About the author, ix
Preface, x

Introduction, 1

1. Classical psychometrics, 3
   Emil Kraepelin: Symptom check list and pharmacopsychology, 6
   Charles Spearman: Factor analysis and intelligence tests, 10
   Harold Hotelling: Principal Component Analysis, 13
   Hans Eysenck: Factor analysis and personality questionnaires, 15
   Max Hamilton: Factor analysis and rating scales, 20
   Pierre Pichot: Symptom rating scales and clinical validity, 23

2. Modern psychiatry: DSM-IV/ICD-10, 27
   Focusing on reliability, 27
   Focusing on validity, 28
   Quantitative, dimensional diagnosis, 29

3. Modern dimensional psychometrics, 32
   Ronald A. Fisher: From Galton’s pioneer work to the sufficient statistic, 32
   Georg Rasch: From Guttman’s pioneer work to item response theory analysis (IRT), 34
   Sidney Siegel: Non-parametric statistics, 38
   Robert J. Mokken: Non-parametric analysis for item response theory (IRT), 39

4. Modern psychometrics: Item categories and sufficient statistics, 43
   Rensis Likert: Scale step measurements, 43
   John Overall: Brief, sufficient rating scales, 45
5. The clinical consequence of IRT analyses: The pharmacopsychometric triangle, 53
Effect size and clinical significance, 53
The pharmacopsychometric triangle, 56
Antidementia medication, 59
Antipsychotic medication, 60
Antimanic medication, 65
Antidepressive medication, 66
Anxiety medication, 69
Mood stabilising medications, 72
Combination of antidepressants, 73

6. The clinical consequence of IRT analyses: Health-related quality of life, 74
The WHO-5 Questionnaire, 78

7. The clinical consequences of IRT analyses: The concept of stress, 82
Post-traumatic stress disorder, 82
The work-related stress condition, 84
Integration of Selye’s medical stress model, 85

8. Questionnaires as ‘blood tests’, 89
Population studies in depression and anxiety, 89
The predictive validity of WHO-5, 92
Screening scales, 92

9. Summary and perspectives, 95

10. Epilogue: Who’s carrying Einstein’s baton?, 103
Glossary, 109
Appendices, 114
References, 185
Index, 196
