, 373–374
XAML (Extensible Application Markup Language), WPF, 595
XenDesktop 5. See Citrix XenDesktop 5
XenServer hosts, 506–507
XmlPolicy parameter, 187
