Contents

Preface to the Third Edition, ix
Acknowledgements, xii

1 Definitions and Epidemiology, 1
Definitions, 1
Frequency and population features of epilepsy, 3

2 Seizure Type and Anatomical Location of Seizures, 6
Seizure type, 6
Classification of partial seizures by anatomical site of seizure onset, 12

3 Epilepsy Syndromes, 19
ILAE Classification of the Epilepsies and Epilepsy Syndromes, 19
The epilepsy syndromes, 21

4 The Causes of Epilepsy, 33
Idiopathic epilepsy, 33
Symptomatic epilepsy of genetic or congenital origin, 36
Symptomatic epilepsy due to acquired causes, 54
Provoked seizures, 67

5 Principles of Treatment, 75
Why treat epilepsy? The aims of treatment, 75
The risks of epilepsy and its treatment, 76
Choice of antiepileptic drug therapy based on seizure type, 81
Treatment of specific epilepsy syndromes, 89
Principles of treatment of newly diagnosed patients, 96
Principles of treatment of patients with established active epilepsy, 101
Treatment of patients with epilepsy in remission, 104
Psychiatric disorders in epilepsy, 107
Life-threatening idiosyncratic reactions, 116
Complementary and alternative therapy in epilepsy, 118
Genetic counselling in epilepsy, 121

6 Treatment of Epilepsy in Specific Groups, 127
Treatment of epilepsy in children, 127
Treatment of epilepsy in patients with additional handicaps, 129
Epilepsy in elderly people, 132
Treatment of epilepsy in women, 136

7 Pharmacokinetic Principles of Antiepileptic Drug Treatment, 147
Drug absorption, 147
Drug distribution, 148
Drug elimination (metabolism and excretion), 150
Blood level measurements, 153

8 The Antiepileptic Drugs, 158
   Carbamazepine, 158
   Clobazam, 170
   Clonazepam, 174
   Eslicarbazepine acetate, 177
   Ethosuximide, 181
   Gabapentin, 185
   Lacosamide, 189
   Lamotrigine, 192
   Levetiracetam, 199
   Oxcarbazepine, 205
   Phenobarbital, 210
   Phenytoin, 218
   Pregabalin, 229
   Primidone, 232
   Rufinamide, 235
   Tiagabine, 238
   Topiramate, 244
   Valproate, 252
   Vigabatrin, 261
   Zonisamide, 267
   Other drugs used in the treatment of epilepsy, 272
      Acetazolamide, 273
      Benzodiazepines, 275
      Corticosteroids and ACTH, 278
      Felbamate, 278
      Piracetam, 281
      Stiripentol, 285

9 The Emergency Treatment of Epilepsy, 287
   How to deal with a seizure, 287
   Status epilepticus, 288
   Antiepileptic drugs used in status epilepticus, 307

10 The Surgical Therapy of Epilepsy, 314
   Presurgical assessment – general points, 315
   Surgery in epilepsy arising in the mesial temporal lobe, 321
   Surgery in epilepsy arising in extratemporal regions and the
temporal neocortex, 339
   Cortical dysplasia (malformations of cortical development), 349
   Surgery where no lesion is apparent on neuroimaging
      (‘MRI-negative cases’), 351
   Hemispherectomy, hemispherotomy and other large resections, 352
   Corpus callosectomy (corpus callosum section, corpus callosotomy), 356
   Multiple subpial transection, 358
   Vagal nerve stimulation, 359
   Other functional surgical procedures, 362
