TOPIC INDEX

A
adaptation, 58
alternative hypothesis, 10
  of clinical equivalence, 23, 24
  of clinical non-inferiority, 23
  of clinical superiority, 23
  of inequality, 20
  of superiority, 10
asterisk scale, 34, 37, 40, 42, 43, 46
two-tailed test, 48
average power, 62, 66, 68, 69, 71, 72

B
bootstrap, 147
  lower bound for SP, 147, 148, 153
  estimator of SP, 147, 153
  replications, 153
technique, 147, 148

C
calibration, 75, 148
chance, xxv, 53
chi-square test
  $2 \times C$ tables, 136
clinical trials, xxii, xxiii, 25
cost, xxiii, 55, 59, 82, 85
failure, xxiv–xxvi
  rate of, xxvi
times, 82, 85
confidence interval, xxviii, 6–8
  for noncentrality parameter, 109
  for the effect size, 8
  one-sided, 8
  for RP, 35
two-sided, 8
confidence level, 6–8
conservativeness, xxviii
  amount of, xxviii, 37, 70
  optimal amount of, 72, 74, 75
  estimation, 73, 75
nonparametric, 159

cost
clinical trials, xxiii, 55, 59, 82, 85
critical value, 11, 16

D
disagreement
in WRS RP-testing, 154
distribution function, 8, 146
empirical, 147, 161
corrected, 161
smoothed, 162

E
effect size, xxviii, 4
\(\gamma\)-lower bound, 35
assumed, 54
different in phase II, 91, 92, 94
estimate, 5
estimator, 18
conservative, xxviii, 9, 69
distribution of, 7
generic, 27
pointwise, 5
generic, 11, 21
nonparametric, 150
of clinical relevance, 60
ture, 4, 17, 21
estimate, 5
estimation
conservative, 9
pointwise, 4
estimator, 4
conservative, 9
consistent, 5
pointwise, 5
experiment
ideal, xxv
large, xxi
pilot, xxi
experimental
planning, 53

G
Gaussian distribution, 4, 6
standard, 8

H
Hodges-Lehmann estimator, 161

L
launching
criteria, 54, 59
different phase II effect size, 92
equivalence of, 60
criterion
of clinical relevance, 60, 70
of maximum sample size, 60
of phase II statistical significance, 59
probability, 63, 64, 66, 72, 77
launching criteria for
chi-square test
2 \( \times \) \( C \) tables, 138
Mantel-Haenszel, 143
log-rank test, 133
parametric model, 111
\( t \)-test
equal variances, 117
unequal variances, 122
two proportions test, 127
WRS test, 156, 158
link function, 110
chi-square test
2 \( \times \) \( C \) tables, 138
Mantel-Haenszel, 143
log-rank test, 132
\( t \)-test
equal variances, 117
unequal variances, 121
two proportions test, 127
log-rank test, 131
lower bound
for the effect size, 69
statistical, 9
for RP, 37
statistical for RP, 35

M
Mantel-Haenszel test, 141
model
nonparametric, 146
parametric, 107
multiple endpoints, 148

N
noncentrality parameter, 108
$\gamma$-lower bound, 109, 110
chi-square test
$2 \times C$ tables, 136
Mantel-Haenszel, 141
estimator, 109
log-rank test, 131
$t$-test
equal variances, 116
unequal variances, 121
ture, 108
two proportions test, 126
normal distribution, 8
null hypothesis, 10
of clinical equivalence, 24
of clinical non-inferiority, 23
of clinical superiority, 23
two-tailed test, 20

O
overall power, 62, 66, 67, 69, 71, 82–85
chi-square test
$2 \times C$ tables, 138
Mantel-Haenszel, 143
different phase II effect size, 92, 93
estimation, 75
corrected, 98
parametric model, 111
function of $\gamma$, 72, 73
estimation, 75
maximum, 73
parametric model, 111
$t$-test
equal variances, 117
unequal variances, 122
two proportions test, 128
two-tailed test, 90
under the null, 68
WRS test, 158, 160

P
p-value, xxvii, xxviii, 15, 16, 26
distribution, 16, 17
nonparametric model, 146
overemphasized, 32, 33
parametric model, 108
two-tailed test, 22, 23
vs RP estimate, 32–34
p-value testing, 16, 23, 42
percentile, 8
phase I, xxii
phase II, xxii, xxvi, xxvii, 54
phase III, xxii, xxvi–xxvii, 53, 54
launch, 59
phase IV, xxii
pilot
data, 54, 73
experiment, xxii
samples, 18, 57, 58, 75, 147, 152
plug-in
estimator, 27, 147
principle, 18, 35, 58, 75, 109, 152
population means, 4
assumed, 55
power
for SSE, 55, 69, 74
power function, 11, 12, 14, 16, 17, 19, 55
chi-square test
$2 \times C$ tables, 137
Mantel-Haenszel, 141
log-rank test, 131
parametric model, 108
t-test
  equal variances, 116
  unequal variances, 121
two proportions test, 127
two-tailed test, 21
power functional
  nonparametric model, 146
WRS test, 150
  AN approximation, 151

R
random
  sample, 6, 108, 146
  variable, 4
  variation, 4, 5
randomness, xxix, xxv, xxvi, 25
  of sample size estimates, 62
  of test outcomes, 37
rejection region, 11
two-tailed test, 20
reproducibility, xxvi
reproducibility probability, xxvi, xxvii, 18, 25
  estimation, xxvi, xxvii, 18
  conservative, xxvii
RP, 26, 27
  γ-lower bound, 35
estimate, 28
  pointwise, 27
  two-tailed test, 47
values of, 34, 45
  vs p-value, 32–35
  vs p-value - chi-square test, 143, 144
  vs p-value - t-test, 122, 123
estimation, 25, 35
  conservative, 35
  pointwise, 26
  two-tailed test, 47
estimator, 27, 28, 30
  conservative, 35, 38, 42
distribution of, 29
  median, 35
  parametric model, 109
  pointwise, 27, 35, 42
two-tailed test, 47
  for two-tailed test, 47
  parametric model, 109
RP-testing, 30, 37
  chi-square test, 31
  2 × C tables, 137
  Mantel-Haenszel, 142
conservative, 38
  F-test, 31
log-rank test, 131
  parametric model, 110
  t-test, 31
  equal variances, 117
  unequal variances, 121
two proportions test, 127
two-tailed test, 48
  parametric model, 113
WRS test, 154
  WRS test - approximated, 154
Z-test, 30

S
sample mean, 4
sample size, xxiii, xxvi–xxviii, 53
determination, 55
estimate, 59
  behavior, 77, 78, 82
  behavior - WRS, 155, 157
  pointwise, 58
estimation, 18, 54, 58
estimation strategy, xxix
application, 85
estimator, 58, 69, 88
  γ-conservative, 70
  γ-conservative with bias, 93
Bayesian, 78, 80
  conservative - bootstrap, 155
  conservative - WRS, 155
corrected, 97, 98
distribution, 64, 65, 71
estimated distribution - WRS, 159
mean, 62, 65, 70, 71, 83, 86, 87
mean error, 65
median, 65
MSE, 62, 65, 69, 70, 72, 83, 84, 88, 89
parametric model, 111
pointwise, 59
with bias, 92
ideal, 55–58, 69
parametric model, 110
two-tailed test, 88
maximum, 60, 70
Scientific Method, 25, 32
significant outcome, 10
γ-confidence, 38
γ-stable, 37
under $H_0$, 39
randomness of, 25, 27
reproducibility of, 25
stable, 26, 35
single study, 44, 46
smoothing techniques, 162
SP, 17–19, 26, 53, 55, 57, 58
Bayesian posterior, 78
estimation, 18, 58
chi-square tests, 135
Gaussian tests, 125
nonparametric model, 145, 147
parametric model, 110
t-tests, 115
WRS test - AN approximation, 152
WRS test - exact, 152
estimator, 18
Bayesian conservative, 79
Bayesian conservative - nonparametric model, 148
Bayesian conservative - parametric model, 111
Bayesian conservative - two-tailed, 89
bootstrap, 147
comparison - WRS test, 153
conservative, 70
conservative - bootstrap, 147, 153, 154, 162
conservative - nonparametric model, 147
conservative - two-tailed, 89
two-tailed test, 88
function of the sample size, 56, 57
nonparametric model, 147
parametric model, 110
nonparametric model, 147
overall, 62, 66
gain, 85
parametric model, 109
phase II, 59
random variable, 62, 66
distribution, 66, 67
two-tailed test, 21, 22
WRS test, 150
AN approximation, 151
AN approximation - ties, 162
SSE, 54, 58
bias corrections, 96
equivalence of, 98
parametric model, 111
postulated correction, 97
postulated correction - WRS test, 161
t-test, 117
two proportions test, 129
type I error correction, 96, 97
type II error correction, 96, 97
WRS test, 161
biased, 91, 92
conservative, 54
two-tailed test, 90
log-rank test, 132
parametric model, 110
t-test
equal variances, 117
unequal variances, 121
two proportions test, 127
two-tailed test, 87
parametric model, 113
SSE strategy, 59, 62, 63
γ-conservative, 72
1SES, 63, 82, 84
corrected, 98, 100, 103
different phase II effect size, 94, 95
3QS, 72, 82, 84
corrected, 98, 100, 103
different phase II effect size, 94, 95
asymptotic behavior, 83
Bayesian conservative – BAS, 80, 82, 84
Bayesian truncated conservative
– BAT, 80, 82, 84
corrected, 99, 100, 103
different phase II effect size, 93–95
comparison, 82
different phase II effect size, 94
conservative, 62, 63, 69
corrected, 98
asymptotic behavior, 100, 102, 103
comparison, 99, 102, 103
higher than necessary, 99, 100
higher than necessary – performance, 102
operating conditions, 100
performance, 101
right correction, 99, 100
right correction – performance, 103
smaller than necessary, 99, 100
smaller than necessary – performance, 100
COS, 73, 76, 82, 84
behavior, 77
corrected, 98–100, 103
different phase II effect size, 93–95
two-tailed test, 90
WRS test, 159
evaluation of performance, 69
different phase II effect size, 94
frequentist, 63
operating conditions, 83, 94
WRS test, 153
optimal conservative, 72
performance, 62
different phase II effect size, 95, 96
PWS, 61, 82, 84
corrected, 98, 100, 103
different phase II effect size, 94, 95
robustness, 94
stability, xxvi, xxvii, 18, 32, 35, 41

success probability, xxv–xxvii, 17, 25
  estimation, xxvi
success rate, xxiv

T
$t$-test
  equal variances, 116
  unequal variances, 121
test statistic, 11
  distribution, 13
    parametric model, 108
distribution under the null, 11, 13
  parametric model, 108
nonparametric model, 146
parametric model, 108
  two-tailed test, 20
  WRS test, 149
    AN approximation, 150
    AN approximation - ties, 162
threshold
  for RP-testing, 29, 30, 37
  for the power, 42
  of scientific relevance, xxviii, 60
    nonparametric, 150
    two proportions test, 128
ties, 161, 162
times
  clinical trials, 82, 85
true power, 17–19, 27
two proportions test, 126
two-study requirement, 44
type I error, xxvi, 10
  overall, 68
  phase II, 59
  probability, 11, 16, 26
    for SSE, 54
    two-tailed test, 20
type II error, xxvi, 12
  probability, 12
    two-tailed test, 21
two-tailed test, 21
type III error, 21, 22
  probability, 22

V
variability, xxvii, xxviii
  in RP estimation, 35
  in SSE, 54, 65, 69
  of estimators, 4, 6
  of test outcomes, 37
very persuasive findings, 46

W
Wilcoxon rank-sum test, 149

Z
$Z$-test
  one-tailed, 11
  two-tailed, 21
