About the Authors xiii
Foreword xv
Preface xvii

1 Teamwork in Multi-Agent Environments 1
1.1 Autonomous Agents 1
1.2 Multi-Agent Environments as a Pinnacle of Interdisciplinarity 2
1.3 Why Teams of Agents? 2
1.4 The Many Flavors of Cooperation 3
1.5 Agents with Beliefs, Goals and Intentions 4
1.6 From Individuals to Groups 4
1.7 Group Attitudes 5
1.8 A Logical View on Teamwork: TEAMLOG 5
1.9 Teamwork in Times of Change 6
1.10 Our Agents are Planners 7
1.11 Temporal or Dynamic? 8
1.12 From Real-World Data to Teamwork 9
1.13 How Complex are Models of Teamwork? 10

2 Beliefs in Groups 11
2.1 Awareness is a Vital Ingredient of Teamwork 11
2.2 Perception and Beliefs 12
2.3 Language and Models for Beliefs 13
2.3.1 The Logical Language for Beliefs 13
2.3.2 Kripke Models for Beliefs 14
2.4 Axioms for Beliefs 14
2.4.1 Individual Beliefs 15
2.4.2 From General to Common Belief 16
2.5 Axioms for Knowledge 18
2.6 Relations between Knowledge and Belief 20
2.7 Levels of Agents’ Awareness 21
4.4.3 A Paradigmatic Group Commitment 67

4.5 Different Notions of Collective Commitment 69
4.5.1 Robust Collective Commitment 69
4.5.2 Strong Collective Commitment 70
4.5.3 Weak Collective Commitment 70
4.5.4 Team Commitment 71
4.5.5 Distributed Commitment 71
4.5.6 Awareness of Group Commitment 72

4.6 Topologies and Group Commitments 72
4.6.1 Robust Commitments with a Single Initiator under Infallible Communication 73
4.6.2 Star Topology with a Single Initiator under Restricted Communication 74
4.6.3 Ring Topology with a Single Initiator 75
4.6.4 A Hierarchical Group: Trees of Shallow Depth 77

4.7 Summing up TEAMLOG: The Static Part of the Story 78
4.7.1 Comparison 79
4.7.2 Moving Towards a Dynamic View on Teamwork 79

5 Reconfiguration in a Dynamic Environment 81
5.1 Dealing with Dynamics 81
5.1.1 Collective Commitments in Changing Circumstances 82
5.1.2 Three Steps that Lead to Team Action 82

5.2 The Four Stages of Teamwork 83
5.2.1 Potential Recognition 83
5.2.2 Team Formation 85
5.2.3 Plan Generation 85
5.2.4 Team Action 86

5.3 The Reconfiguration Method 86
5.3.1 Continuity and Conservativity 88
5.3.2 Reconfiguration Algorithm = Teamwork in Action 88
5.3.3 Cycling through Reconfiguration 89
5.3.4 Complexity of the Algorithm 91

5.4 Case Study of Teamwork: Theorem Proving 91
5.4.1 Potential Recognition 92
5.4.2 Team Formation 93
5.4.3 Plan Generation 93
5.4.4 A Social Plan for Proving the Theorem 94
5.4.5 A Collective Commitment to Prove the Theorem 94
5.4.6 Team Action 95

6 The Evolution of Commitments during Reconfiguration 99
6.1 A Formal View on Commitment Change 99
6.1.1 Temporal versus Dynamic Logic 100

6.2 Individual Actions and Social Plan Expressions 101
6.2.1 The Logical Language of TEAMLOG$^{dyn}$ 101
Contents

8.5 Persuasion During Team Formation 150
  8.5.1 Creating Collective Intention 150
  8.5.2 Agents Persuading One Another to Join the Team 151
  8.5.3 Speech Acts and their Consequences During Persuasion 152
  8.5.4 Announcing the Success of Team Formation 154
  8.5.5 Team Formation Through the Magnifying Glass 155

8.6 Deliberation During Planning 157
  8.6.1 Stages of Deliberation: Who Says What and with Which Effect? 157
  8.6.2 The Three Steps of Planning 160
  8.6.3 Task Division under the Magnifying Glass 161
  8.6.4 Action Allocation Under the Magnifying Glass 163

8.7 Dialogues During Team Action 166
  8.7.1 Communication Supports Reconfiguration 167

8.8 Discussion 168

9 Complexity of Teamlog 169
  9.1 Computational Complexity 169
    9.1.1 Satisfiability, Validity and Model Checking 170
    9.1.2 Combination May Lead to Explosion 172
  9.2 Logical Background 173
    9.2.1 The Language 173
    9.2.2 Semantics Based on Kripke Models 174
    9.2.3 Axiom Systems for Individual and Collective Attitudes 175
  9.3 Complexity of TEAMLOG^{ind} 176
    9.3.1 The Algorithm for Satisfiability of TEAMLOG^{ind} 179
    9.3.2 Effect of Bounding Modal Depth for TEAMLOG^{ind} 182
    9.3.3 Effect of Bounding the Number of Propositional Atoms for TEAMLOG^{ind} 183
  9.4 Complexity of the System TEAMLOG 183
    9.4.1 Effect of Bounding Modal Depth for TEAMLOG 186
    9.4.2 Effect of Bounding the Number of Propositional Atoms for TEAMLOG 190
    9.4.3 Effect of Restricting the Modal Context for TEAMLOG 191
  9.5 Discussion and Conclusions 194

A Appendix A 197
  A.1 Axiom Systems 197
    A.1.1 Axioms for Individual and Collective Attitudes 197
    A.1.2 Axioms for Social Commitments 198
    A.1.3 Tuning Schemes for Social and Collective Attitudes 199
    A.1.4 Axioms for Exemplary Collective Commitments 199
    A.1.5 Axioms and Rules for Dynamic Logic 201
  A.2 An Alternative Logical Framework for Dynamics of Teamwork: Computation Tree Logic 201
