Introduction to the 7th Edition xvii
About the Companion Website xx

Section 1 Setting the Scene

Chapter 1 Research and Development in Nursing 3
Kate Gerrish
Key points 3
Introduction 3
Nursing research and development 4
Developing nursing knowledge 7
Research awareness, utilisation and activity 9
Research and nursing practice 10
Conclusion 12
References 12
Websites 13

Chapter 2 The Research Process 15
Anne Lacey
Key points 15
Introduction 15
Developing the research question 16
Using a hypothesis 20
Searching and evaluating the literature 21
Choice of methodology and research design 22
Preparing a research proposal 23
Gaining access to the data 24
Sampling 25
Pilot study 26
Data collection 26
Data analysis 27
Dissemination of the results 27
Implementation of the results 27
Ensuring rigour 28
Conclusion 29
References 29
Websites 29

Chapter 3 Research Ethics 31
Martin Johnson and Tony Long
Key points 31
The importance of ethics in research 31
Issues for researchers to address 32
Strategies for ethical research 37
Conclusion 39
References 40
Websites 40

Chapter 4 User Involvement in Research 43
Janey Speers and Judith Lathlean
Key points 43
Introduction 43
Why should users be involved in research? 44
Who should be involved? 46
How are users involved? 47
Considerations of user involvement 48
Examples of research involving users 53
Conclusion 53
References 54
Further reading 55
Websites 55

Chapter 5 Research for a Multiethnic Society 57
Sarah Salway and George T.H. Ellison
Key points 57
Introduction 57
The concept of ethnicity 59
Identifying a research focus 61
Ethnic categories and labels 62
Sampling 64

*Section 2 Preparing the Ground*

| Chapter 7 | 89   | Finding the Evidence                                                 | Claire Beecroft, Andrew Booth and Angie Rees | 89           | 89           | 90                                                                      | 90                                | 93             | 94                             | 97               | 100         | 101                   | 103                                               | 104       | 104       | 104                 |         |

*Chapter 8 Critical Appraisal of the Evidence* | 105 | Angie Rees, Claire Beecroft and Andrew Booth | 105 | 105

*What is critical appraisal?* | 106 | The need for critical appraisal | 107 | Validity of research designs | 107

*Chapter 7 Finding the Evidence* | 89 | Claire Beecroft, Andrew Booth and Angie Rees | 89 | 89

*Chapter 10 Planning and Managing a Research Project* | 131 | Carol A. Haigh | 131 | Introduction | 131

*Chapter 9 Preparing a Research Proposal* | 119 | Julie Taylor | 119 | Key points | 119

*Chapter 11 Gaining Access to the Research Site* | 143 | Leslie Gelling | 143 | Key points | 143
Section 3 Choosing the Right Approach

Chapter 12 The Quantitative–Qualitative Continuum 159
Annie Topping
Key points 159
Introduction 159
The characteristics of quantitative and qualitative research 160
Influences and contributions to the development of nursing research 161
Empiricism and the scientific method 161
Quantitative research 163
Qualitative research 165
Critical accounts of research epistemology 167
Blending quantitative and qualitative approaches 168
Judging the quality of quantitative and qualitative research 168
Conclusion 169
References 170
Websites 171

Chapter 13 Sampling 173
Katherine Hunt and Judith Lathlean
Key points 173
Introduction 173
Populations and samples 173
Types of sampling 175
Approaches to random sampling 177
Calculating sample size in quantitative research 180
Sampling in qualitative research 181
Deciding upon sample size in qualitative research 182
Conclusion 183
References 184
Websites 184

Chapter 14 Grounded Theory 185
Immy Holloway and Kathleen T. Galvin
Key points 185
Introduction 185

Key features of grounded theory 186
The relevance of grounded theory in nursing research 186
Symbolic interactionism 188
Data collection and sampling 188
Data analysis 189
The theory 192
Writing memos 193
The use of literature in grounded theory 193
The choice between Glaserian and Straussian grounded theory 194
Problems and strengths of grounded theory 195
Conclusion 195
References 195
Further reading 196
Websites 197

Chapter 15 Ethnography 199
Immy Holloway and Kathleen T. Galvin
Key points 199
Introduction 199
The characteristics of ethnography 200
The use of ethnography in nursing 202
Descriptive and critical ethnography 203
Selection of sample and setting 203
Data collection 204
Fieldwork and fieldnotes 206
Macro- and micro-ethnographies 206
Data analysis and interpretation 207
Relationships and problems in the setting 208
The ethnographic report 209
Conclusion 209
References 210
Further reading 210
Website 210

Chapter 16 Phenomenological Research 211
Kathleen T. Galvin and Immy Holloway
Key points 211
Introduction 211
Purpose of phenomenological research 212
Use of phenomenology in nursing 213
Main features 215
Fieldwork 217
Analytical procedures 219
Strengths and limitations 220
Conclusion 221
Acknowledgement 222
References 222
Further readings 223
Websites 223
Contents

Chapter 29 Focus Groups 401
Claire Goodman and Catherine Evans

Key points 401
Purpose of focus groups 401
Conducting a focus group 403
Online focus groups 407
Data analysis 407
Issues of validity and reliability 408
Advantages of focus groups 409
Limitations of focus groups 409
Ethical issues 410
Conclusion 411
References 411
Further reading 412

Chapter 30 Questionnaire Design 413
Martyn Jones and Janice Rattray

Key points 413
Introduction 413
Purpose of questionnaires 414
Using and adapting validated questionnaires 415
Reliability 416
Validity 416
Developing a questionnaire 417
Administering questionnaires 421
Piloting 422
Response rates 422
Comparison between face-to-face structured interview and postal questionnaires 423
Strengths and limitations of questionnaires 423
Ethical issues 423
Conclusion 424
References 424

Chapter 31 Observation 427
Jo Booth

Key points 427
The purpose of observation 427
Participant observation 431
Non-participant observation 432
Advantages and disadvantages of observation 436
Validity and reliability 437
Ethical issues 438
Conclusion 438
References 438

Chapter 32 Think Aloud Technique 441
Tracey Bucknall and Leanne M. Aitken

Key points 441
Introduction 441
What is thinking aloud? 442

Background to think aloud 442
Applying think aloud in nursing research 442
How to use think aloud 443
Recruitment 446
Data collection 446
Data analysis 447
Validity and reliability 449
Ethical issues 451
Strengths and limitations 451
Conclusion 452
References 453

Chapter 33 Outcome Measures 455
Peter Griffiths and Anne Marie Rafferty

Key points 455
Introduction 455
Nurse-sensitive outcomes 456
Outcomes versus process 458
Characteristics of measures 458
Validity and reliability 461
Bias in measurement 464
Selecting outcome measures 464
Other considerations in identifying outcomes 465
Using clinical data and other routinely collected data in research 466
Conclusion 467
References 467
Further reading 468

Section 5 Making Sense of Data

Chapter 34 Qualitative Analysis 471
Judith Lathlean

Key points 471
Introduction 471
Principles of qualitative analysis 472
Examples of methods of analysis 474
Practicalities 481
Examples of analyses 482
Using computer software for qualitative data analysis 485
Conclusion 485
References 485
Further reading 486
Websites 487

Chapter 35 Descriptive Analysis of Quantitative Data 489
Stephen J. Walters and Jenny Freeman

Key points 489
Introduction 489
Data types 490
