List of Figures ........................................... xiii  
List of Tables ........................................... xvi  
List of Examples ......................................... xxi  
Foreword ................................................... xxv  
Preface to Volume IV ....................................... xxix  

### IV.1 Value at Risk and Other Risk Metrics .......................... 1  
  IV.1.1 Introduction ...................................... 1  
  IV.1.2 An Overview of Market Risk Assessment ............... 4  
      IV.1.2.1 Risk Measurement in Banks .................. 4  
      IV.1.2.2 Risk Measurement in Portfolio Management ... 6  
      IV.1.2.3 Risk Measurement in Large Corporations ... 7  
  IV.1.3 Downside and Quantile Risk Metrics ................... 9  
      IV.1.3.1 Semi-Standard Deviation and Second Order Lower Partial Moment ......................... 9  
      IV.1.3.2 Other Lower Partial Moments ................. 10  
      IV.1.3.3 Quantile Risk Metrics ....................... 11  
  IV.1.4 Defining Value at Risk ............................ 13  
      IV.1.4.1 Confidence Level and Risk Horizon .......... 13  
      IV.1.4.2 Discounted P&L ............................. 15  
      IV.1.4.3 Mathematical Definition of VaR ............. 15  
  IV.1.5 Foundations of Value-at-Risk Measurement ............. 17  
      IV.1.5.1 Normal Linear VaR Formula: Portfolio Level 18  
      IV.1.5.2 Static Portfolios ........................... 20  
      IV.1.5.3 Scaling VaR ................................. 21  
      IV.1.5.4 Discounting and the Expected Return ....... 23  
  IV.1.6 Risk Factor Value at Risk .......................... 25  
      IV.1.6.1 Motivation .................................. 26  
      IV.1.6.2 Normal Linear Equity VaR ................... 27  
      IV.1.6.3 Normal Linear Interest Rate VaR ............ 29
IV.1.7 Decomposition of Value at Risk
  IV.1.7.1 Systematic and Specific VaR
  IV.1.7.2 Stand-alone VaR
  IV.1.7.3 Marginal and Incremental VaR
IV.1.8 Risk Metrics Associated with Value at Risk
  IV.1.8.1 Benchmark VaR
  IV.1.8.2 Conditional VaR: Expected Tail Loss and Expected Shortfall
  IV.1.8.3 Coherent Risk Metrics
IV.1.9 Introduction to Value-at-Risk Models
  IV.1.9.1 Normal Linear VaR
  IV.1.9.2 Historical Simulation
  IV.1.9.3 Monte Carlo Simulation
  IV.1.9.4 Case Study: VaR of the S&P 500 Index
IV.1.10 Summary and Conclusions

IV.2 Parametric Linear VaR Models
IV.2.1 Introduction
IV.2.2 Foundations of Normal Linear Value at Risk
  IV.2.2.1 Understanding the Normal Linear VaR Formula
  IV.2.2.2 Analytic Formula for Normal VaR when Returns are Autocorrelated
  IV.2.2.3 Systematic Normal Linear VaR
  IV.2.2.4 Stand-Alone Normal Linear VaR
  IV.2.2.5 Marginal and Incremental Normal Linear VaR
IV.2.3 Normal Linear Value at Risk for Cash-Flow Maps
  IV.2.3.1 Normal Linear Interest Rate VaR
  IV.2.3.2 Calculating PV01
  IV.2.3.3 Approximating Marginal and Incremental VaR
  IV.2.3.4 Disaggregating Normal Linear Interest Rate VaR
  IV.2.3.5 Normal Linear Credit Spread VaR
IV.2.4 Case Study: PC Value at Risk of a UK Fixed Income Portfolio
  IV.2.4.1 Calculating the Volatility and VaR of the Portfolio
  IV.2.4.2 Combining Cash-Flow Mapping with PCA
  IV.2.4.3 Advantages of Using PC Factors for Interest Rate VaR
IV.2.5 Normal Linear Value at Risk for Stock Portfolios
  IV.2.5.1 Cash Positions on a Few Stocks
  IV.2.5.2 Systematic and Specific VaR for Domestic Stock Portfolios
  IV.2.5.3 Empirical Estimation of Specific VaR
  IV.2.5.4 EWMA Estimates of Specific VaR
IV.2.6 Systematic Value-at-Risk Decomposition for Stock Portfolios
  IV.2.6.1 Portfolios Exposed to One Foreign Currency
  IV.2.6.2 Portfolios Exposed to Several Foreign Currencies
  IV.2.6.3 Interest Rate VaR of Equity Portfolios
  IV.2.6.4 Hedging the Risks of International Equity Portfolios
IV.2.7 Case Study: Normal Linear Value at Risk for Commodity Futures
### IV.2.8 Student $t$ Distributed Linear Value at Risk
- IV.2.8.1 Effect of Leptokurtosis and Skewness on VaR 106
- IV.2.8.2 Student $t$ Linear VaR Formula 107
- IV.2.8.3 Empirical Examples of Student $t$ Linear VaR 109

### IV.2.9 Linear Value at Risk with Mixture Distributions
- IV.2.9.1 Mixture Distributions 111
- IV.2.9.2 Mixture Linear VaR Formula 113
- IV.2.9.3 Mixture Parameter Estimation 114
- IV.2.9.4 Examples of Mixture Linear VaR 115
- IV.2.9.5 Normal Mixture Risk Factor VaR 119

### IV.2.10 Exponential Weighting with Parametric Linear Value at Risk
- IV.2.10.1 Exponentially Weighted Moving Averages 121
- IV.2.10.2 EWMA VaR at the Portfolio Level 124
- IV.2.10.3 RiskMetrics™ VaR Methodology 126

### IV.2.11 Expected Tail Loss (Conditional VaR)
- IV.2.11.1 ETL in the Normal Linear VaR Model 129
- IV.2.11.2 ETL in the Student $t$ Linear VaR Model 130
- IV.2.11.3 ETL in the Normal Mixture Linear VaR Model 132
- IV.2.11.4 ETL under a Mixture of Student $t$ Distributions 133

### IV.2.12 Case Study: Credit Spread Parametric Linear Value at Risk and ETL
- IV.2.12.1 The iTraxx Europe Index 135
- IV.2.12.2 VaR Estimates 137

### IV.2.13 Summary and Conclusions

### IV.3 Historical Simulation
- IV.3.1 Introduction 141
- IV.3.2 Properties of Historical Value at Risk
  - IV.3.2.1 Definition of Historical VaR 144
  - IV.3.2.2 Sample Size and Data Frequency 145
  - IV.3.2.3 Power Law Scale Exponents 146
  - IV.3.2.4 Case Study: Scale Exponents for Major Risk Factors 147
  - IV.3.2.5 Scaling Historical VaR for Linear Portfolios 150
  - IV.3.2.6 Errors from Square-Root Scaling of Historical VaR 151
  - IV.3.2.7 Overlapping Data and Multi-Step Historical Simulation 151
- IV.3.3 Improving the Accuracy of Historical Value at Risk
  - IV.3.3.1 Case Study: Equally Weighted Historical and Linear VaR 153
  - IV.3.3.2 Exponential Weighting of Return Distributions 156
  - IV.3.3.3 Volatility Adjustment 158
  - IV.3.3.4 Filtered Historical Simulation 163
- IV.3.4 Precision of Historical Value at Risk at Extreme Quantiles
  - IV.3.4.1 Kernel Fitting 165
  - IV.3.4.2 Extreme Value Distributions 167
  - IV.3.4.3 Cornish–Fisher Approximation 170
  - IV.3.4.4 Johnson Distributions 172
- IV.3.5 Historical Value at Risk for Linear Portfolios
  - IV.3.5.1 Historical VaR for Cash Flows 176
  - IV.3.5.2 Total, Systematic and Specific VaR of a Stock Portfolio 179
| IV.3.5.3 | Equity and Forex VaR of an International Stock Portfolio | 185 |
| IV.3.5.4 | Interest Rate and Forex VaR of an International Bond Position | 190 |
| IV.3.5.5 | Case Study: Historical VaR for a Crack Spread Trader | 192 |
| IV.3.6 | Estimating Expected Tail Loss in the Historical Value-at-Risk Model | 195 |
| IV.3.6.1 | Parametric Historical ETL | 195 |
| IV.3.6.2 | Empirical Results on Historical ETL | 195 |
| IV.3.6.3 | Disaggregation of Historical ETL | 197 |
| IV.3.7 | Summary and Conclusions | 198 |

| IV.4 | Monte Carlo VaR | 201 |
| IV.4.1 | Introduction | 201 |
| IV.4.2 | Basic Concepts | 203 |
| IV.4.2.1 | Pseudo-Random Number Generation | 203 |
| IV.4.2.2 | Low Discrepancy Sequences | 204 |
| IV.4.2.3 | Variance Reduction | 206 |
| IV.4.2.4 | Sampling from Univariate Distributions | 211 |
| IV.4.2.5 | Sampling from Multivariate Distributions | 213 |
| IV.4.2.6 | Introduction to Monte Carlo VaR | 213 |
| IV.4.3 | Modelling Dynamic Properties in Risk Factor Returns | 215 |
| IV.4.3.1 | Multi-Step Monte Carlo | 215 |
| IV.4.3.2 | Volatility Clustering and Mean Reversion | 218 |
| IV.4.3.3 | Regime Switching Models | 223 |
| IV.4.4 | Modelling Risk Factor Dependence | 225 |
| IV.4.4.1 | Multivariate Distributions for i.i.d. Returns | 226 |
| IV.4.4.2 | Principal Component Analysis | 230 |
| IV.4.4.3 | Behavioural Models | 232 |
| IV.4.4.4 | Case Study: Modelling the Price – Volatility Relationship | 232 |
| IV.4.5 | Monte Carlo Value at Risk for Linear Portfolios | 233 |
| IV.4.5.1 | Algorithms for VaR and ETL | 235 |
| IV.4.5.2 | Cash-Flow Portfolios: Copula VaR and PC VaR | 236 |
| IV.4.5.3 | Equity Portfolios: ‘Crash’ Scenario VaR | 239 |
| IV.4.5.4 | Currency Portfolios: VaR with Volatility Clustering | 241 |
| IV.4.6 | Summary and Conclusions | 244 |

| IV.5 | Value at Risk for Option Portfolios | 247 |
| IV.5.1 | Introduction | 247 |
| IV.5.2 | Risk Characteristics of Option Portfolios | 250 |
| IV.5.2.1 | Gamma Effects | 250 |
| IV.5.2.2 | Delta and Vega Effects | 252 |
| IV.5.2.3 | Theta and Rho Effects | 253 |
| IV.5.2.4 | Static and Dynamic VaR Estimates | 254 |
| IV.5.3 | Analytic Value-at-Risk Approximations | 257 |
| IV.5.3.1 | Delta Approximation and Delta–Normal VaR | 257 |
| IV.5.3.2 | P&L Distributions for Option Portfolios | 259 |
| IV.5.3.3 | Delta–Gamma VaR | 260 |
IV.5.4 Historical Value at Risk for Option Portfolios
  IV.5.4.1 VaR and ETL with Exact Revaluation
  IV.5.4.2 Dynamically Hedged Option Portfolios
  IV.5.4.3 Greeks Approximation
  IV.5.4.4 Historical VaR for Path-Dependent Options
  IV.5.4.5 Case Study: Historical VaR for an Energy Options Trading Book

IV.5.5 Monte Carlo Value at Risk for Option Portfolios
  IV.5.5.1 Monte Carlo VaR and ETL with Exact Revaluation
  IV.5.5.2 Risk Factor Models for Simulating Options VaR
  IV.5.5.3 Capturing Non-normality and Non-linearity
  IV.5.5.4 Capturing Gamma, Vega and Theta Effects
  IV.5.5.5 Path Dependency
  IV.5.5.6 Option Portfolios with a Single Underlying
  IV.5.5.7 Option Portfolios with Several Underlyings
  IV.5.5.8 Case Study: Monte Carlo VaR for an Energy Options Trading Book

IV.6 Risk Model Risk
  IV.6.1 Introduction
  IV.6.2 Sources of Risk Model Risk
    IV.6.2.1 Risk Factor Mapping
    IV.6.2.2 Risk Factor or Asset Returns Model
    IV.6.2.3 VaR Resolution Method
    IV.6.2.4 Scaling
  IV.6.3 Estimation Risk
    IV.6.3.1 Distribution of VaR Estimators in Parametric Linear Models
    IV.6.3.2 Distribution of VaR Estimators in Simulation Models
  IV.6.4 Model Validation
    IV.6.4.1 Backtesting Methodology
    IV.6.4.2 Guidelines for Backtesting from Banking Regulators
    IV.6.4.3 Coverage Tests
    IV.6.4.4 Backtests Based on Regression
    IV.6.4.5 Backtesting ETL Forecasts
    IV.6.4.6 Bias Statistics for Normal Linear VaR
    IV.6.4.7 Distribution Forecasts
    IV.6.4.8 Some Backtesting Results
  IV.6.5 Summary and Conclusions

IV.7 Scenario Analysis and Stress Testing
  IV.7.1 Introduction
  IV.7.2 Scenarios on Financial Risk Factors
    IV.7.2.1 Broad Categorization of Scenarios
    IV.7.2.2 Historical Scenarios
    IV.7.2.3 Hypothetical Scenarios
    IV.7.2.4 Distribution Scenario Design
