quality (colonoscopy) 161–166
endoscope reprocessing/infection control 163
high-quality 161
metrics/measurement 161–163, 164
quality-improvement programs continuous (CQI) 161
R
radiation proctopathy 72
recovery area 5–6
recovery beds, capacity/number 6
recovery room 22
rectal bleeding 72, 153, 154
etiology 71
radiation injury causing 72
see also bleeding
rectal cancer
surgical resection, follow-up 27
rectal folds (valves of Houston), blind spots 65, 102
rectal polyps 116, 136
rectal ulcer, solitary 72
rectum
distal, malignant polyps 136
foreign body removal 145
radiation injury 72
retroflexion 65, 102
renal failure, bowel preparations associated 33, 156
reporting system, endoscopic 5
reports (colonoscopy) 165
contents 165
quality 162
“resect and discard” strategy 188
resuscitation equipment 42
retroflexion 65–67
anus 70
cecum 59, 66
difficult polypectomy 127
rectal 65, 102
right colon 66, 67, 102
retroscope, third eye 67, 189
rigid sigmoidoscopy, sigmoid volvulus 143
risk of colonoscopy, sigmoid volvulus 189
robotic technology 189
Roth Net 11
S
safety belt 17, 18
saline, submucosal fluid injection 94, 122, 124, 134
scheduling, time required for colonoscopy 118, 169
“Scope Guide” 54
screening colorectal cancer see colorectal cancer
see also surveillance recommendations
sedation 39–45, 46
approaches for colonoscopy 40–41
drugs for 39–40, 40–41, 43
see also drugs
endoscopy assistant role 17–18, 43
equipment for 41–42
history-taking for 41
pediatric 28
propofol 40, 41, 42–43
quality end point 162
staffing for 40, 41, 42–43
self-expanding metallic stents (SEMS)
benign anastomotic strictures 142
indications 142
malignant colonic obstruction 141–142
sigmoid colon
diverticular disease see diverticular disease, sigmoid
insertion of scope into 57
lacerations due to diagnostic colonoscopy 144
looping of scope 57
perforation due to 150
volvulus 142–143
sigmoidoscopy, flexible see flexible sigmoidoscopy
snare polypectomy
5 o’clock positioning 107, 113
angle for approach 108
cautery 106, 110–111
choice of snare 105
endoscopist position 111
flat or sessile polyps 109, 111, 112
large polyps 110, 113
malignant polyp 133, 134–135
perforation due to 150
“tenting” of polyp 104, 105, 112, 128
transecting polyp 110–111, 112
snares see polypectomy snares
specimen
biopsy, handling 84–85
polypectomy see polypectomy
specimen traps 12
types 12
Spider Net 11
spike forceps 83–84
splenic flexure
blind spot 65
intubation 58
splenic rupture/hemorrhage 155
staining, chromoendoscopy 178, 179
stents
designs, for malignant colonic obstruction 141–142
self-expanding metallic (SEMS) 141, 141–142
stretcher 4, 46, 47
strictures, colonic 76
ileo-anal anastomosis 77
TTS balloon dilatation 142
submucosal fluid injection
cancer cell tracking 124
disadvantages 124
method 122, 123
non-lifting sign and 123–124, 134, 134
polyp elevation by 94, 105, 122–124
cancerous polyp 124
serrated polyp 124
suspected malignant polyp 134
volume 123
suction/suctioning 63
failure, troubleshooting 21
polyp retrieval after polypectomy 113, 114
suprapubic pressure 53, 57
surgical approach
malignant polyp resection 135, 136
perforation management 152
surveillance recommendations colorectal cancer 26, 186
inflammatory bowel disease 74
post-resection 27
malignant polyp resection 135–136
post-polypectomy 26–27
T	
tamponade of vessels 145, 154
tandem colonoscopy 63, 101
tattooing
incomplete polypectomy of large sessile polyp 120, 122
site of colorectal cancer 69
site of suspected malignant polyp 135
teaching/training see training (colonoscopy)
terminal ileum 25
abnormalities 81
Crohn’s disease 73
entering 60, 62
intubation 60–62
tips for 60–61
mucosa, appearance 62
orifice 60, 61
see also ileoecal valve
therapeutic colonoscopy 140–146, 186–187
bleeding after 153
contraindications 140
foreign body removal 145
pediatric 29
perforation/lesion closure 144, 144–145, 151
polyp removal see polypectomy
thermal techniques 91–98
devices used in colonoscopy 95
see also electrosurgery
third eye retroscope 67, 189
through-the-scope (TTS) balloon, benign colonic obstruction 142
through-the-scope (TTS) stents 141, 141–142
tissue retrieval
polypectomy specimen 112, 113
torque
clockwise vs counterclockwise 48, 48–49
to reduce loops 52
trainees 170, 171
trainers 170
positioning 170–171
training (colonoscopy) 167–174
challenges 167
competence assessment 172–173
of endoscopic assistant 16–17
methods 172
of mid-career colonoscopists 167, 171–172
patient safety as priority 168
technical proficiency 173
transparent caps 14
transverse colon intubation 58–59
TTS balloon 142
U
ulcer(s), mucosal, biopsy 86
hemostasis by argon plasma coagulation 97
videotaping, colonoscopy 161
“virtual” colonoscopy see computed tomographic colonography (CTC)
“vital” stains 178
volvulus, colonic 142–143
W
waiting area 5–6
warfarin 30, 31
washing and suction 55–56, 63
difficult polypectomy 119
water instillation 51, 62
water-jet method, dye application 179
water method (of colonoscopy) 51, 179, 187
pros and cons 179
withdrawal of scope 63–65
blind spots 64–65, 102
water jet method, dye application 179
water method (of colonoscopy) 51, 179, 187
pros and cons 179
withdrawal of scope 63–65
blind spots 64–65, 102
water instillation 51, 62
difficult polypectomy 119
water-jet method, dye application 179
water method (of colonoscopy) 51, 179, 187
pros and cons 179
withdrawal of scope 63–65
blind spots 64–65, 102
cleaning mucosa 63–64
non-thermal treatment of bleeding 145
perforation detection 150
polyp detection 102–103
technique, quality end point 162
time taken 64, 103
