Ankylosis, 213

Essentials of Orthodontics: Diagnosis and Treatment
by Robert N. Staley and Neil T. Reske
© 2011 Blackwell Publishing Ltd.
Anterior crossbite, 40f, 42
adequate arch length, 96–97
angle classification of, 96
centric relation to centric occlusion functional shift on closure, 96
diastema closure in, with removable maxillary appliance, 104, 105–9f, 109
lateral incisor correction in, with removable maxillary appliance, 104, 105–11f, 109
lower anterior teeth alignment, 97
maxillary incisor roots, inclination of, 97
overbite, 96
prevalence of, 95, 95t
tooth rotation in, 97
treatment of
with fixed appliances, 102–3, 102–4f
with removable appliances, 97–102, 98–101f
Anterior vertical lines, incisor distance to, 69, 70f, 70t
Anteroposterior relationships, of upper and lower teeth, 6
Appliance plan, 15f, 17
Appliances. See Removable appliances; specific appliance
Ar. See Articulare
Arch
active lingual, side effects of, 86, 86f
active palatal, side effects of, 86, 86f
fixed-removable lingual, 84, 85f, 86f
forms
Bonwill-Hawley, 233f, 236
broad, 236
edgewise fixed appliances and, 236–37
natural, 236
Orthoform III, 236
Orthoform II square, 236
Orthoform I tapered, 236
Orthoform L.A., 236
standard, 236
length
analysis of, 55
in anterior crossbite, 96–97
measurements of, 54–55, 54f
lower, 48, 51f, 52f
lower lingual holding, 55
lower loop lingual
failure of, 92, 92f
laboratory prescription and construction of, 87f–91f
Nance palatal holding, 55, 79, 80f, 81f, 154, 157, 158f
palatal holding, 55
fixed-removable, 84, 85f
insertion of, 83–84
passive lingual
insertion of, 83–84
side effects of, 86, 86f
passive palatal, side effects of, 86, 86f
size of, diastema and, 137
trans-palatal, 82, 82f, 83f
upper, 48, 49f, 50f
width measurements, 37, 37f, 38f
wires, 230–31
nickel-titanium alloy, 230
titanium-molybdenum alloy, 230–31
Arc (loop) spring, 109, 110f, 111f
Arrow clasp, Hawley retainers with labial bow and, 267
Art bases, 23, 28
Articulare (Ar), 67
Austenitic stainless steel wires, 317–19, 318f, 318t, 319f
annealing of, 319, 319f
cold working, 318–19, 319f
heat and, 317–18, 318f
physical properties of, 318t
recovery heat treatment, 319, 319f
Ball clasp, Hawley retainers with labial bow and, 267–71, 267f–271f
Bands
cementing of, 231–32
edgewise fixed appliances and, 231
fitting of, 231
removal of, 232
Beta-titanium wires, 318t, 320
stress-strain curve for, 321, 321f
Bilateral asymmetry, 16f
Bilateral posterior crossbite, 115–16
etiologies of, 115–16
Bilateral symmetry, 16f

Class II-III subdivision, 10

Class II
  incisor dental compensations in, 10
  in mixed dentition, 7f, 8
  in primary dentition, 7f, 8
  subdivision, 9
  super, 9

Class II-1, 6f, 7–8

Class II-2, 8, 8f

Class III, 8f, 9
  incisor dental compensations in, 10
  in mixed dentition, 9
  in primary dentition, 9
  subdivision, 9–10
  super, 9

Iowa notation system for, 10
  rules for assigning, 10–11

severity rating of, 11
subdivision, 9–10

Mandibular Hawley retainer, 251, 252f

Mandibular impression, 20–21

Mandibular incisor-to-line Nasion-Point B, 69, 70f

Mandibular incisor-to-mandibular plane angle (IMPA), 69, 69f

Mandibular plane, 67

Mandibular plane-Frankfort horizontal plane (MPFH or FMA), 68

Mandibular plane-sella-nasion plane (MPSN), 68

Mastery learning, 177–78

Maxillary appliance, removable
diastemaclosure in anterior crossbite with, 104, 105–9f, 109
lateral incisor correction in anterior crossbite with, 104, 105–11f, 109

Maxillary Hawley retainer, 251, 252f
  with labial bow, 251, 252f, 254–55, 256f–267f, 257
  and Adams clasp, 256f, 257, 267f, 275, 276f–283f, 275–76
  and arrow clasp, 267
  and ball clasp, 267–71, 267f–271f
  and c-clasp, 271, 272f–275f

Maxillary impression, 21

Maxillary incisor roots, inclination of, anterior crossbite and, 97

Maxillary incisor-to-line A-Pog, 69, 70f

Maxillary incisor-to-mandibular incisor angle, 69, 69f

Maxillary incisor-to-S-N plane angle, 69, 69f

Maxillary labial frenum, diastema and, 137–38, 138f

Maxillary molar bands, cusp of Carabelli and, 231

Maximum intercuspation, 5

Me. See Menton

Measurements
dental, 68
skeletal, 68

Menton (Me), 67

Mesial step, 7, 7f

Mesiodistal-vertical parabolic shell, tooth movement to, 216–18, 217f

Mixed dentitions
  Class I malocclusion in, 7, 7f
  Class II malocclusion in, 7f, 8
  Class III malocclusion in, 9
