## INDEX

Page numbers followed by / refer to figures.

### A

Absorption of light, 29, 30, 173
Acceptable matches, 33
Achromatic colors, 65, 75
Acuity, see Visual acuity
Adaptation to light, 51
Additive color(s), 25
  in illuminant mode of vision, 27–28
  instability of, 91–92
  mixing of light to form, 19–20
Additive media, color
  interactions in, 180–181
Additive mixtures, 19, 20, 221
Additive primaries, 184, 221
Admixture, 221
Advertisements, 203–204
Aerial perspective, see
  Atmospheric perspective
  Africa, 214
  Afterimages:
    and contrast reversal, 98–99, 99/
    defined, 98, 221
  illusions caused by, 107
  Age of Reason, color theory in,
    127–134
  Albers, Josef:
    on color harmony, 147, 149
    color-order system of, 137, 141–142
    on interaction of colors, 92, 180
    in modern color study, 13, 14
    on names of colors, 56
    “volume color” concept of, 116
  Alternative spectrums, 68–70, 79/
  Ambient light, 20
  American Society for Testing and Materials (ASTM), 222
  Analogous colors:
    defined, 73, 221
    hues of, 73, 74/
    in major and minor themes, 150, 151
  Aniline dyes, 211–212, 215, 222
  Aniline purple, 215
  Announcement for a Thesis in Color (Goethe), 132
  Apparel, see Fashion
  Apple Macintosh platform, 183
  Applied artwork, 222
  Applied color, 164–165, 165/
  Architectural design, 40, 212
  Area, color shifts related to, 106
  Aristotle, 12, 126
  Arnheim, Rudolf, 91
  Arousal, phasic vs. tonic, 52
Arrangement, changes in color due to, 92, 95, 108. See also Contrast
Art deco coloring, 212
Artists’ media, 166–169, 167f, 222, 232
Artists’ primaries, 169, 222
Artists’ spectrum, 60–68, 60f
 analogous colors on, 73
 complementary colors of, 70–72
 defined, 66, 222
 in Goethe’s color theory, 133
 harmonious chords in, 140–141, 141f
 hues in, 66–67
 primary, secondary, and intermediate colors in, 67–68
 saturated color in, 68
 value of colors on, 76
 The Art of Color (Iten), 138
 Associative color, 60–61
 ASTM (American Society for Testing and Materials), 222
 Atmospheric perspective, 109–110, 109f, 222
 Attributes of color, 63–89
 hue, 64–75
 saturation, 83–89
 tone, 89
 value, 75–83
 Awareness of color, 3–5
 Azo dyes, 222

B
Backlighting, in monitors, 185
Baker-Miller pink, 52–53
Bakst, Leon, 216
Balance, in color harmony, 138–139, 145
Ballets Russes, 215
Barrett Browning, Elizabeth, 15
Base, 166–169, 222
Bauhaus movement, 136–138
Beam:
 incident, 28, 34, 229
 reflected, 28, 34, 232
Beauty:
 for ancient Greeks, 126
 color as component in, 6
 and color harmony, 145–147
 defined, 145, 222
 Belonging, harmony and, 145
 Benjamin Moore Color System, 10
 Berlin, Brent, 55
 Bezold, Wilhelm von, 122, 137
 Bezold effect, 122, 223
 Binary code colors, 197–199, 223
 Binder, see Base; Vehicle
 Binocular vision, 109
 Bit, 184, 223
 Bit-depth, of monitors, 184
 Bitmap, 223
 Black:
 as achromatic color, 75
 “added,” 77
 in Aristotle’s color theory, 126
 in CMYK display mode, 187
 in color coding, 197, 198
 symbolism associated with, 58
 undertones in, 159
 Black colorants, 29
 Blocks of color, Bezold effect and, 122
 Block printing, 177–178
 Blue:
 in artists’ spectrum, 67
 in binary color coding, 197
 complement of, 71
 coolness of, 72
 in hexadecimal system, 198
 human responses to, 52
 on luminosity scale, 139
 as primary color of light, 19
 process, 172
 symbolism associated with, 57
 Tiffany, 210–211
 Boscobel, 214
 Boundaries, vanishing, 120
 Brain:
 color harmony and biases in, 159
 and optical illusions, 107–108
 response to light in, 50–52
 Brand recognition, 204
 Brilliance, 182, 223
 Broken color, 157–159, 223
 Brown, 74–75
 Business applications of color, see Color industries

C
Calibration:
 color management tools for, 190–191
 defined, 190, 223
 and selection of color for web pages, 196–197
 Carried colors, 93–94, 223
 Carroll, Lewis, 63
 Cathode ray tube (CRT) monitors, 184
 CAUS (Color Association of the United States), 206, 217–218
 Cerebral cortex, 51–52, 54
 CFLs (compact fluorescent lamps), 24
 Channels (RGB mode), 188
 Chevreul, Michel Eugene, 133, 134
 China, 6, 58
Chords, color, see Color chords
Chroma, see Saturation
Chromatic (term), 65, 223
Chromatic adaptation, see
Afterimages
Chromatic neutrals, 74–75, 86
Chromatic scales, 70
Chromotherapy, 223
CIE (Commission Internationale
de l’Éclairage, International
Commission on Illumination),
9–10, 224
CMG (Color Marketing Group),
203, 206–207
CMYK code colors, 198
CMYK display mode, 187, 187f, 224
CMYK printing, see Cyan, magenta,
yellow, or black printing
Coats Industrial Thread Company,
11
Coca-Cola, 209
Cognitive illusions, 107
“Collective unconscious,” 57
Color:
defined, 224
separating other attributes of
objects from, 162–163
uses of, 6–8
Color, Environment, and Human
Response (Mahnke), 57
Colorants:
application of, 164–165
in artists’ media, 166–168
black, white, and gray, 75
for CMYK printing, 172
defined, 29, 224
manufacturing of, 205
modifying light with, 28–31
substrates and, 205
subtractive mixing of, 169–170
Color harmony, 145–160
and beauty, 145–147
color numbering and, 138–141
in color theory, 126, 127
defined, 146
dissonant colors, 156–157
hue in, 149–151
intervals in, 147–149
Itten’s approach to, 138
saturation in, 153–156
searching for, 159–160
surface as consideration in, 157–159
value in, 151–153
Color illusions, 108
Colorimeters, 190–191, 224
Color industries, 205–220
color consulting for, 208
color cycles in, 216–218
color forecasting in, 206–208
color sampling in, 205–206
current conditions in, 218–219
and fashion, 215–216
interactions between, 204
 manufacture of colorants in,
205
palettes for, 211–215
product identity in, 209–210
Coloritto (LeBlon), 130
Color management, 189–195, 191f,
225
Color marketing:
color cycles in, 216–218
color forecasting in, 206–208
color production and, 204
color sampling in, 205–206
current conditions in, 218–219
naming of colors in, 56
palettes for, 211–215
product identity in, 209–210
Color Marketing Group (CMG), 203, 206–207
Colormate program, 33
Color memory, 54–55, 225
ColorMunki, 190
Color notation, 225
Color-order system(s), 9–12, 135f
of Bauhaus group, 137–138
in color study, 14
in color theory, 125–126
commercial vs. intellectual-philosophical, 9–12
of Munsell and contemporaries, 134–137, 136f
of Newton, 128–130
The Color Primer (Ostwald), 136
Color printing, see Printing
Color production:
colorants in, 205
color consulting for, 208
color cycles in, 216–218
color forecasting in, 206–208
color marketing and, 204
current conditions in, 218–219
for fashion, 215–216
Color rendering index (CRI), 10, 32, 225
Color rendition, light and, 31–32
Color sampling, 205–206
Color Science (Ostwald), 136
Color separations (CMYK printing), 174, 175f
Color solid, 137f, 225
Color story, see Color composition
Color study, 1–14
awareness of color in, 3–5
color-order systems in, 9–12
experience of color in, 1–3
focuses of, 13–14
naming of colors in, 56
uses of color in, 6–8
Color systems, 10–11. See also Color-order system(s)
Color temperature. See also Cool colors; Warm colors
color-order systems based on, 9–10
and color rendering index, 32
defined, 9, 23, 225
and hue, 72
of light from lamps, 23–24
Color theory, 125–143
Albers approach in, 141–142
ancient Greek, 126
color numbering and laws of
color harmony in, 138–141
color-order systems in,
134–138
defined, 125, 128
Enlightenment, 127–134
and intellectual-philosophical systems, 12
Renaissance, 127
Color therapy, 53
Color vision, 44–45
Colorway, see Color composition
Color wheel, see Artists’ spectrum
Colwell Industries, 205–206
Commercial color systems, 10–12, 10f
Commission Internationale de
l’Éclairage (CIE), 9–10, 224
Communication design, 180
Compact fluorescent lamps
(CFLs), 24
Comparisons of color:
with different hues, 78f, 79
lamps for, 30–31
Competence, color, 13
Complementary colors
(complements), 71f
and color harmony, 139–141, 149
defined, 70, 225
diluting hues with, 86–87, 87f
in Enlightenment color theory, 133
hues of, 70–72
in major and minor themes, 150–151
in optical mixes, 123
and theoretical gray, 87
and vibration effect, 118–119
Complementary contrast, 101f, 102f
defined, 100, 225
with ground subtraction, 105
as optical illusion, 100–102
Completeness, in color harmony, 159
Completing colors, 101, 149
Complex colors, ground subtraction for, 105
Compositions, 92–93, 226. See also
Color composition
Cones (of eye), 50–51, 226
Consumers:
color as criteria for, 195–196, 203
color cycles for, 216–218
color preferences of, 206–208
influences on current color choices by, 218–219
Continuous experience of color, 129–130
Contrast:
complementary, 100–102, 101f,
102f, 105, 225
and identification of images, 80, 81
simultaneous, 96–98, 97f, 133, 233
spatial effects of, 113–114
  types of, 96–102
  Contrast reversal, 98–99, 99f, 226
  Control, in color study, 15
  Controlled palettes, 216–218
Cool colors:
  hues of, 72
  spatial effects of, 111–112, 112f
  transparency illusion with, 117
Coolidge, Calvin, 203
Cool white, 23, 24
Crayons, 168
CRI, see Color rendering index
CRT (cathode ray tube) monitors, 184
Crusades, 214
Culture(s):
  palettes and, 214–215
  and semantics of color, 57
Cyan, 19, 172
Cyan, magenta, yellow, or black
  (CMYK) printing:
    and CMYK color coding, 198
    colorants in, 205
    color system for, 11
    process colors in, 172–176
    and screen images, 195
    spot colors in, 176–177

D
Dark, discrimination of light and,
  27, 44
Dating of objects, palette in,
  211–212
DayGlo media, 168–169, 176
Daylight, 22, 24
Dead languages, 56
Delaunay, Robert, 216
Delaunay, Sonia, 216
Depth, illusion of, see Illusion of depth
Depth cues:
  and illusion of depth, 109–111
  pictorial, 110–111, 110f, 231
  shading as, 117–118
  spatial effects of color without,
  114, 114f
Depth perception, 109
Design, 181, 203, 226
Design concept, 146, 226
Design media, 166–169
Design process:
  attributes of color in, 63–64
  color composition in, 93
  color standards in, 190
  defined, 226
Design professionals:
  color for, 1–3
  color study for, 14
  importance of color changes
  for, 91
  interval creation by, 147–148
  renderings for, 161
  screen images for, 180
Diaghilev, Serge, 215
Dilution:
  with complementary colors,
  86–87, 87f
  defined, 226
  with gray, 85, 85f
Direct light, 1–2
Displays, for screen images,
  183–186
Display light, 20
Display modes, 186–189, 187f–189f,
  226
Dissonant colors, 156–157, 157f
Dithering, 189, 226. See also Gamut
Divisionism, see Optical mix
Document colors, 213–214, 213f, 226
Dominant quality, of color, 114, 115
Dyes:
  aniline, 211–212, 215, 222
  azo, 222
  coloring objects with, 164
  defined, 164, 226
  fugitive, 168, 227
  pigments vs., 167–168
  simultaneous contrast and,
  133

E
E-books, 201–202
Egyptians, ancient, 214
8-bit-depth monitors, 184
Eight-color process printing, 176
E-ink, 201–202, 227
Einstein, Albert, 107
EISA (Energy Independence and
  Security Act of 2007), 24, 227
Electronic readers, 201–202
Emitted color, 190
Emotion, see Mood
Energy Independence and Security
  Act (EISA), 24, 227
Enlightenment color theory,
  127–134
Environmental color, 3, 4f
Equal values, 78f, 79, 79f
Equilibrium, 95–96, 96f, 227
Essential Palette, 208
Eugenie de Montijo, 215
Eve Ashcraft Studio, 208
Even intervals:
  in color harmony, 148–149, 149f,
  151, 160
  defined, 45, 227
Even intervals (cont.)
responses to, 45–48, 46f, 47f
series of, 46, 46f
Experience of color, 1–3
continuous, 129–130
and Goethe’s color theory, 132
in products, 162–164
with screen images, 181–182
Eye(s), 50f
    color harmony and, 159
    equilibrium state for, 95–96, 96f, 227
    illusions and, 107–108
    response to light in, 50–51
Eye-training, 13, 14

F
Far East, 214
Farrow and Ball, 11
Fashion:
    color cycles in, 216–217
    color forecasting for, 208
    color production for, 215–216
Feininger, Lyonel, 137
Field, 93, 227. See also Ground
Figure-ground separation, 49
    and color harmony, 151–153
    and ground vs. carried colors, 94
    and value, 80–81, 113–114, 113f/
Filters:
    defined, 40, 227
    and light, 40–41, 40f/
    process colors as, 173, 173f/
Flat color, 158–159
Fluorescent backlighting, 185
Fluorescent lamps, 23–24, 227
Fluting, 117–118, 117f–118f, 227
Focus, saturation and, 156
Forecast Colors, 207, 207f/
Forecasting, color, 142, 206–208, 224
Form:
    in product identification, 209–210
    recognition of, 49
48-bit color, 186
Four-color LCD technology, 186
Four-color process printing, 176
Fovea, 51
France, fashion colors from, 215–216
Frequency of light, 16
Fugitive dyes, 168, 227
Full color, see Saturated color
Full-spectrum colors, 86
Full-spectrum lighting, 26

G
Gagnon, Paul, 185
Gamut (color gamut), 184, 227
General Electric, 24, 33
General light sources, 20–25
Glare, 27
Glitter, 227
Global Colour Reference of
    Industrial Apparel Thread
Shades, 11
Globalization, 219
Gloss:
    defined, 227
    and perception of color in
    products, 163
    screen images of glossy surfaces,
    182
    of specular surfaces, 34, 35
Glowing, 120, 121f
Goethe, Johann Wolfgang von, 12
    color harmony for, 138, 145, 146
    color-order system of, 128,
    131–134, 136
on completing colors, 101, 149
